Assistant General Counsel

Joeph Wenzinger JPW
Attorney

Subject: Draft AO 2022-14 (Google LLC) Draft B

We have been asked to place this draft on the Agenda by one or more Commissioners.

Members of the public may submit written comments on the draft advisory opinion. We are making this draft available for comment until 9:00 am (Eastern Time) on August 11, 2022.

Members of the public may also attend the Commission meeting at which the draft will be considered. The advisory opinion requestor may appear before the Commission at this meeting to answer questions.

For more information about how to submit comments or attend the Commission meeting, go to https://www.fec.gov/legal-resources/advisory-opinions-process/.

Attachment
Dear Ms. Rajan:

We are responding to your advisory opinion request on behalf of Google LLC (“Google”) concerning the application of the Federal Election Campaign Act, 52 U.S.C. §§ 30101-45 (the “Act”), and Commission regulations to Google’s proposal to offer a pilot program to test new Gmail design features at no cost on a nonpartisan basis to authorized candidate committees, political party committees, and leadership PACs. The Commission concludes that the proposed pilot program would not be permissible under the Act and Commission regulations because it would result in the making of a prohibited in-kind corporate contribution.

Background

The facts presented in this advisory opinion request are based on your letter received on July 1, 2022, your email dated August 10, 2022, and publicly available information.

Google is a subsidiary of Alphabet, Inc., a publicly traded company that is incorporated in Delaware with its principal place of business in Mountain View, California. A core product of Google’s is Gmail, an email platform provided to all users (including both political and non-political, individuals and organizations, and senders and

---

1 Advisory Opinion Request (“AOR”) at AOR002.
receivers of email) at no cost.² As explained in the request and further below, Google is planning to launch a pilot program to test new features in its spam filtering regarding emails from bulk senders to Gmail addresses.

I. Spam Filtering Under Current Program

According to the request, “[r]oughly half of all email traffic across the Internet consists of unwanted spam”³ and, without spam filtering, “the volume of spam reaching inboxes would be overwhelming.”⁴ Therefore, Gmail employs spam filters with the stated purpose of enabling users “to be more secure and efficient in their use of the product.”⁵ Spam filtering allows spam to be placed automatically into a user’s spam folder, as opposed to directly into the user’s inbox.

Google’s terms of service and policies — including Gmail’s spam filter policies — apply to emails from all senders regardless of political affiliation.⁶ Under these policies, Gmail employs “a number of filters” to determine whether an email is classified as spam,⁷ and “[o]ne of the most important factors” is user preference because users’

² You explain that “[p]aid advertising and other sponsored content on certain Google platforms help Google provide many products for anyone to use for free, including its Gmail service.” AOR003. In addition, you indicate that “Gmail is also a foundational component of the ‘Google Workspace’ product, which bundles a set of secure collaboration and productivity apps created for businesses of all sizes and which can be purchased for a fee.” Id.

³ AOR003-004.

⁴ AOR004.

⁵ AOR002.

⁶ AOR004.

⁷ Id. These filters “look at a variety of signals, including characteristics of the IP address, domains/subdomains, whether bulk senders are authenticated, and user input.” Id.
actions “teach Gmail how best to sort the received email based on preferences.”

For example, if a user moves a message to the spam folder, future emails from the sender generally are filtered to that user’s spam folder, and if a user adds a sender to their contact list, future messages from that email address generally are placed in the user’s inbox.

Moreover, Google provides information to bulk senders on how to maximize deliverability, both publicly available in the form of Bulk Sender Guidelines establishing steps bulk senders may take to improve their deliverability, and privately through Postmaster Tools, an account associated with a particular sender’s domain which any bulk sender may create to access data and diagnostics regarding their email campaign. Information provided in Postmaster Tools includes data and diagnostics regarding the reputation of a sender’s domain and IP address, as well as the rate at which a sender’s emails pass various authentication standards. As with the email platform, Gmail provides this information at no cost.

