CONTENTS

This report is intended to provide an overall picture of the involvement of the 450 corporate-related political action committees participating in the 1976 campaign. These corporate-related political committees reported spending \$5,803,415 during the period January 1, 1975 through December 31, 1976 covered by this study. Concentrated attention has been given to those committees which reported receiving or expending in excess of \$100,000 during this time. While these nine committees reflect only two percent of the total number of corporate-related political action committees, they account for 18.5 percent of the total amount expended by all of the corporate-related political committees. The remaining 441 committees which make up the other 81.4 percent of the total expended are also included in this study in less detail.

In addition, each committee is listed with its reported connected, affiliated, or sponsoring organization. Committees which have reported no connected, affiliated, or sponsoring organization are footnoted to provide identifying data.

Over 94% of the committees have provided the names of their affiliated and/or connected organizations. Twenty-four committees have either listed "NONE" or failed to answer the section of the Statement of Organization requiring the names of any affiliated or connected organizations. In this case the word "BLANK" appears under the name of the committee. In neither case should the appearance of these two words under the name of any committee imply non-compliance with the Act on the part of a committee since it may indicate a misunderstanding of the requirements of the Act and the FEC Regulations.

This report is presented in three parts. The three parts present a consolidated picture of the financial activity of all corporate-related political action committees and include summary statistics, graphic presentations of the number of various categories of committees plus their reported receipts and expenditures for the two year period covered by this study and the cash on hand balances as of December 31, 1976. For those committees which received or spent in excess of \$100,000, more detailed information, including contributor analysis, amounts expended on behalf of federal candidates, and adjusted receipts and expenditures is provided.

Part I is a summary of all corporate-related committees listing receipts and expenditures and other data.

Part II highlights 26 corporate-related entities with multiple political action committees. This section includes 79 political committees which are related with a single corporate entity and/or related with a subsidiary or with other political committee representing another part of the corporate body.

Part III presents the other 371 single corporate-related political committees in alphabetical sequence by the name of the political action committee. These committees have no reported tie under the definition of "affiliated" or "connected organization" with any other committee presented in this section. This study does not include 14 political committees which have reported a sponsoring organization which is a corporation without capital stock. These committees will appear in a subsequent study in the Disclosure Series.
