AFFIDAVIT OF DOUGLASS LAWRENCE

I, Douglass Lawrence, being duly sworn, depose and say:

1. I am a resident of the State of Kansas. I was a member of the Kansas legislature until 1996 and I am currently employed as a lobbyist in Kansas.

2. In September 2001, I began to work for Westar Energy, Inc. ("Westar") as a consultant. In November 2001, I was employed directly by Westar as its Vice President for Governmental Affairs. I held this position until the end of 2002.

3. In the spring of 2002, I consulted with David Wittig, the then President and CEO of Westar, concerning a general plan to elevate Westar's profile among Members of Congress who were active in the effort to enact new energy legislation. This general plan, out'ined by one of Westar's Washington, D.C. lobbyists, called for campaign contributions totaling approximately \$56,500, of which \$31,500 would be in the form of hard money contributions to federal candidates.

4. David Wittig devised a formula to raise this amount of money through the thirteen most senior executives, including himself and Douglas Lake. Wittig assumed the greatest financial responsibility, followed by Douglas Lake, and then in decreasing amounts to the eleven remaining senior executives in the company, based on their respective pay grades. I then sent various inter-office memoranda reflecting the suggested contribution amounts and when the requested contributions would be needed.

5. After Wittig provided the suggested contribution amounts, neither he (Wittig) nor Lake had any further contact with me with regard to who was actually contributing or how much they were contributing. My only contact with Mr. Wittig with regard to campaign contributions was with regard to his own personal contributions.

6. I was responsible for collecting the campaign contribution checks from the thirteen designated contributors, although sometimes their duty was delegated to my assistant Kathy Volpert (now Kathy Lewis).

7. I was among those designated to contribute a certain amount by David Wittig. I voluntarily contributed more than what David Wittig suggested. I contributed more because other executives were not contributing their suggested amounts. I did not advise David Wittig about any of these matters and Wittig never made any inquiries about contributors.

8. When checks were collected from the various executives by myself or Kathy Volpert, she would put them in a Federal Express envelope and have them shipped to Richard Bornemann in Washington, D.C. We likely made three shipments by Federal Express between May and October 2002, although it is possible that there could have one or two additional rush shipments.

9. I was not reimbursed, directly or indirectly, for any campaign contribution which I made. My contributions were voluntary, and any end-of-the-year bonus I received was not in any fashion related to my contributions.

10. I spent a total of about 8 hours in 2002 in connection with the collection and processing of these checks.

Douglass Lawrence

Westar Energy.

2002 ANNUAL REPORT

At Westar Energy we are committed to operating a safe, reliable, open and innovative electric utility with uncompromising integrity.

We will provide first-class service to our customers, and, given the choice, they will not hesitate to choose us. We will be a friendly, caring neighbor and business partner worthy of trust.

Westar Energy will be a thriving, positive environment where employees are proud to work, diversity is celebrated and all are treated with respect. Talent and leadership of all employees will set industry standards of excellence that foster job security.

We will be a premier utility investment opportunity. Our financially balanced organization will deliver consistent returns to our investors.

By partnering with our communities, Westar Energy will be an outstanding model of civic leadership and environmental stewardship. All of us working together will make Kansas a better place to live!

002 WESTAR ENERGY

By any measure, 2002 was a difficult year for Westar Energy The company recorded a loss of \$793 4 million, 45 percent of book value, the share price dropped to a low of \$8.50 from \$17.20 at its close December 31, 2001, the Securities and Exchange Commission, the Federal Energy Regulatory Commission, and the U.S. Attorney's Office commenced investigations of various

SHAREHOLDERS

aspects of past business practices, relations with the Kansas Corporation Commission were severely strained, and liquidity issues became a concern by mid-2002. In early 2003, we reduced our quarterly dividend 37 percent, from 30 cents to 19 cents per share.

A bright spot throughout this difficult year was that we continued to provide outstanding electric utility service to nearly 647,000 Kansas customers Indeed, we were awarded the Edison Electric Institute's Emergency Response Award for our recovery efforts from one of the worst ice storms in our history Our power plants performed at record levels for reliability, availability, and costs of production

Additionally, in May and June of 2002, we issued \$1.5 billion of new debt, proceeds of which retired maturing debt. These transactions addressed the liquidity issues

As this letter is written, we believe you can be cautiously optimistic that at 2002's end a turnaround had begun In December 2002 and January 2003, a new senior management team was formed The appointment of a non-executive chairman marks a deliberate and significant change in our corporate governance. The nominating committee of the Board of Directors is proceeding to identify independent candidates for consideration as directors.

In February 2003, we initiated a comprehensive debt reduction and restructuring plan that calls for us by the end of 2004 to reduce debt by more than \$2 billion, exit all non-utility and non-core business activities, and return to our roots as a pure Kansas electric utility.

In early 2003, we enhanced liquidity with the sale of about 40 percent of our interest in ONEOK for \$300 million. Currently available cash combined with the proceeds of this sale provide us the ability to reture maturing debt obligations through 2004. Importantly, our agreement with ONEOK calls for the registration of our remaining holdings. This should facilitate the sale of our remaining holdings, subject to agreed-upon restrictions.

4. 10

Our ability to meet our debt-reduction target depends upon our success in selling the balance of our interest in ONEOK, as well as our 88 percent interest in Protection One. We have retained an investment-banking adviser to assist with the sale of Protection One. While we also intend to dispose of our 100 percent interest in Protection One Europe (a separate company), its relatively smaller size makes it less critical to our ability to meet our debt-reduction goal.

Our objective is to obtain enough cash from these asset sales, available free cash flow, and, if needed, an equity issuance to meet our debt-reduction target.

Reducing the dividend was a necessary but very unwelcome step in our debt reduction and restructuring plan. In addition to increasing cash available to pay down debt, we attempted to achieve several other important goals. We wanted the dividend to be clearly sustainable and, at the completion of our restructuring plan, to be able to grow at a rate consistent with the underlying growth of our Kansas utility business. We wanted our stock price to begin to reflect not only our improving credit quality but also a stable base from which future growth is a realistic expectation.

We are fully cooperating with the agencies involved in the various investigations noted at the beginning of this letter. Beyond that, there is little that it is appropriate for us to say about such matters. With respect to the U.S. Attorney's Office and SEC matters, a Special Committee of the Board of Directors was formed in October and, with the assistance of outside counsel, supervised a thorough internal investigation that has been completed. We will discuss the investigation at our annual shareholder meeting June 16. The FERC matter involves limited power trades with another utility as well as trades related to our system and our marketing operations. We have examined the subject transactions and do not believe they violated any laws or regulations.

As you might expect, class action lawsuits that reference these matters have been filed against Westar Energy and certain of its officers and former officers. We will defend against these lawsuits.

Going forward, it is a new day at Westar Energy. We are committed to regaining the confidence of our stakeholders. Indeed, there is already tangible evidence of our progress. We understand that to regain your confidence we must make steady and sustainable progress in building the value of your investment. We are focused on that objective.

Westar Energy is proud of our relationship with the communities we serve. Our employees' and retirees' commitment both at work and in their personal lives to our communities is an important part of this relationship. 2002 was filled with examples of how their commitment benefits Westar Energy and all of our stakeholders

January 2002 ended with a shiver as Kansas was hit with one of the the worst ice storms in Westar Energy's 79-year history

DEDICATION EMPLOYEES MAKE A DIFFERENCE IN 2002

John Mitchell, distribution system operator, monitors power distribution at the Wichita System Control Center

Crews from 10 states joined Westar Energy crews to restore power to 116,000 customers over 4,000 square miles. Employees took food to crews in the field, enabling them to return to work faster. In spite of the widespread area and communication problems brought on by damaged fiber optic lines, power was returned to all customers within nine days The hard work of crews in the field and their support network earned Westar Energy an Emergency Response Award from the Edison Electric Institute i.

2002 WESTAR ENERGY

"I am really proud of the way our team pulled together and got power restored to our customers," said Tom Sydow, director of operations in Salina, who served as one of the storm managers "Receiving the Emergency Response Award is a tribute to how willing our employees are to go above and beyond expectations."

Technology and help from customers also played a role in restoring power efficiently.

"Customers using the 1-800-LIGHT-KS line to report outages probably trimmed a day off our restoration time," Caroline Williams, vice president, customer care, said. The automated phone system answers up to 30,000 calls per hour and is networked to help map outage locations and send work orders directly to trucks in the field.

Another important initiative that enabled Westar Energy to recover from the storm so quickly was our tree-trimming program, for which the National Arbor Day Foundation again recognized us as a Tree Line USA Utility

As spring gave way to summer and temperatures climbed, focus turned to our energy centers Jeffrey Energy Center, our largest, generated more

than 167 million megawatt hours of electricity, exceeding all previous generation records by more than 1 million MWh

"Jeffrey Energy Center had an exceptional year This was possible because of the dedication and efforts of our employees Our employees truly make the difference," said Dave Neufeld, executive director, Jeffrey Energy Center

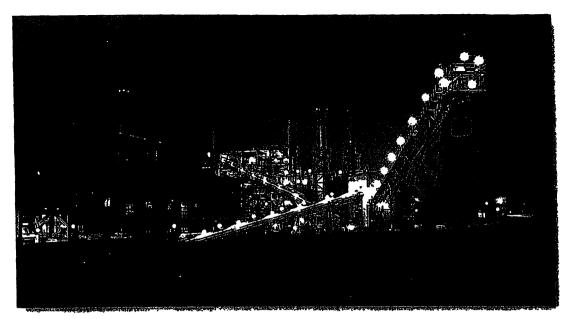

Jeffrey's 2002 performance combined with other system enhancements earned Jeffrey recognition as Powder River Basin Coal Plant of the Year for 2003, an honor bestowed on our Tecumsch Energy Center in 2002

"Jeffrey Energy Center had an exceptional year. This was possible because of the dedication and efforts of our employees. Our employees truly make the difference."

> Dave Neufeld, executive director. Jeffrey Energy Center

Jeffrey Energy Center is Westar Energy's largest power plant. Top: Mark Kopp, electrician-journeyman, replaces a seal for one of the generators, middle, at Jeffrey Bottom Jeffrey burns Powder River Basin coal

A

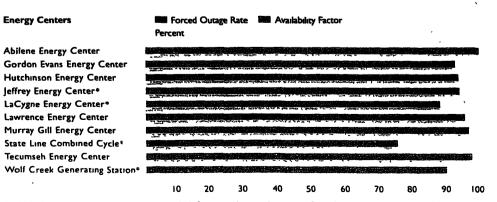

Tecumseh Energy Center was named Small Plant of the Year 2002 by the Powder River Basin Coal Users Group.

Installation of new continuous emission monitoring systems was completed at our coal-fired plants in 2002. The new systems operate more effectively and allow more accurate measurement of plant emissions

Natural gas-fired plants such as the Hutchinson, Murray Gill and Gordon Evans energy centers were able to burn oil, saving the company money as gas prices rose "The flexibility of the plants and of our crews has been a real asset to the company," John Bridson, executive director, power plants, who oversees the three energy centers, said

Westar Energy unveiled online services for our customers in 2002 A project team with employees from several departments pulled together to develop an easy-to-use online bill presentment and bill payment system Not content to stop there, the team expanded online services to include reporting power outages, placing orders to start or stop service, setting up payment agreements and other features.

"Online services became reality in 2002 and have been very well received," Jan McGovern, representative, customer service interface, who oversaw the project, said "Customers love

Availability factor is the amount of time a plant is available for use in relation to the amount of time the plant could have been available during a given umeframe, the figure is weighted by plant capacity forced outage rate is the percentage of time that a plant is nonfunctional due to unexpected component failure or systemic problems

Energy Centers

"Activities our volunteers take on are as diverse as the volunteers themselves. It is great to see how engaged everyone is in the community."

