

To my Congressional representatives

Concerning the **PROPOSED RULE CHANGES** by the Federal Election

Commission that apply to voter engagement.

The FEC has no authority at all to regulate Free Speech

All parts of the proposed rules are unacceptable.

Let's imagine for a moment that you are employed by a school text book publisher

and are assigned to review the history of free speech in a two column format,

column one, milestones in advancement of free speech, column two, setbacks.

To start our list put the Bill of Rights in column one and Nazi book burning

in column two, as an example of how to build your list.

At this time read the rules as proposed by the FEC and tell me which

column you would enter them into. I am interested in your response.

The FEC's proposed rule changes would dramatically impair vigorous debate

about important national issues, which is its obvious intension.

ANY restrictions of First Amendment freedoms will result in a unhealthy

and sick democracy, and must be rejected without question.