II. Spam Filtering Under Pilot Program

As explained below, Google proposes to create a pilot program for registered authorized candidate committees, political party committees, and leadership PACs

---

8 AOR005.

9 *Id.* You state that users flag emails as spam for a variety of reasons, which may include not wanting to be subscribed to an email list, the amount and frequency of emails, or “simply cleaning up a cluttered inbox.” *Id.*

10 *Id.*

11 *Id.*

12 *Id.*
Eligible Participants may become aware of the availability of the pilot program through announcements on Google’s website, Postmaster Tools, and social media; Google also plans to directly reach out to “multiple party committees” to inform them of the program and encourage the party committees to disseminate the information to affiliated candidate committees. To be part of the pilot, Eligible Participants would be required to seek participation by contacting Google for identification purposes using their FEC-registered email address and providing their FEC ID number. Google will, in turn, verify that the sender represents the committee it purports to represent by ensuring that the email was sent by the email listed on the committee’s Statement of Organization, which Google will retrieve with the FEC ID number. Google will then ensure that Eligible Participants satisfy certain objective criteria to establish that their emails are “legitimate, securely configured, and authenticated.” Eligible Participants would be included in the program on a nonpartisan basis and free of charge.

13 AOR001; AOR007.
14 AOR009.
15 AOR007.
16 Id.
17 Id. Google’s request lays out these eligibility criteria in considerable detail, explaining that the aim of these criteria is to “exclude senders who might use the additional capabilities provided under the pilot to reach Gmail users with harmful content” and “prevent imposters or fraudsters from posing as a candidate or a political party to solicit fraudulent contributions.” Id. For example, you state that Eligible Participants would be required to provide “one-click” unsubscribe in their messages, approve and follow unsubscribe requests within 24 hours of the user’s choice, and ensure that all links in the message can be scanned by Google for phishing and malware protection. AOR008.
18 AOR011.
who are included in the pilot (“Pilot Participants”) would be used to test two new features of Gmail’s spam filtering.

First, Pilot Participants would be used to test a feature whereby bulk emails sent by the Pilot Participants to Gmail users would not be detected by Gmail’s spam detection algorithms; instead, whether bulk emails are classified as spam would be determined based on direct feedback from the user.\(^{19}\) Specifically, the first email from each sender to a particular user would display a “prominent notification” placed by Gmail asking the user whether the user wishes to continue receiving messages from the sender, and if the user opts out in that message or a subsequent message — which would not contain the original prominent notification but would be subject to a requirement on the sender to allow “one-click unsubscribe” in the sender’s emails — future emails from that sender to a particular user would be placed in the spam folder.\(^{20}\) Unless a user opts out in the first message or any subsequent messages from a particular sender, the user would continue receiving messages from that sender. Moreover, Gmail users would be able to express their preferences at any time and affect future delivery by marking a sender’s message as either spam or not spam.

Second, Pilot Participants would receive a “the Inboxing Rate associated with their emails, expressed as a percentage.”\(^{21}\) Accordingly, an Eligible Participant “could view in Postmaster Tools information about the volume of messages that land in Gmail

\(^{19}\) Id.

\(^{20}\) AOR008.

users’ inboxes vs. the spam folder.”22 Google would gather feedback from both senders and users on the “efficacy and ease of use to consider whether the features tested in the pilot are commercially feasible, either for this group or other groups of senders.”23

Based on the feedback received from users in the program — which would begin running only after the Commission issues a favorable advisory opinion and go through January 2023 unless the pilot proves unsuccessful earlier than that date — Google may or may not continue, discontinue, or expand the features tested in the pilot.24 Moreover, Google may consider expanding the features to other bulk senders, such as government agencies, entities related to government agencies or involved in providing government services, senders of class-action notices, and non-profit organizations, depending on user feedback.25 At this time, however, Google has proposed including only political committees among its Eligible Participants.26

You state that the “pilot program achieves a number of commercial goals,”27 particularly that the “purpose of the pilot is to test whether the features employed in the pilot enable users to receive more wanted email from bulk senders without degrading the user experience.”28 Improving the user experience, in turn, “enhances the Google

brand.29 You further explain that Google proposes to start the pilot program with
Eligible Participants rather than other industries for testing because it is able to verify
entities registered with the Commission; the upcoming election season and its expected
increase and sustained engagement by an identifiable group of bulk senders; the bulk
senders’ strong incentive to keep users engaged for a long period; and the ease of
participant feedback for this group of senders because of the concentrated group of email
vendors.30

Question Presented

May Google launch a free and non-partisan pilot program to test Gmail design
features, which will be open to authorized candidate committees, political party
committees, and leadership political action committees, where spam detection as applied
to messages from a Pilot Participant will rely predominately on direct feedback from the
recipient rather than standard spam detection, and each Pilot Participant will receive
information regarding the rate of emails delivered into Gmail users’ inboxes, as long as
the Pilot Participant is in compliance with the program’s requirements?