> Cynthia McCorvel, manager II, community affairs

2002 WESTAR ENERGY

1

doing business with us on the Web. More than 32,500 customer bills were paid online in 2002 That's in the first year of the program and before we started advertising the service."

Serving customers isn't just a job for many Westar Energy employees. Throughout the year Westar Energy employees and retirees and their spouses across our service territory roll up their sleeves to volunteer.

Westar Energy's Green Team is a group of employees, retirees and their family members who volunteer their talents and time for a variety of environmental projects across eastern Kansas.

Team members often gather as early as dawn on a Saturday to enspend the day planting native trees and grasses; building wetlands, L'viewing blinds and bird rehabilitation enclosures; clearing and \odot marking nature trails; or any of a host of other environmental projects Non public land. Frequently, the events are conducted in conjunction with schools or youth organizations. 9

 \Box Each employee and retiree brings his or her unique background and talents Li to the team, making Green Team projects successful and a good fit in our [™] different communities," Green Team coordinator Brad Loveless, senior manager, biology and conservation programs, said. "We take every opportunity to include

children in our work. We're educating the leaders of tomorrow on how to preserve our prairie, waters and wildlife."

In 2002, Westar Energy's Community Partners program recorded more than 53,000 hours of volunteer service by about 280 employees and retirees and their spouses.

Volunteering is performed through individual efforts and through organized projects, such as improvements made to the Helping Hands Humane Shelter by the Topeka Westar Energy Retirees' Club and teams of employees and retirees winterizing homes for national Make a Difference Day.

"Activities our volunteers take on are as diverse as the volunteers themselves," Cynthia McCarvel, manager II, community affairs, who oversees Community Partners and is liaison to the retirees' clubs, said "It is great to see how engaged everyone is in the community Community Partners is an extension of the creativity, compassion and can-do spirit that employees and retirees have long brought to their jobs "

Customer Operations provides friendly, professional service to Westar Energy's 647,000 customers. Anna Reid, customer service specialist, top, Rachel White, customer service representative, middle left, and Stacy Holt, supervisor, phone center, answer customers' questions at the Wichita Phone Center. Bottom Westar Energy meter readers, such as John Hanshaw, who works in Topeka, get to know customers in the neighborhoods they serve

7

Throughout 2002, Westai Energy employees, past and present continued to demonstrate that our communent to our community is more than business - its personal

FORWARD-LOOKING STATEMENTS

Centain matters discussed in this Annual Report on Form 10-K are "forwardlooking statements." The Private Securities Litigation Reform Act of 1995 has established that these statements qualify for safe harbors from liability Forwardlooking statements may include words like we "believe," "anticipate," "target," "expect," "pro forma," "estimate," "intend" or words of similar meaning Forwardlooking statements describe our future plans, objectives, expectations or goals. Such statements address future events and conditions concerning capital expenditures, earnings; liquidity and capital resources; litigation; accounting matters, possible corporate restructurings, mergers, acquisitions and dispositions; the sale of assets proposed in our Debt Reduction and Restructuring Plan filed with the Kansas Corporation Commission on February 6, 2003, compliance with debt and other restrictive covenants; interest and dividends; Protection One, Inc.'s financial condition and its impact on our consolidated results; possible future impairment charges, environmental matters; nuclear operations; events in foreign markets in which investments have been made; and the overall economy of our service area

What happens in each case could vary materially from what we expect because of such things as: electric utility deregulation or re-regulation; regulated and competitive markets; ongoing municipal, state and federal activities, economic conditions, changes in accounting requirements and other accounting matters; changing weather, rate and other regulatory matters, including the impact of the November 8, 2002 and December 23, 2002 orders issued by the Kansas Corporation Commission requiring debt reduction; amendments or revisions to our Debt Reduction and Restructuring Plan filed with the Kansas Corporation Commission, the impact of changes and downturns in the energy industry and the market for trading wholesale electricity, the sale of our interests in ONEOK, Inc., Protection One, Inc., and Protection One Europe; the federal grand jury subpoena by the United States Attorney's Office requesting certain information; the Securities and Exchange Commission's review of our consolidated financial statements, the subpoena received from the Federal Energy Regulatory Commission seeking information on power trades with Cleco Corporation and its affiliates and on other power marketing transactions; political, legislative and regulatory developments; regulatory, legislative and judicial actions; the impact of the purported shareholder and employee class action lawsuits filed against us: the impact of changes in interest rates generally and, specifically, changes in the London Interbank offer rate (LIBOR) on the fair value of our swap transactions; changes in the 10-year United States treasury rates and the corresponding impact on the fair value of our call option, homeland security considerations, ongoing impairment tests, coal, natural gas and oil prices, and other circumstances affecting anticipated operations, sales and costs.

These lists are not all-inclusive because it is not possible to predict all possible factors This report should be read in its entirety. No one section of the report deals with all aspects of the subject matter. Any forward-looking statement speaks only as of the date such statement was made, and we do not undertake any obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement was made except as required by applicable laws or regulations

ĕ.

ITEM I. BUSINESS

GENERAL

Westar Energy, Inc., a Kansas corporation incorporated in 1924, operates the largest electric utility in Kansas and owns interests in monitored security businesses and other investments. Unless the context otherwise indicates, all references in this Annual Report on Form 10-K to "the company," "we," "us," "our" or similar words are to Westar Energy, Inc. and its consolidated subsidiaries. The term "Westar Energy" refers to Westar Energy, Inc. alone and not together with its consolidated subsidiaries. We provide electric generation, transmission and distribution services to approximately 647,000 customers in Kansas. We also provide monitored security services to over 1 1 million customers in the United States and Europe ONEOK, Inc (ONEOK), in which we presently own an approximate 275% interest (we owned an approximate 45% interest at December 31, 2002; see "--- Changes in ONEOK Ownership" below), provides natural gas transmission and distribution services to approximately 1.9 million customers in Kansas, Oklahoma and Texas Our corporate headquarters are located at 818 South Kansas Avenue, Topeka, Kansas 66612

Westar Energy and Kansas Gas and Electric Company (KGE), a wholly owned subsidiary, provide rate regulated electric service. KGE owns 47% of Wolf Creek Nuclear Operating Corporation (WCNOC), the operating company for Wolf Creek Generating Station (Wolf Creek), our nuclear powered generating facility.

Westar Industnes, Inc. (Westar Industnes), our wholly owned subsidiary, owns our interests in Protection One, Inc. (Protection One), Protection One Europe, ONEOK and our other non-utility businesses. Protection One, a publicly traded, approximately 88%owned subsidiary, and Protection One Europe provide monitored security services. Protection One Europe refers collectively to Protection One International, Inc , a wholly owned subsidiary of Westar Industnes, and its subsidiaries, including a French subsidiary in which it owns an approximate 99.8% interest

SIGNIFICANT BUSINESS DEVELOPMENTS

Overview

A number of significant developments have impacted us and our business operations since January 2002

- We hired a new chief executive officer and senior management team
- We filed a new Debt Reduction and Restructuring Plan (the Debt Reduction Plan) with the Kansas Corporation Commission (KCC) that reflects our decision to return to being exclusively a Kansas electric utility, replacing an earlier plan that contemplated the separation of Westar Industries
- We began implementing the Debt Reduction Plan by (a) selling a portion of our ONEOK preferred stock, exchanging the remaining preferred stock for a new class of ONEOK preferred stock and modifying our related agreements with ONEOK, (b) reducing our first quarter 2003 dividend 37% to \$0 19 per share, and (c) exploring alternatives for the disposition of our interests in Protection One and Protection One Europe
- In May and June 2002, we relinanced approximately \$1.3 billion of outstanding debt

ić.

- A Special Committee of our board of directors, the Securities and Exchange Commission (SEC), the Federal Energy Regulatory Commission (FERC) and a federal grand jury initiated investigations into various matters.
- We recorded impairment charges related to our monitored security businesses of approximately \$864.9 million, net of tax benefit and minority interests, of which \$671.0 million was related to goodwill and \$193.9 million was related to customer accounts.
- We repurchased a portion of our 6.25% senior unsecured notes that have a final maturity of August 15, 2018 and are putable and callable on August 15, 2003 (the putable/callable notes). As a result, we recognized a loss related to the fair value of a call option associated with the putable/callable notes for 2002 of \$23.7 million, net of a \$15.7 million tax benefit.
- We reduced our utility work force by approximately 400 employees through a voluntary separation program.
- We restored service from a severe ice storm in late January 2002 and incurred \$19.3 million for restoration costs, a portion of which was capitalized.
- ONEOK gave us notice of termination effective December 2003 of a shared services agreement pursuant to which we provide customer service functions to each other, including meter reading, customer billing and call center operations. We expect termination of this agreement will increase our annual costs to provide these services by approximately \$11 million to \$13 million.

New Chief Executive Officer and Senior Management Team

James S. Haines, Jr., joined us in December 2002 as our chief executive officer and president and a member of the board of directors. He replaced David C. Wittig, who resigned on November 22, 2002 from all of his positions with us and our affihates. Mr Wittig had been on administrative leave without pay since November 7, 2002 as a result of his indictment by a federal grand jury in Topeka, Kansas, for actions ansing from his personal dealings.

Mr. Haines added new members to our senior management team, including William B. Moore as executive vice president and chief operating officer, and Mark A Ruelle as executive vice president and chief financial officer. All of these officers were previously employed with us and have a strong background in the electric utility business. Douglas T Lake, our executive vice president and chief strategic officer, resigned as a member of the board of directors and was placed on unpaid leave from all of his other positions with us and our affiliates on December 6, 2002.

See Note 35 of the Notes to Consolidated Financial Statements, "Potential Liabilities to David C Wittig and Douglas T. Lake," for information about our potential habilities to Mr. Wittig and Mr. Lake.

KCC Orders and Debt Reduction and Restructuring Plan

On February 6, 2003, we filed the Debt Reduction Plan with the KCC outlining our plans for paying down debt and restructuring the company The Debt Reduction Plan calls for the sale of our non-utility assets, including our interests in Protection One, Protection One Europe and ONEOK As part of the Debt Reduction Plan, the first quarter 2003 dividend on our common stock was reduced 37% to \$0 19 per share. In addition, the Debt Reduction Plan contemplates the potential issuance of additional Westar Energy equity if needed to further reduce debt following the disposition of all material non-utility assets. On February 10, 2003, the KCC issued an order in which it stated that the Debt Reduction Plan appears to make a good-

NI

faith effort to address the concerns expressed in the KCC's prior orders and that the KCC needed additional time to review the Debt Reduction Plan prior to addressing other issues The KCC also stayed the requirement of a December 23, 2002 order that we form a utilityonly subsidiary for our former KPL electric utility division (KPL) no later than August 1, 2003.

The Debt Reduction Plan replaced a previous financial plan to which we devoted extensive efforts throughout 2002 to obtain KCC approval. This plan contemplated the sale of Westar Industries common stock in a rights offering. We refer you to our Annual Report on Form 10-K for the year ended December 31, 2001 and subsequent Quarterly Reports on Form 10-Q for further information on this financial plan and related KCC orders The KCC rejected this plan on November 8, 2002 and issued an order that directed us to file a new financial plan, to reverse specified intercompany transactions, to reduce debt by \$100 million annually in each of the next two years from internally generated cash flow, and to restructure our organizational structure so that KPL would be placed in a separate subsidiary with the amount of debt held by the utility not exceeding \$1.47 billion The order further established standstill protections requiring that we seek KCC approval before we enter into certain transactions with a non-utility affiliate Following our filing of a motion for reconsideration and clarification of this order, the KCC issued an order on December 23, 2002 directing that no later than August 1, 2003, KPL be held within a separate utility-only subsidiary and that the consolidated debt for all of our utility businesses not exceed \$1.67 billion.

The standstill provisions of the December 23, 2002 KCC order potentially could have had a material impact on Protection One. These standstill provisions are described in Note 3 of the Notes to Consolidated Financial Statements, "Rate Matters and Regulation" On March 11, 2003, the KCC issued an order permitting us to make the payment due to Protection One in 2003 under a tax sharing agreement and to continue making loans to Protection One under a revolving credit facility. In addition, the order permitted us to reimburse Protection One approximately \$4.4 million for information technology and aviation services, subject to certain conditions.

The KCC staff and other parties to the KCC docket considering the Debt Reduction Plan have filed comments on the Debt Reduction Plan. The KCC has not yet established a procedural schedule for considering the Debt Reduction Plan and the related comments. We are unable to predict what action the KCC will take with respect to the Debt Reduction Plan.

The KCC Orders dated November 8, 2002, December 23, 2002, February 10, 2003 and March 11, 2003 and the Debt Reduction Plan are exhibits to this Annual Report on Form 10-K. All of such exhibits are incorporated by reference herein All of the documents concerning these matters, including the KCC Orders, can also be reviewed at the website of the KCC at www.kcc.state ks us (the website information is not incorporated herein or otherwise made a part of this Annual Report on Form 10-K) We refer you to these documents for further information concerning these matters

Changes in ONEOK Ownership

On February 5, 2003, ONEOK repurchased from Westar Industries 9,038,755 shares of its Series A Convertible Preferred Stock, which were convertible into 18,077,511 shares of common stock We received \$300 million as a result of this sale, which was previously approved by the KCC. We anticipate using all or a portion of the net proceeds to repurchase or provide for the repayment of all of the putable/callable notes and a portion of our 6.875% senior unsecured notes.

Westar Industries also exchanged its remaining shares of Series A Convertible Preferred Stock for 21,815,386 new shares of ONEOKs Series D Convertible Preferred Stock. ONEOK has agreed to file a shelf registration statement covering the Series D Convertible Preferred and common stock held by Westar Industries. Future sales will be subject to various conditions including the effectiveness of such registration, the required waiver or expiration of a 180-day lockup period ending on July 22, 2003, and future market conditions. As of March 14, 2003, Westar Industries holds an approximate 27.5% ownership interest in ONEOK, assuming conversion of the Series D Convertible Preferred Stock.

In 2002 and prior periods, we accounted for our ONEOK common stock investment under the equity method of accounting. During 2003, we will account for our ONEOK common stock investment as an available-for-sale security under Statement of Financial Accounting Standards (SFAS) No 115, "Accounting for Certain Investments in Debt and Equity Securities," and mark to market its fair value through other comprehensive income. We will begin accounting for our ONEOK Series D Convertible Preferred Stock investment under this method if and when a public market for these securities develops

Sale of Protection One and Protection One Europe

On January 13, 2003, we announced that our board of directors authorized management to explore alternatives for disposing of our investments in Protection One and Protection One Europe. The Debt Reduction Plan provides for the sale of our interests in Protection One Europe with a targeted closing of mid-2003 and the sale of our interest in Protection One with a targeted closing by late 2003 or early 2004. As a result, these operations were classified as discontinued operations during the first quarter of 2003 pursuant to the provisions of SFAS No. 144, "Accounting for the Impairment and Disposal of Long-Lived Assets"

As discontinued operations, we will be required to determine the fair value of our investment, which will be the net amount we expect to realize from the sale of the investment. The investment must be reported at the lesser of our recorded basis or the estimated fair value. If the fair value is less than our recorded basis, we will be required to record an expense equal to the amount, which could be material, by which our basis exceeds the estimated fair value.

We solicited and received indications of value for Protection One Europe from potential buyers These indications of value are within a range we would be willing to accept They indicated the recorded goodwill for Protection One Europe had no value. Accordingly, we recorded a \$36 million impairment charge in the fourth quarter of 2002 to reflect the impairment of all remaining goodwill at Protection One Europe We are willing to accept offers in the indicated range due to our ability to use the tax loss on this sale to offset the taxes that would otherwise be due from our sale of other investments We will recognize a \$58 million tax benchit in the first quarter of 2003 when Protection One Europe is classified as a discontinued operation

Ŋ

Ongoing Investigations

Grand Jury Subpoena

On September 17, 2002, we were served with a federal grand jury subpoena by the United States Attorney's Office in Topeka, Kansas, requesting information concerning the use of aircraft and our annual shareholder meetings Since that date, the United States Attorney's Office has served additional subpoenas on us and certain of our employees requesting further information concerning the use of aircraft; executive compensation arrangements with Mr Wittig, Mr. Lake and other former and present officers; the proposed rights offering of Westar Industries stock; and the company in general We are providing information in response to these requests and are fully cooperating in the investigation. We have not been informed that we are a target of the investigation or its impact on us.

Securities and Exchange Commission Inquiry

On November 1, 2002, the SEC notified us that it would be conducting an inquiry into the matters involved in the restatement of our first and second quarter 2002 financial statements. Our counsel has communicated with the SEC about these matters and other matters within the scope of the grand jury investigation. We are unable to predict the ultimate outcome of the inquiry or its impact on us.

Special Committee Investigation

Our board of directors appointed a Special Committee of directors to investigate management matters and matters that are the subject of the grand jury investigation and SEC inquiry The Special Committee retained counsel and other advisors. The Special Committee investigation has been completed and has not resulted in adjustments to our consolidated financial statements.

FERC Subpoena

On December 16, 2002, we received a subpoena from FERC seeking details on power trades with Cleco Corporation (Cleco) and its affiliates, documents concerning power transactions between our system and our marketing operations and information on power trades in which we or other trading companies acted as intermedianes

We have provided information to FERC in response to the subpoena We believe that our participation in these transactions did not violate FERC rules and regulations. However, we are unable to predict the ultimate outcome of the investigation See Note 19 of the Notes to Consolidated Financial Statements, "Ongoing Investigations -----FERC Subpoena," for additional information

Call Option

In August 1998, we entered into a call option with an investment bank related to the issuance of \$400 million of our putable/callable notes This call option is required to be settled by August 2003 through either a cash payment or a remarketing or refinancing of the putable/callable notes The ultimate value of the call option will be based on the difference between the 10-year United States treasury rate on August 12, 2003 and 5 44% If the 10-year United States treasury rate on August 12, 2003 is less than 5 44%, we will have a hability to the investment bank at that time At December 31, 2002, our potential hability under the call option was \$62 2 million Based on the 10-year forward treasury rate on March 14, 2003 of 3 91%, we would be obligated to make a cash payment of approximately \$69 1 million to settle the call option if we did not remarket or refinance the notes. The amount of our hability will increase or decrease approximately \$5 million for every 10-basis point change in the 10-year forward treasury rate. If settled through a remarketing or refinancing, any liability related to the call option will be amortized as a credit to interest expense over the term of the new debt. The investment bank will price the notes to yield a market premium adequate to allow the investment bank to retain proceeds equal to the fair value of the call option at settlement

At the time of issuance of the notes in 1998, we were not required by generally accepted accounting principles (GAAP) to account separately for the call option. However, when we began retiring these notes as a part of our overall debt reduction strategy, the portion of the call option associated with the retired notes became a freestanding option required to be treated as a derivative instrument under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," as amended by SFAS Nos. 137 and 138 (collectively, SFAS No. 133). In addition, under SFAS No. 133, we are required to mark to market changes in the anticipated amount of the hability related to the portion of the \$400 million in notes that have been retired so that our balance sheet reflects the current fair value of the free standing portion of the call option. For 2002, we recognized a loss of \$10.1 million, net of \$6.7 million tax benefit, related to the fair value of the call option associated with the putable/callable notes at the time the notes were retired. This loss is included in our consolidated statements of income as part of the gain on extinguishment of debt line item of other income. For 2002, we also recorded an additional non-cash charge of \$13.6 million, net of \$9.0 million tax benefit, to reflect mark to market changes in the fair value of the call option associated with the retired notes. This charge is reflected in the other line item of other income in our consolidated statements of income. In total, the loss recorded related to the fair value of the call option for the year ended December 31, 2002 was \$23.7 million, net of \$15.7 million tax benefit.

We intend to repurchase or provide for the repayment of the putable/callable notes on or prior to June 15, 2003 Any repurchase of these notes will require us to mark to market additional amounts of the call option. From January 1, 2003 through March 14, 2003, we purchased \$35.3 million face value of our putable/callable notes. We cannot predict changes in the market value of the call option and therefore cannot estimate amounts of future mark-to-market non-cash charges associated with the call option or the impact on our earnings.

Impairment Charges

Effective January 1, 2002, we adopted SFAS No 142, "Accounting for Goodwill and Other Intangible Assets," and SFAS No. 144, "Accounting for the Impairment and Disposal of Long-Lived Assets." As a result of implementing the new standards, we recorded a charge for the first quarter of 2002 of approximately \$749.3 million (net of tax benefit and minority interests), of which \$555.4 million was related to goodwill and \$193.9 million was related to customer accounts.

In addition, in the fourth quarter of 2002 we recorded a \$79.7 million impairment charge, net of tax benefit and minority interests, to reflect the additional impairment of all remaining goodwill of Protection One's North America segment. We also recorded a \$36 million impairment charge to reflect the impairment of all remaining goodwill at Protection One Europe. These accounting standards, the related charges and other related information are discussed in Note 23 of the Notes to Consolidated Financial Statements. Impairment Charges

à

2002 WESTAR ENERGY

Work Force Reductions

During 2002, we reduced our utility work force by approximately 400 employees through a voluntary separation program We recorded a net charge of approximately \$21.7 million in 2002 related to this program We have replaced and may continue to replace some of these employees For additional information, see Note 29 of the Notes to Consolidated Financial Statements, "Work Force Reductions."

Ice Storm

In late January 2002, a severe ice storm swept through our utility service area causing extensive damage and loss of power to numerous customers Through December 31, 2002, we incurred \$19.3 million for restoration costs, a portion of which was capitalized We have deferred and recorded as a regulatory asset on our December 31, 2002 consolidated balance sheet restoration costs of approximately \$15.0 million We have received an accounting authority order from the KCC that allows us to accumulate and defer for potential future recovery all operating and carrying costs related to storm restoration.

ELECTRIC UTILITY OPERATIONS

General

We supply electric energy at retail to approximately 647,000 customers in Kansas including the communities of Wichita, Topeka, Lawrence, Manhattan, Salina and Hutchinson. We classify our customers as residential, commercial and industrial as defined in our tanffs. We also supply electric energy at wholesale to the electric distribution systems of 62 Kansas cities and four rural electric cooperatives. We have contracts for the sale, purchase or exchange of wholesale electricity with other utilities. In addition, we have power marketing operations that purchase and sell electricity in areas outside our historical service territory.

Our electric sales for the three years ended December 31 were as follows

	2002	2001	2000	
		(in Thousands)		
Residential .	. \$ 442,106	\$ 419,492	\$ 452,674	
Commercial .	385,375	380,277	367,367

Generation Capacity

We have 5,929 megawatts (MW) of generating capacity. See "Item 2. Properties" for additional information on our generating units. The capacity by fuel type is summanzed below.

	acity W)	Percent of Total Capacity
Natural gas or oil 1,9 Diesel fuel	31	56 2
Natural gas or out 1,5 Diesel fuel .	548	9 2
	966	33 2
Wind	83	1.4
	1	_
Total . 5,9	929	100 0

Our aggregate 2002 peak system net load of 4,469 MW occurred on July 26, 2002. Our net generating capacity combined with firm capacity purchases and sales provided a capacity margin of approximately 24% above system peak responsibility at the time of the peak. Our all-time peak system net load of 4,528 MW occurred on September 11, 2000. We do not anticipate needing additional generating capacity through 2005

We have agreed to provide generating capacity to other utilities for certain periods as set forth below

Utility	Capacity (MW)	Period Ending
Oklahoma Municipal Power Authority	60	December 2013
Midwest Energy, Inc.	. 60	May 2008
Midwest Energy, Inc .	125	May 2010
Empire District Electric Company	162	May 2010
McPherson Board of Public Utilities (McPherson)	(a)	May 2027

⁶⁰We provide base capacity to McPherson McPherson provides peaking capacity to us During 2002, we provided approximately 75 MW to and received approximately 181 MW from McPherson The amount of base capacity provided to McPherson is based on a fixed percentage of McPherson's annual peak system load

14

Ã.