Legal Analysis

No, Google may not offer the proposed pilot program to Eligible Participants
because doing so would constitute a prohibited corporate in-kind contribution.

The Act and Commission regulations prohibit corporations from making
contributions to federal candidates, political party organizations, and political committees

29 AOR006.
30 AOR011.
that make contributions to federal candidates and political party committees.\footnote{52 U.S.C. §§ 30118(a), (b)(2); 11 C.F.R. § 114.2(b). Corporations may, however, make contributions to nonconnected political committees that make only independent expenditures, see, e.g., Advisory Opinion 2011-11 (Colbert); \textit{Citizens United v. FEC}, 558 U.S. 310 (2010); \textit{SpeechNow.org v. FEC}, 599 F.3d 686 (D.C. Cir. 2010) (\textit{en banc}), and to non-contribution accounts of hybrid political committees, see Press Release, FEC Statement on \textit{Carey v. FEC}: Reporting Guidance for Political Committees that Maintain a Non- Contribution Account (Oct. 5, 2011), \url{https://www.fec.gov/updates/fec-statement-on-carey-fec/}.  

\textit{contributions} to nonconnected political committees that make only independent expenditures, see, e.g., Advisory Opinion 2011-11 (Colbert); \textit{Citizens United v. FEC}, 558 U.S. 310 (2010); \textit{SpeechNow.org v. FEC}, 599 F.3d 686 (D.C. Cir. 2010) (\textit{en banc}), and to non-contribution accounts of hybrid political committees, see Press Release, FEC Statement on \textit{Carey v. FEC}: Reporting Guidance for Political Committees that Maintain a Non- Contribution Account (Oct. 5, 2011), \url{https://www.fec.gov/updates/fec-statement-on-carey-fec/}.  

\footnote{52 U.S.C. § 30118(b)(2); see also 52 U.S.C. § 30101(8)(A)(i); 11 C.F.R. §§ 114.2(b), 100.52(a).} \footnote{11 C.F.R. § 100.52(d)(1).} \footnote{Id.} \footnote{11 C.F.R. § 100.52(d)(2).}
same terms and conditions on which it was offered to all similarly situated persons in the
general public.\textsuperscript{36} Significantly, the corporation in that advisory opinion provided the free
service to \textit{all users} “without any obligation to purchase other services.”\textsuperscript{37} The
Commission concluded that, in such circumstances, the usual and normal charge for a
service “is always zero,” and thus no contribution would result when providing the
service for free to candidates and political committees.\textsuperscript{38}

In reaching this conclusion, the Commission distinguished Advisory Opinion
1996-02 (CompuServe), in which the services provided by an incorporated electronic
bulletin board service provider were normally offered for a fee and were only offered
without charge to a select group, and therefore resulted in in-kind contributions when
provided to political committees.\textsuperscript{39} In that matter, CompuServe proposed providing free
member accounts to all Federal candidates, as it had with a “large number of public-
service oriented users.”\textsuperscript{40} There, the Commission noted that “[e]ven if the categories of
free customers you describe is varied enough to indicate that your proposal may be in the
ordinary course of business, the Commission still concludes that your proposed gift to

(CompuServe)).

\textsuperscript{40} Advisory Opinion 1996-02 (CompuServe) at 2.
Federal candidates of valuable services which enable them to communicate with voters and advocate their candidacies would constitute in-kind contributions to those candidates.”

In Advisory Opinion 2018-11 (Microsoft Corporation), the Commission concluded that Microsoft may offer a group of “election-sensitive customers,” which included political committees, a program of enhanced online security at no charge, because doing so would protect its brand reputation and allow it to obtain valuable data on security threats. In that advisory opinion, the Commission stressed that the program would be offered to political committees on a non-partisan basis, Microsoft faced a particularly high threat of damage to its brand reputation given the “public scrutiny” on their political clients in the “upcoming elections,” and that Microsoft would provide the service to all similarly situated entities, including political committees and “election sensitive” non-profit organizations and vendors.

Google proposes to modify its service only for certain political committees and would not include other types of entities in the pilot program; Google contends that it would be doing so for commercial, as opposed to political, reasons.