Fossil Fuel Generation

Fuel Mix

Based on the quantity of heat produced during the generation of electricity (MMBtu), the 2002 actual fuel mix was 81% coal, 14% nuclear and 5% gas, oil or diesel fuel. We expect a similar fuel mix in 2003 Our fuel mix fluctuates with the operation of the nuclearpowered Wolf Creek as discussed below under "— Nuclear Generation," fuel costs, plant availability, customer demand and the cost and availability of wholesale market power.

Coal

Jeffrey Energy Center: The three coal-fired units at Jeffrey Energy Center (JEC) have an aggregate capacity of 1,855 MW (our 84% share). We have a long-term coal supply contract with Amax Coal West, Inc., a subsidiary of RAG America Coal Company, to supply coal to JEC from mines located in the Powder River Basin in Wyoming. The contract expires December 31, 2020. The contract contains a schedule of minimum annual MMBtu delivery quantities The contract also contains a mechanism for repricing quantities received above the minimum annual delivery quantity. The price for these additional quantities is recalculated every five years, with 2003 being the first year affected, to provide a fixed price at current market prices. Current market prices are higher than those that have been in effect since inception of the contract, which will increase the cost of coal we receive during 2003 over the cost of coal received in 2002 Based on our 2003 budget of JEC coal we plan to burn during 2003, we anticipate our delivered cost of coal will increase approximately \$4.0 million.

The coal supplied during 2002 was surface mined and had an average Btu content of approximately 8,423 Btu per pound and an average sulfur content of 0.46 lbs/MMBtu (see "---- Environmental Matters") The average delivered cost of coal burned at JEC during 2002 was approximately \$1 12 per MMBtu, or \$18.87 per ton

Coal is transported from Wyorning under a long-term rail transportation contract with the Burlington Northern Santa Fe (BNSF) and Union Pacific railroads, with a term continuing through December 31, 2013

LaCygne Generating Station: The two coal-fired units at LaCygne Generating Station (LaCygne) have an aggregate generating capacity of 681 MW (KGEs 50% share). LaCygne 1 uses a blended fuel mix containing approximately 85% Powder River Basin coal and 15% Kansas/Missoun coal. LaCygne 2 uses Powder River Basin coal. The operator of LaCygne, Kansas City Power and Light Company (KCPL), administers the coal and coal transportation contracts A portion of the LaCygne 1 and LaCygne 2 Powder River Basin coal is supplied through fixed price contracts through 2005 and is transported under KCPL's Omnibus Rail Transportation Agreement with the BNSF and Kansas City Southern Railroad through December 31, 2010. During 2003, any coal not supplied under the terms of these contracts will be obtained through spot market purchases. The LaCygne 1 Kansas Amissour coal is purchased from time to time from local Kansas and Missour producers

The Powder River Basin coal supplied during 2002 had an average Btu content of approximately 8,584 Btu per pound and an average sulfur content of 0.78 lbs/MMBtu During 2002, the average delivered cost of all coal burned at LaCygne 1 was approximately \$0.91 per MMBtu or \$16.06 per ton The average delivered cost of coal burned at LaCygne 2 was approximately \$0.77 per MMBtu or \$13.18 per ton Lawrence and Tecumseh Energy Centers: The coal-fired units located at the Lawrence and Tecumseh Energy Centers have an aggregate generating capacity of 795 MW. In 2002, we obtained coal from Wyoming, which had an average Btu content of approximately 8,777 Btu per pound and an average sulfur content of 0.41 lbs/ MMBtu. During 2002, the average delivered cost of all coal burned in the Lawrence units was approximately \$1.09 per MMBtu, or \$19.11 per ton. The average delivered cost of all coal burned in the Tecumseh units was approximately \$1.10 per MMBtu, or \$19.28 per ton.

The coal is transported from Wyoming by the BNSF railroad under a contract ending in December 2004. We have Wyoming coal under contract to support the anticipated operation of these units through the end of 2004. We may also purchase coal on the spot market.

General: We have entered into all of our coal contracts in the ordinary course of business and do not believe we are substantially dependent upon these contracts. We believe there are other suppliers with plentiful sources of coal available at spot market prices to replace, if necessary, fuel supplied pursuant to these contracts and that we would be able to make transportation arrangements for such coal. In the event that we were required to replace our coal agreements, we would not anticipate a substantial disruption of our business, although the cost of purchasing coal could increase. Since the majority of our coal needs are met through long-term contracts as discussed above, we do not anticipate being materially impacted by price changes in the coal spot market.

We have entered into all of our coal transportation contracts in the ordinary course of business. Several rail carriers are capable of serving the coal mines from where our coal originates, but several of our generating stations can be served by only one rail carrier. In the event the rail carrier to one of our generating stations fails to provide reliable service, we could experience a short-term disruption of our business. However, due to the obligation of the rail carriers to provide service under the Interstate Commerce Act, we do not anticipate any substantial long-term disruption of our business, although the cost of transporting coal could increase.

Natural Gas

We use natural gas as a primary fuel in our Gordon Evans, Murray Gill, Neosho, Abilene and Hutchinson Energy Centers, in the gas turbine units at our Tecumseh generating station and in the combined cycle units at the State Line facility. Natural gas is also used as a supplemental fuel in the coal-fired units at the Lawrence and Tecumseh generating stations. Natural gas for all facilities is purchased in the short-term spot market, which supplies the system with a flexible natural gas supply as necessary to meet operational needs During 2002, we purchased 8,885,567 MMBtu of natural gas on the spot market for a total cost of \$34.2 million Natural gas accounted for approximately 3% of our total fuel burned during 2002

During the third quarter of 2001, we entered into hedging relationships to manage commodity price risk associated with future natural gas purchases in order to protect us and our customers from adverse price fluctuations in the natural gas market. The hedged period ends in July 2004 Thereafter, if gas prices are higher than the amount we are able to recover through our retail rates, we may be exposed to the increased gas cost and our exposure could be material. We may be able to reduce our exposure due to our ability to use other luct types. To recover increased gas costs in excess of the cost included in retail rates, we would have to make a rate filing with the KCC or request a recovery mechanism through the KCC which could be denied in whole or in part For additional information on our exposure to commodity price risks, see "Item 7A Quantitative and Qualitative Disclosures About Market Risk"

Natural gas transportation for Abilene and Hutchinson Energy Centers is maintained with Kansas Gas Service Company, a division of ONEOK, under a contract that expires April 30, 2004, which we anticipate renewing in the future. We meet a portion of our natural gas transportation requirements for Gordon Evans, Murray Gill, Neosho, Lawrence and Tecumseh Energy Centers through firm natural gas transportation capacity agreements with Southern Star Central Pipeline. All of the natural gas transportation requirements for the State Line facility are met through a firm natural gas transportation agreement with Southern Star Central Pipeline. The firm transportation agreements that serve Gordon Evans, Murray Gill, Lawrence and Tecumseh Energy Centers extend through April 1, 2010 The agreement for the Neosho and State Line facilities extends through June 1, 2016.

Oil

Most of our natural gas generating facilities have the capability to switch to oil once the facilities have been started with gas. We use oil as an alternate fuel when economical or when interruptions to natural gas supply make it necessary. Over the past few years, we have been able to sell more power at wholesale during the winter months when oil is typically more economical than natural gas. Oil accounted for approximately 2% of our total fuel burned during 2002.

Oil is also used as a start-up fuel at some of our generating stations and as a primary fuel in the Hutchinson No 4 combustion turbine and in the diesel generators. Oil is obtained by spot market purchases and year-long contracts. We maintain quantities in inventory to meet fuel switching needs to facilitate economic dispatch of power, for emergency requirements and to protect against reduced availability of natural gas for limited periods or when the primary fuel becomes uneconomical to burn.

Other Fuel Matters

Our contracts to supply fuel for our coal-fired and natural gas-fired generating units, with the exception of JEC, do not provide full fuel requirements at the various stations. Supplemental fuel is procured on the spot market to provide operational flexibility and to take advantage of economic opportunities when the price is favorable. We use financial instruments to hedge a portion of our anticipated fossil fuel needs in an attempt to offset the volatility of the spot market. Due to the volatility of these markets, we are unable to determine what the value of these financial instruments will be when the agreements are actually settled. See "Item 7A Quantitative and Qualitative Disclosures About Market Risk" for further information

The table below provides information relating to the weighted average cost of fuel that we have used, which includes the commodity cost, transportation cost to our facilities and any other associated costs

2002	2001	2000
\$ 040	\$ 0 44	\$ 044
1 05	1 08	1 05
3 84	3 79	3 44
2 58	3 65	3 23
\$1188	\$ 12 42	\$ 12 37
	1 05 3 84 2 58	\$ 0 40 \$ 0 44 1 05 1 08 3 84 3 79 2 58 3 65

Purchased Power

At times, we purchase power to meet the energy needs of our wholesale customers and to meet the requirements of our retail native load customers (end-use customers within our service territory). Factors that could cause us to purchase power for retail native load customers include generating plant outages, extreme weather conditions, growth, and other factors associated with supplying full requirements electricity. If we were unable to generate an adequate supply of electricity for our native load customers, we would purchase power in the wholesale market to the extent it is available or economically feasible to do so and/or implement curtailment or interruption procedures as allowed for in our tanffs and terms and conditions of service.

Nuclear Generation

Fuel Supply

The owners of Wolf Creek have on hand or under contract 100% of their uranium and uranium conversion needs for 2003 and 76% of the uranium and uranium conversion required for operation of Wolf Creek through March 2008. The balance is expected to be obtained through spot market and contract purchases.

The owners have under contract 100% of Wolf Creek's uranium enrichment needs for 2003 and 80% of the uranium enrichment required to operate Wolf Creek through March 2008. The balance of Wolf Creek's enrichment needs is expected to be obtained through spot market and contract purchases

All uranium, uranium conversion and uranium enrichment arrangements have been entered into in the ordinary course of business, and Wolf Creek is not substantially dependent upon these agreements Despite contraction and consolidation in the supply sector for these commodities and services, Wolf Creek's management behaves there are other supplies available to replace, if necessary, these contracts In the event these contracts were required to be replaced, Wolf Creek's management does not anticipate a substantial disruption of Wolf Creek's operations

Nuclear fuel is amortized to cost of sales based on the quantity of heat produced for the generation of electricity.

Radioactive Waste Disposal

Under the Nuclear Waste Policy Act of 1982, the Department of Energy (DOE) is responsible for the permanent disposal of spent nuclear fuel Wolf Creek pays the DOE a quarterly fee of one-tenth of a cent for each kilowatt-hour of net nuclear generation produced for the future disposal of spent nuclear fuel. These disposal costs are charged to cost of sales

A permanent disposal site will not be available for the nuclear industry until 2010 or later. Under current DOE policy, once a permanent site is available, the DOE will accept spent nuclear fuel on a pnority basis. The owners of the oldest spent fuel will be given the highest pnority As a result, disposal services for Wolf Creek will not be available pnor to 2016 Wolf Creek has on-site temporary storage for spent nuclear fuel in early 2000, Wolf Creek completed replacement of spent fuel storage racks to increase its on-site storage capacity for all spent fuel expected to be generated by Wolf Creek through the end of its licensed life in 2025

On February 14, 2002, the Secretary of Energy submitted to the President a recommendation for approval of the Yucca Mountain site in Nevada for the development of a nuclear waste repository for the disposal of spent nuclear fuel and high level nuclear waste from the nation's defense activities in July 2002, the President signed a resolution approving the Yucca Mountain site after receiving the approval of this site from the U.S. Senate and House of Representatives This action allows the DOE to apply to the Nuclear Regulatory Commission (NRC) to license the project. The DOE expects that this facility will open in 2010. However, the opening of the Yucca Mountain site could be delayed due to litigation and other issues related to the site as a permanent repository for spent nuclear fuel.

The Low-Level Radioactive Waste Policy Amendments Act of 1985 mandated that the various states, individually or through interstate compacts, develop alternative low-level radioactive waste disposal facilities. The states of Kansas, Nebraska, Arkansas, Louisiana and Oklahoma formed the Central Interstate Low-Level Radioactive Waste Compact (Compact) and selected a site in Nebraska to locate a disposal facility. WCNOC and the owners of the other five nuclear units in the Compact have provided most of the preconstruction financing for this project. Our net investment in the Compact is approximately \$74 million. This amount constitutes about 7.6% of all preconstruction financing provided to the Compact

On December 18, 1998, the Nebraska agencies responsible for considering the developer's license application denied the application The license applicant has sought a hearing on the license denial, but a U.S. District Court has indefinitely delayed proceedings related to the hearing. In December 1998, most of the utilities that had provided the project's preconstruction financing (including WCNOC) filed a federal court lawsuit contending Nebraska officials acted in bad faith while handling the license application Shortly thereafter, the Central Interstate Low-Level Radioactive Waste Commission (Commission), which is responsible for causing a new disposal facility to be developed within the Compact region, and US Ecology, the license applicant, filed similar claims against Nebraska. The U.S. District Court has since dismissed the utilities' and US Ecology's claims against Nebraska and its officials, but on September 30, 2002, the court entered a \$151.4 million judgment, about one-third of which constitutes prejudgment interest, in favor of the Commission and against Nebraska, finding that Nebraska had acted in bad faith in handling the license application. In late 2002, Nebraska appealed that decision to the 8th Circuit US Court of Appeals, where the case is pending

In May 1999, the Nebraska Legislature passed a bill withdrawing Nebraska from the Compact. In August 1999, the Nebraska Governor gave official notice of the withdrawal to the other member states. Withdrawal will not be effective for five years and will not, of itself, nullify the site license proceeding

Wolf Creek disposes of all classes of its low-level radioactive waste at existing third-party repositones. Should disposal capability become unavailable, Wolf Creek is able to store its low-level radioactive waste in an on-site facility Wolf Creek believes that a temporary loss of lowlevel radioactive waste disposal capability will not affect continued operation of the power plant

Outages

Wolf Creek has an 18-month refueling and maintenance schedule that permits operations during every third calendar year without interruption for a refueling outage. Wolf Creek was shut down for 36 days for its 12th scheduled refueling and maintenance outage, which began on March 23, 2002 and ended on April 27, 2002. During the outage, electric demand was met primarily by our fossil-fueled generating units and by purchased power. Wolf Creek operated the entire year of 2001 without any refueling outages. Wolf Creek is scheduled to be taken off-line in October 2003 for its 13th refueling and maintenance outage.

An extended shutdown of Wolf Creek could have a substantial adverse effect on our business, financial condition and results of operations because of higher replacement power and other costs. Although not expected, the NRC could impose an unscheduled plant shutdown due to security or other concerns.

Security

We have increased the level of security measures at our generation facility sites and various offices, due in part to nationwide concerns about homeland security These measures include, but are not limited to, increased security personnel; use of armed guard services, patrolling of company property, restricting access to our properties and implementing emergency training and response procedures.

Wolf Creek's management has increased both voluntary and federally mandated security measures at Wolf Creek. The NRC has required nuclear power plants to be operated at the highest level of security since September 11, 2001. The measures implemented at Wolf Creek include, but are not limited to, increased guard service, no unscheduled public visits and emergency training and response procedures.

The NRC has issued orders to all nuclear plants that make our current voluntary security measures mandatory. The orders also impose new security requirements at U.S. nuclear power plants. Wolf Creek has complied with and intends to continue to comply with these requirements.

Competition and Deregulation

Electric utilities have historically operated in a rate-regulated environment FERC, the Federal regulatory agency having jurisdiction over our wholesale rates and transmission services, and other utilities have initiated steps that are expected to result in a more competitive environment for utility services in the wholesale market. The Kansas Legislature and the KCC took no action on deregulation in 2002 or 2001 and no action is expected to be taken in the near future

Increased competition for retail electricity sales may in the future reduce our earnings, which could impact our ability to pay dividends and could have a material adverse impact on our operations and our financial condition. Our rates range from approximately 19% to 25% below the national average for retail customers based on a companison to a U.S. average obtained from Edison Electric Institute for Winter 2002 Because of these rates, we expect to retain a substantial part of our current volume of sales in a competitive environment However, a material non-cash charge to earnings may

23.7

be required should we discontinuc accounting under SFAS No 71, "Accounting for the Effects of Certain Types of Regulation." See. Note 2 of the Notes to Consolidated Financial Statements, "Summary of Significant Accounting Policies," for additional information

The 1992 Energy Policy Act began deregulating the electricity market for generation. The Energy Policy Act permitted FERC to order electric utilities to allow third parties to use their transmission systems to sell electric power to wholesale customers. In 1992, we agreed to open access of our transmission system for wholesale transactions. FERC also requires us to provide transmission services to others under terms comparable to those we provide ourselves. In December 1999, FERC issued an order (FERC Order No. 2000) encouraging formation of regional transmission organizations (RTOs). RTOs are designed to control the wholesale transmission services of the utilities in their regions, thereby facilitating open and more competitive markets in bulk power.

We and all other electric utilities with intrastate transmission facilities operate under FERC regulated open access tariffs that offer all wholesale buyers and sellers of electricity the same transmission services, at the same rates, that the utilities provide themselves We are a member of the SPP, a regional division of the North American Electric Reliability Council. After FERC rejected several attempts by the Southwest Power Pool (SPP) to gain RTO status, the SPP and the Midwest Independent System Operator (MISO) agreed in October 2001 to consolidate and form an RTO. On May 30, 2002, FERC approved the planned merger. On November 4, 2002, MISO and SPP filed a revised consolidated open-access transmission tariff as required by the merger agreement. On March 19, 2003, the SPPs board of directors voted to terminate the proposed merger with MISO, although both organizations have not precluded a future consolidation. We anticipate that FERC Order No 2000 and our continued participation in the SPP will not have a material effect on our operations.

Network Integration Transmission Service

Effective January 1, 2002, we began taking Network Integration Transmission Service under the SPP's Open Access Transmission Tanff. This provides a cost-effective way for us to participate in a broader market of generation resources with the possibility of lower transmission costs. This tanff provides for a zonal rate structure, whereby transmission customers pay a pro rata share, in the form of a reservation charge, for the use of the facilities for each transmission owner that serves them. As a result, the SPP has operational control over our transmission system, although we still own our transmission assets and maintain responsibility for dispatching, maintenance and storm restoration

Currently, all revenues collected within a zone are allocated back to the transmission owner serving the zone Since we are a transmission provider for our zone and are currently the only transmission customer taking service from that zone, we are currently being assessed 100% of the zonal costs and receiving all of the costs back as revenue, less servicing fees In 2002, these network integration transmission costs were approximately \$659 million, and the associated revenues were approximately \$601 million, for a net expense of approximately \$5.8 million. The revenues received are reflected in electric operating revenues, and the related charges are expensed.

Regulation and Rates

As a Kansas electric utility, we are subject to the jurisdiction of the KCC, which has general regulatory authority over our rates, extensions and abandonments of service and facilities, valuation of property, the classification of accounts, the issuance of some securities and vanous other matters. We are also subject to the jurisdiction of FERC, which has authority over wholesale sales of electricity, the transmission of electric power and the issuance of some securities. We are subject to the jurisdiction of the NRC for nuclear plant operations and safety. We are exempt as a public utility holding company pursuant to the Public Utility Holding Company Act of 1935 from all provisions of that Act, except Section 9(a)(2), which relates to the acquisition of the securities of other utilities.

Fuel and purchased power costs are recovered in retail rates at a fixed level. Therefore, to recover fuel and purchased power costs in excess of the costs included in retail rates, we would have to make a rate filing with the KCC, which could be denied in whole or in part. Any increase in fuel and purchased power costs over the costs recovered through rates would reduce our earnings if not offset by sales or other cost reductions. For additional information regarding commodity price risks, see "Item 7A Quantitative and Qualitative Disclosures About Market Risk"

On November 27, 2000, Westar Energy and KGE filed applications with the KCC for an increase in retail rates. On July 25, 2001, the KCC ordered an annual reduction in our combined electric rates of \$22.7 million, consisting of a \$41 2 million reduction in KGE's rates and an \$18.5 million increase in Westar Energy's rates.

On August 9, 2001, Westar Energy and KGE filed petitions with the KCC requesting reconsideration of the July 25, 2001 order. The petitions specifically asked for reconsideration of changes in depreciation, reductions in rate base related to deferred income taxes associated with the KGE acquisition premium and a deferred gain on the sale and leaseback of LaCygne 2, wholesale revenue imputation and several other issues On September 5, 2001, the KCC issued an order in response to our motions for reconsideration that increased Westar Energy's rates by an additional \$70 million The \$41.2 million rate reduction in KGE's rates remained unchanged. On November 9, 2001, we filed an appeal of the KCC decisions with the Kansas Court of Appeals in an action captioned "Western Resources, Inc. and Kansas Gas and Electric Company vs. The State Corporation Commission of the State of Kansas" On March 8, 2002, the Court of Appeals upheld the KCC orders On April 8, 2002, we filed a petition for review of the decision of the Court of Appeals with the Kansas Supreme Court. Our petition for review was denied on June 12, 2002.

Additional information with respect to rate matters and regulation is set forth in Note 3 of the Notes to Consolidated Financial Statements, "Rate Matters and Regulation"

ŦŊ.

Environmental Matters

General

We currently hold all federal and state environmental approvals required for the operation of all of our generating units We believe we are currently in substantial compliance with all air quality regulations (including those pertaining to particulate matter, sulfur dioxide (SO²) and nitrogen oxide (NOx)) promulgated by the State of Kansas and the Environmental Protection Agency (EPA)

The JEC and LaCygne 2 units have met: (1) the federal SO² standards through the use of low-sulfur coal; (2) the federal particulate matter standards through the use of electrostatic precipitators; and (3) the federal NOx standards through boiler design and operating procedures. The JEC units are also equipped with flue gas scrubbers providing additional SO² and particulate matter emission reduction capability when needed to meet permit limits.

The Kansas Department of Health and Environment regulations applicable to our other generating facilities prohibit the emission of more than 3.0 pounds of SO² per MMBtu of heat input. We meet these standards through the use of low-sulfur coal and by all coalburning facilities being equipped with flue gas scrubbers and/or electrostatic precipitators.

Because of the strong demand for generation in 2002, we consumed more SO² allowances than were allocated to us by the EPA. We made up the shortfall by utilizing allowances we had previously procured in the open market. In anticipation of another strong year in generation, we will be actively pursuing the purchase of additional SO² allowances for 2003, which could approximate \$3 0 million in additional costs.