41 Id. at 4.
42 Advisory Opinion 2018-11 (Microsoft Corporation) at 2, 4.
43 The Commission has been clear that where corporations provide services to political committees on any different basis than to the general public, the corporation must do so for commercial, and not political, reasons, to avoid making an in-kind contribution. See, e.g., Advisory Opinion 2018-11 (Microsoft Corporation) at 5 (concluding that no in-kind contribution results from offering “election-sensitive” customers, including political committees, enhanced services at no charge if done “based on commercial and not political considerations, in the ordinary course of its business and not merely for promotional consideration or to generate goodwill”); Advisory Opinion 2018-05 (CaringCent) at 5 (concluding that corporation “may charge different fees to political committee clients than it charges to non-political clients,” as long as it charges “a commercially reasonable fee at the ‘ordinary and usual charge’” and “any variation in fees will be based on business considerations and will not be based on political
Even assuming that Google’s assertions about its commercial purposes are true, the Commission has never approved the provision of a free and enhanced service by a corporation to a group consisting solely of political committees. In Advisory Opinion 2004-06 (Meetup), the Commission noted that the “provision of a service that is always provided without charge to every person” would not result in a prohibited contribution. Google’s proposed Pilot Program would be offered without charge, but not to every person, or indeed to any other persons. The service proposed by Google is completely unique and is thus not akin to the activity contemplated by Advisory Opinion 2004-06.

Google provides Gmail services — including any feature related to spam filtering — for free to all of its users, including bulk senders, without any obligation on the user to purchase other services, even as part of the proposed pilot program. However, the Pilot Program is not providing a benefit to users of the free Gmail services, the recipients of the emails that could otherwise be potentially filtered as spam. Instead, it is providing a

---

45 Advisory Opinion 2004-06 (Meetup) at 3 (emphasis in original).

46 Gmail is a “foundational component” of the fee-based “Google Workspace” product, which bundles certain collaboration and productivity apps for business. AOR003. As part of that service, however, Gmail is not separately charged for, nor is there any obligation for any user to purchase Google Workspace to enable the user to use Gmail. Moreover, you explain that, while “1.5 billion” people use Gmail, 5 million are customers of the paid Google Workspace product.
premium service not offered to any other type of individual or organization to a limited
group of senders, all of whom would be political committees. Unlike a minor adjustment
to an existing program, Google’s proposal would allow Pilot Participants to wholly
bypass its existing systems and gain unprecedented access to its users. As such, it
appears that the services under the Pilot Program would expand beyond those offered
through Google’s ordinary course of business.

The activity proposed by Google is more similar to the activity described in
Advisory Opinion 1996-02 (CompuServe) where the Commission concluded its proposed
gift of access to a member account would constitute a provision of “valuable services
which enable [the federal candidates] to communicate with voters and advocate their
candidacies” and that any commercial benefit the proposal would provide the requestor
did not “negate or reduce the corporate contribution.” The expanded access that Pilot
Participants would have to Google’s users’ inboxes to advocate their candidacies and
solicit funds is of undeniable value. Further, the selected group of political committees
who become Pilot Participants would receive more detailed information about their
inboxing rate than a non-participating political committee or a similarly situated entity
who was not a political committee. Insight into how Google email recipients interact
with their messages could be quite valuable to a Pilot Participant sender.

Google would be modifying its service only for certain political committees and
would not include other entities in the pilot program. Approving the provision of a free
service by a corporation to a group consisting solely of political committees is without
precedent in prior Commission opinions.\textsuperscript{48} Even in Advisory Opinion 2018-12 (Defending Digital Campaigns, Inc.), the proposed services were offered not only to political committees, but also to “think tanks” and other public-policy focused NGOs (and Google’s request presents none of the “unusual and exigent circumstances,” notably the threat of foreign cyberattacks, that factored into the Commission’s decision in that advisory opinion).\textsuperscript{49} Nor is this request comparable to the situations presented in advisory opinion requests by vendors who proposed to offer different rate structures to different types of clients (some higher and some lower than the rates proposed for political committees), based on commercial and not political considerations.\textsuperscript{50} The Commission has never before approved proposal by a corporation to create a unique, free service exclusively for political committees. Although Google states that it \textit{may} at some point extend the program to other entities (including government agencies, entities related to government agencies or involved in providing government services, senders of class-action notices, and non-profit organizations), it also may not. That extension is not part of Google’s current proposal, and the Commission cannot base its opinion on speculation about what the requestor may or may not do in the future.\textsuperscript{51}