We must comply, and are currently in compliance, with the provisions of The Clean Air Act Amendments of 1990 that require a two-phase reduction in some emissions. We have installed continuous monitoring and reporting equipment to meet the acid rain requirements. We have not had to make any material capital expenditures to meet Phase II SO² and NOx requirements.

All of our generating facilities are in substantial compliance with the Best Practicable Technology and Best Available Technology regulations issued by the EPA pursuant to the Clean Water Act of 1977.

EPA New Source Review

The EPA is conducting an enforcement initiative at a number of coalfired power plants in an effort to determine whether modifications at those facilities were subject to New Source Review requirements or New Source Performance Standards under the Clean Air Act. The EPA has requested information from us under Section 114(a) of the Clean Air Act (Section 114). A Section 114 information request requires us to provide responses to specific EPA questions regarding certain projects and maintenance activities that the EPA believes may have violated the New Source Performance Standard and New Source Review requirements of the Clean Air Act. The EPA contends that power plants are required to update emission controls at the time of major maintenance or capital activity. We believe that maintenance and capital activities performed at our power plants are generally routine in nature and are typical for the industry We are complying with this information request, but cannot predict the outcome of this investigation at this time. Should the EPA determine to take action, the resulting additional costs to comply could be material. We would expect to seek recovery through rates of any settlement amounts.

The EPA has initiated civil enforcement actions against other unaffiliated utilities as part of its initiative Settlement agreements entered into in connection with some of these actions have provided for expenditures to be made over extended time periods.

Additional information with respect to Environmental Matters is discussed in Note 17 of the Notes to Consolidated Financial Statements, "Commitments and Contingencies," and such information is incorporated herein by reference.

MONITORED SERVICES OPERATIONS

General

We provide property monitoring services through Protection One and Protection One Europe to approximately 1.1 million customers in the United States and approximately 55,000 customers in continental Europe. Revenues are generated primarily from recurring monthly payments for monitoring and maintaining the alarm systems that are installed in customers' homes and businesses. Services are provided to residential (both single-family and multifamily residences), commercial and wholesale customers. Currently, the United States customers are primarily in the residential market and the European customers are primarily in the commercial market.

Proposed Dispositions

The Debt Reduction Plan contemplates the sale of our interests in Protection One Europe with a targeted closing of mid-2003 and the sale of our interest in Protection One with a targeted closing by late 2003 or early 2004. Consistent with the Debt Reduction Plan, our board of directors has authorized management to explore alternatives for disposing of our investments in Protection One and Protection One Europe and we have retained financial advisors to assist with the possible sales. A special committee composed of independent directors of Protection One's board of directors has been formed and the committee has also retained a financial advisor. As a result of these decisions, these operations were classified as discontinued operations during the first quarter of 2003 under the provisions of SFAS No 144

As discontinued operations, we will be required to determine the fair value of our investment, which will be the net amount we expect to realize from the sale of the investment. The investment must be reported at the lesser of our recorded basis or the estimated fair value If the fair value is less than our recorded basis, we will be required to record an expense equal to the amount, which could be material, by which our basis exceeds the estimated fair value.

We solicited and received indications of value for Protection One Europe from potential buyers These indications of value are within a range we would be willing to accept. They indicated the recorded goodwill for Protection One Europe had no value Accordingly, we recorded a \$36 million impairment charge in the fourth quarter of 2002 to reflect the impairment of all remaining goodwill at Protection One Europe We are willing to accept offers in the indicated range due to our ability to use the tax loss on this sale to offset the taxes that would otherwise be due from our sale of other investments. We will recognize a \$58 million tax benefit in the first quarter of 2003 when Protection One Lurope is classified as a discontinued operation

2

2002 WESTAR ENERGY-

Operations

Monitored services operations consist principally of alarm monitoring, customer service functions and branch operations Security alarm systems include many different types of devices installed at customers' premises designed to detect or react to various occurrences or conditions, such as intrusion or the presence of fire or smoke. Existing alarm monitoring customer contracts generally have initial terms ranging from two to 10 years in duration and provide for automatic renewals for a fixed period (typically one year) unless one of the parties elects to cancel the contract at the end of its term. Since 2002, most new single family residential customers have been entering into contracts with initial terms of three years, and, for most new commercial customers, the initial term is five years.

Protection One provides monitoring services from four monitoring facilities in the United States. Protection One Europe provides monitoring services from facilities in Paris and Vitrolles, France. See "Item 2 Properties" for further information.

In 2001 and 2002, Protection One completed the installation of a common technology platform referred to as MAS[®], or Monitored Automation Systems, that combines the customer service, monitoring, billing and collection functions into a single system The conversion to MAS[®] has enabled Protection One to consolidate monitoring facilities, resulting in operational efficiencies and cost savings. Approximately 98.5% of Protection One's North Amenca residential and commercial customer base is served by MAS[®].

Branch Operations

Protection One maintains approximately 60 service branches in the United States from which it provides field repair, customer care,

alarm response and sales services and seven satellite locations from

which it provides field repair services. Protection One Europe maintains approximately 31 sales branch offices in continental Europe, primarily in France.

Customer Acquisition Strategy

Protection One's current customer acquisition strategy for the United States relies primarily on internally generated sales and a strategic alliance with BellSouth Telecommunications. The internal sales program generated 45,642 accounts in 2002 and 41,856 accounts in 2001. Protection One's multifamily business markets its services and products primarily to developers, owners and managers of apartment complexes and other multifamily dwellings.

Protection One Europe's customer acquisition strategy relies primarily on internally generated sales. Protection One Europe uses an internal sales force of approximately 300 employees, who operate out of 31 branch locations in France, Germany and Belgium Protection One Europe's salary structure for its internal sales force is heavily rehant on commissions but contains a portion of fixed salaries. In addition, Protection One Europe owns a telemarketing company, known as Eurocontact, which provides qualified leads to the sales network

Competition

The security alarm industry is highly competitive. In North America, only four alarm companies offer services across the United States, with the remainder being either large regional or small, privately held alarm companies Based on total annual revenues in 2001, Protection One believes the top four alarm companies in North America are:

- ADT Security Services (ADT), a subsidiary of Tyco International, Ltd.,
- Protection One,
- Brink's Home Security Inc., a subsidiary of The Pittston Company, and
- Honeywell Security, a division of Honeywell, Inc.

In continental Europe, a large number of small competitors and a few large regional competitors have recently been taking steps toward establishing a continental presence. The large regional competitors include the following companies:

- CIPE, a subsidiary of ADT Security Services and Tyco International, Ltd., which is the largest security company in France,
- Chubb, a United Kingdom-based company that is also a leading security company in France,
- Securitas, based in Sweden, which has its principal operations in the guarding industry, but is expanding operations in monitored security.
- Group 4 Falck, a Danish security company that has significant operations in Scandinavia and has recently expanded into Germany and the Netherlands, and
- Rentokil Initial, based in the Netherlands, which has operations in France and the United Kingdom

Competition in the security alarm industry is based primarily on market visibility, pnce, reputation for quality of services and systems, services offered and the ability to identify and solicit prospective customers as they move into homes and businesses. Protection One and Protection One Europe believe that they compete effectively with other national, regional and local security alarm companies due to their ability to offer integrated alarm system installation, monitoring, repair and enhanced services; their reputation for reliable equipment and services; and their prominent presence in the areas surrounding their branch offices.

Competitors exist in the market that have greater financial resources than Protection One or Protection One Europe, giving competitors the ability to offer higher prices to purchase customer accounts than Protection One or Protection One Europe might be able or willing to offer The effect of such competition may be to reduce the purchase opportunities available.

Regulatory Matters

A number of local governmental authorities have adopted or are considering various measures aimed at reducing the number of false alarms. Such measures include:

 permitting of individual alarm systems and the revocation of such permits following a specified number of false alarms,

ç,

- imposing fines on alarm customers for false alarms,
- Imposing limitations on the number of times the police will respond to alarms at a particular location after a specified number of false alarms.
- requiring further venfication of an alarm signal before the police will respond, and
- subjecting alarm monitoring companies to fines or penalties for transmitting false alarms.

Monitored services operations are subject to a variety of other laws, regulations and licensing requirements of both domestic and foreign federal, state and local authorities. In certain jurisdictions, Protection One and Protection One Europe are required to obtain licenses or permits to comply with standards governing employee selection and training and to meet certain standards in the conduct of their business.

The alarm industry is also subject to requirements imposed by vanous insurance, approval, listing and standards organizations. Depending upon the type of customer served, the type of security service provided and the requirements of the applicable local governmental jurisdiction, adherence to the requirements and standards of such organizations is mandatory in some instances and voluntary in others

Protection One's advertising and sales practices are regulated in the United States by both the Federal Trade Commission and state consumer protection laws. In addition, certain administrative requirements and laws of the jurisdictions in which Protection One and Protection One Europe operate also regulate such practices. Such laws and regulations include restrictions on the manner in which the sale of security alarm systems is promoted and the obligation to provide purchasers of its alarm systems with certain rescission rights.

The alarm monitoring business utilizes wired and wireless telephones and radio frequencies to transmit alarm signals. The cost of telephone lines and the type of equipment, which may be used in telephone line transmission, are currently regulated by both federal and state governments. The Federal Communications Commission and state public utilities commissions regulate the operation and utilization of radio frequencies. In addition, the laws of certain foreign jurisdictions in which Protection One Europe operates regulate the telephone communications with the local authorities.

Risk Management

The nature of providing monitored services potentially exposes Protection One and Protection One Europe to greater risks of hability for employee acts or omissions, or system failure, than may be inherent in other businesses Substantially all alarm monitoring agreements, and other agreements, pursuant to which products and services are sold, contain provisions limiting hability to customers in an attempt to reduce this risk.

Protection One and Protection One Europe carry insurance of various types, including general liability and errors and omissions insurance

in amounts considered adequate and customary for the industry and business. Loss experience, and the loss experiences at other security services companies, may affect the availability and cost of such insurance. Some insurance policies, and the laws of some states and countries, may limit or prohibit insurance coverage for punitive or certain other types of damages or liability arising from gross negligence.

SEGMENT INFORMATION

Financial information with respect to business segments is set forth in Note 32 of the Notes to Consolidated Financial Statements, "Segments of Business."

GEOGRAPHIC INFORMATION

Geographic information is set forth in Note 32 of the Notes to Consolidated Financial Statements, "Segments of Business."

EMPLOYEES

As of February 28, 2003, we had approximately 5,500 employees, including 1,900 utility employees and 3,600 employees of Protection One and Protection One Europe. Our current contract with the International Brotherhood of Electrical Workers extends through June 30, 2003. The contract covered approximately 1,100 utility employees as of February 28, 2003. We are currently discussing modifications to our existing contract with union representatives and expect these discussions to result in an agreement. We anticipate that formal bargaining will begin in April 2003 if these discussions are unsuccessful.

ACCESS TO COMPANY INFORMATION

We electronically file our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K with the SEC. The public may read and copy any of the reports that are filed with the SEC at the SEC's Public Reference Room at 450 Fifth Street, NW, Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site at www.sec.gov that contains reports, proxy and information statements and other information regarding issuers that file electronically.

We make available, free of charge, through our website and by responding to requests addressed to our investor relations department, our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K These reports are available as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC Our website address is www.wr.com. The information contained on our website is not part of this document.

Protection One maintains its executive offices at 818 South Kansas Avenue, Topeka, Kansas, 66612. Protection One and Protection One Europe operate primarily from the above facilities, although Protection One also leases office space for approximately 60 service branch offices and seven satellite branches in the United States and Protection One Europe leases offices for approximately 31 sales branch offices in continental Europe.

ITEM 3. LEGAL PROCEEDINGS

Information on our legal proceedings is set forth in Notes 3, 18, 19 and 35 of the Notes to Consolidated Financial Statements, "Rate Matters and Regulation," "Legal Proceedings," "Ongoing Investigations," and "Potential Liabilities to David C. Wittig and Douglas T. Lake," respectively, which are incorporated herein by reference.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matter was submitted to a vote of our security holders through the solicitation of proxies or otherwise during the fourth quarter of 2002.

1

· * * ·

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

STOCK TRADING

Our common stock is listed on the New York Stock Exchange and traded under the ticker symbol WR. As of March 14, 2003, there were 33,334 common shareholders of record. For information regarding quarterly common stock price ranges for 2002 and 2001, see Note 33 of the Notes to Consolidated Financial Statements, "Quarterly Results (Unaudited)."

DIVIDENDS

Holders of our common stock are entitled to dividends when and as declared by our board of directors. However, prior to the payment of common dividends, dividends must first be paid to the holders of preferred stock based on the fixed dividend rate for each series, and our obligations with respect to mandatorily redeemable preferred securities issued by subsidiary trusts must be met.

Quarterly dividends on common stock and preferred stock normally are paid on or about the first business day of January, April, July and October to shareholders of record as of or about the ninth day of the preceding month. Our board of directors reviews our common stock dividend policy from time to time. Among the factors the board of directors considers in determining our dividend policy are earnings, cash flows, capitalization ratios, regulation, including the KCC's order requiring us to reduce our outstanding debt, competition and

ITEM 6. SELECTED FINANCIAL DATA

financial loan covenants. In February 2003, we declared a firstquarter 2003 dividend of \$0.19 per share. Our Articles of Incorporation restrict the payment of dividends or the making of other distributions on our common stock while any preferred shares remain outstanding unless certain capitalization ratios and other conditions are met. We provide further information on these restrictions in Note 20 of the Notes to Consolidated Financial Statements, "Common Stock, Preferred Stock and Other Mandatorily Redeemable Securities." We do not expect these restrictions to have an impact on our ability to pay dividends on our common stock at the current rate.

See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources -Future Cash Requirements," Note 3 of the Notes to Consolidated Financial Statements, "Rate Matters and Regulation" and Note 20, "Common Stock, Preferred Stock and Other Mandatorily Redeemable Secunties," included herein for additional information on dividends.

SECURITIES AUTHORIZED FOR ISSUANCE UNDER EQUITY COMPENSATION PLANS

The information called for by the item relating to "Securities Authorized for Issuance Under Equity Compensation Plans" will be set forth under that heading in the Proxy Statement relating to the Annual Meeting of Shareholders to be held June 16, 2003, which will be filed with the Securities and Exchange Commission no later than April 30, 2003, and which is incorporated herein by reference. See also "Item 12. Security Ownership of Certain Beneficial Owners and Management."

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

INTRODUCTION

In Management's Discussion and Analysis, we discuss the general financial condition, significant annual changes and the operating results for us and our subsidianes. We explain.

- what factors impact our business,
- what our earnings and costs were in 2002, 2001 and 2000,
- why these earnings and costs differ from year to year,
- how our earnings and costs affect our overall financial condition,
- what our capital expenditures were for 2002,
- what we expect our capital expenditures to be for the years 2003 through 2005,
- how we plan to pay for these future capital expenditures,
- critical accounting policies, and
- any other items that particularly affect our financial condition or earnings.

As you read Management's Discussion and Analysis, please refer to our consolidated financial statements and the accompanying notes, which show our operating results.

SUMMARY OF SIGNIFICANT ITEMS

Overview

A number of significant developments have impacted us and our business operations since January 2002

- We hired a new chief executive officer and senior management team
 - We filed a new Debt Reduction and Restructuring Plan (the Debt Reduction Plan) with the Kansas Corporation Commission (KCC) that reflects our decision to return to being exclusively a Kansas electric utility, replacing an earlier plan that contemplated the separation of Westar Industries, Inc. (Westar Industries).
- We began implementing the Debt Reduction Plan by (a) selling a portion of our ONEOK, Inc (ONEOK) preferred stock, exchanging
 - the remaining preferred stock for a new class of ONEOK preferred stock and modifying our related agreements with ONEOK, (b) reducing our first quarter 2003 dividend 37% to \$0 19 per share, and (c) exploring alternatives for the disposition of our interests in Protection One, Inc. (Protection One) and Protection One Europe.
 - In May and June 2002, we refinanced approximately \$1.3 billion of outstanding debt.
 - A Special Committee of our board of directors, the Securities and Exchange Commission (SEC), the Federal Energy Regulatory Commission (FERC) and a federal grand jury initiated investigations into various matters
 - We recorded impairment charges related to our monitored security businesses of approximately \$864 9 million, net of tax benefit and minority interests, of which \$671 0 million was related to goodwill and \$193 9 million was related to customer accounts
 - We repurchased a portion of our 6 25% senior unsecured notes that have a final maturity of August 15, 2018 and are putable and callable on August 15, 2003 (the putable/callable notes) As a result, we recognized a loss related to the fair value of a call option

associated with the putable/callable notes for 2002 of 23.7 million, net of a 157 million tax benefit.

- We reduced our utility work force by approximately 400 employees through a voluntary separation program.
- We restored service from a severe ice storm in late January 2002 and incurred \$19.3 million for restoration costs, a portion of which was capitalized.
- ONEOK gave us notice of termination effective December 2003 of a shared services agreement pursuant to which we provide customer service functions to each other, including meter reading, customer billing and call center operations. We expect termination of this agreement will increase our annual costs to provide these services by approximately \$11 million to \$13 million.

New Chief Executive Officer and Senior Management Team

James S. Haines, Jr., joined us in December 2002 as our chief executive officer and president and a member of the board of directors. He replaced David C. Wittig, who resigned on November 22, 2002 from all of his positions with us and our affiliates. Mr. Wittig had been on administrative leave without pay since November 7, 2002 as a result of his indictment by a federal grand jury in Topeka, Kansas, for actions ansing from his personal dealings.

Mr. Haines added new members to our senior management team, including William B. Moore as executive vice president and chief operating officer, and Mark A Ruelle as executive vice president and chief financial officer. All of these officers were previously employed with us and have a strong background in the electric utility business. Douglas T. Lake, our executive vice president and chief strategic officer, resigned as a member of the board of directors and was placed on unpaid leave from all of his other positions with us and our affiliates on December 6, 2002

See Note 35 of the Notes to Consolidated Financial Statements, "Potential Liabilities to David C. Wittig and Douglas T. Lake," for information about our potential liabilities to Mr. Wittig and Mr. Lake

KCC Orders and Debt Reduction and Restructuring Plan

On February 6, 2003, we filed the Debt Reduction Plan with the KCC outlining our plans for paying down debt and restructuring the company. The Debt Reduction Plan calls for the sale of our non-utility assets, including our interests in Protection One, Protection One Europe and ONEOK. As part of the Debt Reduction Plan, the first quarter 2003 dividend on our common stock was reduced 37% to \$0 19 per share. In addition, the Debt Reduction Plan contemplates the potential issuance of additional Westar Energy equity, if needed to further reduce debt following the disposition of all material nonutility assets On February 10, 2003, the KCC issued an order in which it stated that the Debt Reduction Plan appears to make a goodfaith effort to address the concerns expressed in the KCC's prior orders and that the KCC needed additional time to review the Debt Reduction Plan prior to addressing other issues. The KCC also stayed the requirement of a December 23, 2002 order that we form a utilityonly subsidiary for our former KPL electric utility division (KPL) no later than August 1, 2003

The Debt Reduction Plan replaced a previous financial plan to which we devoted extensive efforts throughout 2002 to obtain KCC approval This plan contemplated the sale of Westar Industries common stock in a nghts offering We refer you to our Annual Report on Form 10-K for the year ended December 31, 2001 and subsequent

Q

Quarterly Reports on Form 10-Q for further information on this financial plan and related KCC orders The KCC rejected this plan on November 8, 2002 and issued an order that directed us to file a new financial plan, to reverse specified intercompany transactions, to reduce debt by \$100 million annually in each of the next two years from internally generated cash flow, and to restructure our organizational structure so that KPL would be placed in a separate subsidiary with the amount of debt held by the utility not exceeding \$1.47 billion. The order further established standstill protections requiring that we seek KCC approval before we enter into certain transactions with a non-utility affiliate. Following our filing of a motion for reconsideration and clarification of this order, the KCC issued an order on December 23, 2002 directing that no later than August 1, 2003, KPL be held within a separate utility-only subsidiary and that the consolidated debt for all of our utility businesses not exceed \$1.67 billion.

The standstill provisions of the December 23, 2002 KCC order potentially could have had a maternal impact on Protection One. These standstill provisions are described in Note 3 of the Notes to Consolidated Financial Statements, "Rate Matters and Regulation" On March 11, 2003, the KCC issued an order permitting us to make the payment due to Protection One in 2003 under a tax sharing agreement and to continue making loans to Protection One under a revolving credit facility. In addition, the order permitted us to reimburse Protection One approximately \$4.4 million for information technology and aviation services, subject to certain conditions.

The KCC staff and other parties to the KCC docket considering the Debt Reduction Plan have filed comments on the Debt Reduction Plan. The KCC has not yet established a procedural schedule for considering the Debt Reduction Plan and the related comments We are unable to predict what action the KCC will take with respect to the Debt Reduction Plan.

The KCC Orders dated November 8, 2002, December 23, 2002, February 10, 2003 and March 11, 2003 and the Debt Reduction Plan are exhibits to this Annual Report on Form 10-K. All of such exhibits are incorporated by reference herein. All of the documents concerning these matters, including the KCC Orders, can also be reviewed at the website of the KCC at www.kcc.state.ks.us (the website information is not incorporated herein or otherwise made a part of this Annual Report on Form 10-K). We refer you to these documents for further information concerning these matters.

Changes in ONEOK Ownership

On February 5, 2003, ONEOK repurchased from Westar Industries 9,038,755 shares of its Series A Convertible Preferred Stock, which were convertible into 18,077,511 shares of common stock We received \$300 million as a result of this sale, which was previously approved by the KCC. We anticipate using all or a portion of the net proceeds to repurchase or provide for the repayment of all of the putable/callable notes and a portion of our 6 875% senior unsecured notes.

Westar Industnes also exchanged its remaining shares of Series A Convertible Preferred Stock for 21,815,386 new shares of ONEOK's Senes D Convertible Preferred Stock ONEOK has agreed to file a shelf registration statement covering the Series D Convertible Preferred and common stock held by Westai Industnes Future sales will be subject to various conditions including the effectiveness of such registration, the required waiver or expiration of a 180-day lock-up period ending on July 22 2003, and future market conditions As of March 14, 2003, Westar Industries holds an approximate 27.5% ownership interest in ONEOK, assuming conversion of the Series D Convertible Preferred Stock.

In 2002 and prior penods, we accounted for our ONEOK common stock investment under the equity method of accounting. During 2003, we will account for our ONEOK common stock investment as an available-for-sale security under Statement of Financial Accounting Standards (SFAS) No. 115, "Accounting for Certain Investments in Debt and Equity Securities," and mark to market its fair value through other comprehensive income. We will begin accounting for our ONEOK Series D Convertible Preferred Stock investment under this method if and when a public market for these securities develops.

Sale of Protection One and Protection One Europe

On January 13, 2003, we announced that our board of directors authorized management to explore alternatives for disposing of our investments in Protection One and Protection One Europe. The Debt Reduction Plan provides for the sale of our interests in Protection One Europe with a targeted closing of mid-2003 and the sale of our interest in Protection One with a targeted closing by late 2003 or early 2004. As a result, these operations were classified as discontinued operations during the first quarter of 2003 pursuant to the provisions of SFAS No. 144, "Accounting for the Impairment and Disposal of Long-Lived Assets."

As discontinued operations, we will be required to determine the fair value of our investment, which will be the net amount we expect to realize from the sale of the investment. The investment must be reported at the lesser of our recorded basis or the estimated fair value. If the fair value is less than our recorded basis, we will be required to record an expense equal to the amount, which could be material, by which our basis exceeds the estimated fair value

We solicited and received indications of value for Protection One Europe from potential buyers These indications of value are within a range we would be willing to accept. They indicated the recorded goodwill for Protection One Europe had no value Accordingly, we recorded a \$36 million impairment charge in the fourth quarter of 2002 to reflect the impairment of all remaining goodwill at Protection One Europe. We are willing to accept offers in the indicated range due to our ability to use the tax loss on this sale to offset the taxes that would otherwise be due from our sale of other investments. We will recognize a \$58 million tax benefit in the first quarter of 2003 when Protection One Europe is classified as a discontinued operation.

Ongoing Investigations

Grand Jury Subpoena

On September 17, 2002, we were served with a federal grand jury subpoena by the United States Attorney's Office in Topeka, Kansas, requesting information concerning the use of aircraft and our annual shareholder meetings Since that date, the United States Attorney's Office has served additional subpoenas on us and certain of our employees requesting further information concerning the use of aircraft, executive compensation arrangements with Mr Wittig, Mr. Lake and other former and present officers, the proposed rights offering of Westar Industries stock, and the company in general. We are providing information in response to these requests and are fully cooperating in the investigation. We have not been informed that we are a target of the investigation. We are unable to predict the ultimate outcome of the investigation or its impact on us

2002 WESTAR ENERGY

Securities and Exchange Commission Inquiry

On November 1, 2002, the SEC notified us that it would be conducting an inquiry into the matters involved in the restatement of our first and second quarter 2002 financial statements. Our counsel has communicated with the SEC about these matters and other matters within the scope of the grand jury investigation. We are unable to predict the ultimate outcome of the inquiry or its impact on us

Special Committee Investigation

Our board of directors appointed a Special Committee of directors to investigate management matters and matters that are the subject of the grand jury investigation and SEC inquiry. The Special Committee retained counsel and other advisors. The Special Committee investigation has been completed and has not resulted in adjustments to our consolidated financial statements

FERC Subpoena

On December 16, 2002, we received a subpoena from FERC seeking details on power trades with Cleco Corporation (Cleco) and its affiliates, documents concerning power transactions between our system and our marketing operations and information on power trades in which we or other trading companies acted as intermediaries

We have provided information to FERC in response to the subpoena. We believe that our participation in these transactions did not violate FERC rules and regulations. However, we are unable to predict the ultimate outcome of the investigation. See Note 19 of the Notes to Consolidated Financial Statements, "Ongoing Investigations — FERC, Subpoena," for additional information

Call Option

In August 1998, we entered into a call option with an investment bank related to the issuance of \$400 million of our putable/callable notes This call option is required to be settled by August 2003 through either a cash payment or a remarketing or refinancing of the putable/callable notes. The ultimate value of the call option will be based on the difference between the 10-year United States treasury rate on August 12, 2003 and 5 44%. If the 10-year United States treasury rate on August 12, 2003 is less than 5 44%, we will have a hability to the investment bank at that time. At December 31, 2002, our potential liability under the call option was \$62 2 million. Based on the 10-year forward treasury rate on March 14, 2003 of 3.91%, we would be obligated to make a cash payment of approximately \$69.1 million to settle the call option if we did not remarket or refinance the notes. The amount of our liability will increase or decrease approximately \$5 million for every 10-basis point change in the 10-year forward treasury rate If settled through a remarketing or refinancing, any liability related to the call option will be amortized as a credit to interest expense over the term of the new debi. The investment bank will price the notes to yield a market premium adequate to allow the investment bank to retain proceeds equal to the fair value of the call option at settlement

At the time of issuance of the notes in 1998, we were not required by generally accepted accounting principles (GAAP) to account separately for the call option However, when we began retiring these notes as a part of our overall debt reduction strategy, the portion of

the call option associated with the retired notes became a freestanding option required to be treated as a derivative instrument under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," as amended by SFAS Nos. 137 and 138 (collectively, SFAS No. 133). In addition, under SFAS No. 133, we are required to mark to market changes in the anticipated amount of the hability related to the portion of the \$400 million in notes that have been retired so that our balance sheet reflects the current fair value of the free standing portion of the call option. For 2002, we recognized a loss of \$10.1 million, net of \$6.7 million tax benefit, related to the fair value of the call option associated with the putable/callable notes at the time the notes were retired. This loss is included in our consolidated statements of income as part of the gain on extinguishment of debt line item of other income. For 2002, we also recorded an additional non-cash charge of \$13.6 milhon, net of \$9.0 million tax benefit, to reflect mark to market changes in the fair value of the call option associated with the retired notes This charge is reflected in the other line item of other income in our consolidated statements of income. In total, the loss recorded related to the fair value of the call option for the year ended December 31, 2002 was \$23.7 million, net of \$15.7 million tax benefit.

We intend to repurchase or provide for the repayment of the putable/callable notes on or prior to June 15, 2003. Any repurchase of these notes will require us to mark to market additional amounts of the call option. From January 1, 2003 through March 14, 2003, we purchased \$35.3 million face value of our putable/callable notes. We cannot predict changes in the market value of the call option and therefore cannot estimate amounts of future mark-to-market non-cash charges associated with the call option or the impact on our earnings.

Impairment Charges

Effective January 1, 2002, we adopted SFAS No. 142, "Accounting for Goodwill and Other Intangible Assets," and SFAS No. 144, "Accounting for the Impairment and Disposal of Long-Lived Assets." As a result of implementing the new standards, we recorded a charge for the first quarter of 2002 of approximately \$749.3 million (net of tax benefit and minority interests), of which \$555.4 million was related to goodwill and \$193.9 million was related to customer accounts.

In addition, in the fourth quarter of 2002 we recorded a \$79 7 million impairment charge, net of tax benefit and minority interests, to reflect the additional impairment of all remaining goodwill of Protection One's North America segment We also recorded a \$36 million impairment charge to reflect the impairment of all remaining goodwill at Protection One Europe. These accounting standards, the related charges and other related information are discussed in Note 23 of the Notes to Consolidated Financial Statements, "Impairment Charges."

Work Force Reductions

During 2002, we reduced our utility work force by approximately 400 employees through a voluntary separation program. We recorded a net charge of approximately \$21 7 million in 2002 related to this program. We have replaced and may continue to replace some of

풙

these employees. For additional information, see Note 29 of the Notes to Consolidated Financial Statements, "Work Force Reductions."

Ice Storm

In late January 2002, a severe ice storm swept through our utility service area causing extensive damage and loss of power to numerous customers. Through December 31, 2002, we incurred \$19.3 million for restoration costs, a portion of which was capitalized. We have deferred and recorded as a regulatory asset on our December 31, 2002 consolidated balance sheet restoration costs of approximately \$15.0 million. We have received an accounting authority order from the KCC that allows us to accumulate and defer for potential future recovery all operating and carrying costs related to storm restoration.

CRITICAL ACCOUNTING POLICIES

Our discussion and analysis of results of operations and financial condition are based upon our consolidated financial statements, which have been prepared in accordance with GAAP. The preparation of consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We evaluate our estimates on an on-going basis, including those related to bad debts, inventories, depreciation, revenue recognition, investments, customer accounts, goodwill, intangible assets, income taxes, pensions, post-retirement and postemployment benefits, decommissioning of Wolf Creek Generating Station (Wolf Creek), environmental issues, contingencies and litigation. We base our estimates on historical expenence and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and habilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Note 2 of the Notes to Consolidated Financial Statements, "Summary of Significant Accounting Policies," provides a summary of the significant accounting policies and methods used in the preparation of our consolidated financial statements. The following is a brief description of the more significant accounting policies and methods used by us.

Regulatory Accounting

We currently apply accounting standards for our regulated utility operations that recognize the economic effects of rate regulation in accordance with SFAS No. 71, "Accounting for the Effects of Certain Types of Regulation," and, accordingly, have recorded regulatory assets and liabilities when required by a regulatory order or based on regulatory precedent.

Regulatory assets represent incurred costs that have been deferred because they are probable of future recovery in customer rates. Regulatory liabilities represent obligations to make refunds to customers for previous collections for costs that are not likely to be incurred in the future We have recorded these regulatory assets and habilities in accordance with SFAS No 71 If we were required to terminate application of SFAS No 71 for all of our regulated

operations, we would have to record the amounts of all regulatory assets and liabilities in our consolidated statements of income at that tume. As of December 31, 2002, this would reduce our earnings by approximately \$351.9 million, net of applicable income taxes.

SFAS No 71 applies to our electric utility business segment. We do not anticipate the discontinuation of SFAS No. 71 in the foreseeable future. See "— Other Information — Electric Utility — Stranded Costs" for additional discussion of the application of SFAS No. 71.

Depreciation

Utility plant is depreciated on the straight-line method at the lesser of rates set by the KCC or rates based on the estimated remaining useful lives of the assets, which are based on an average annual composite basis using group rates that approximated 2.66% during 2002, 3.03% during 2001 and 2.99% during 2000.

In its rate order of July 25, 2001, the KCC extended the estimated service life for certain of our generating assets, including Wolf Creek and the LaCygne 2 generating station, for regulatory rate making purposes. The estimated retirement date for Wolf Creek was extended from 2025 to 2045, although our operating license for Wolf Creek expires in 2025, and the estimated retirement date for LaCygne 2 was extended to 2032, although the term of our lease for LaCygne 2 expires in 2016. On April 1, 2002, we adopted the new depreciation rates as prescribed in the KCC order. We continue to depreciate Wolf Creek over the term of our operating license, and we continue to depreciate LaCygne 2 over the term of our lease. We have created a regulatory asset for the amount that our depreciation expense.

On an annual basis, our depreciation expense will be reduced by approximately \$300 million as a result of these extensions. If our generating license for Wolf Creek is not renewed or the term of our lease for LaCygne 2 is not extended, we will need to seek relief from the KCC to recover the remaining cost of these assets.

Pension Benefit Plans

The reported costs of our pension benefit plans, which include our portion of Wolf Creek Nuclear Operating Corporation's costs, are impacted by the factors listed below.

- Pension costs are impacted by earnings on plan assets, plan amendments, contributions made to the plan and employee demographics (including age, compensation levels and employment periods).
- Pension costs may be significantly affected by changes in actuarial assumptions, including anticipated rates of return on plan assets and discount rates used in determining the projected benefit obligation and pension costs.
- Our 2002 discount rate assumption ranged from 6.50% to 6.75%. Our discount rate was 7.25% in 2001 and ranged from 7.25% to 775% in 2000. When our discount rate assumption decreases, our expense increases
- Our expected rate of return assumption ranged from 9.0% to 9.25%, which is consistent with long-term results of the plans. The return assumption was the same for 2002, 2001 and 2000.

On

The following chart reflects the annual impact of a 0 5% decrease in certain assumptions. If the discount rate increased by 0.5%, the impact would be a similar amount in the opposite direction

	Change in Assumption	Annual Impact on Projected Benefit Obligation	Annual Impact on Pension Liabiilty	Annual Impact on Projected Pension Expense
			(In Millions)	
Discount rate	0 5% decrease	\$22 8	\$16.9	\$1.5
Rate of return on plan assets	0 5% decrease	-	<u> </u>	24

We recorded pension expense of \$5.8 million in 2002 and pension income of \$40 million in 2001. The \$9.8 million increase is due primarily to lower returns on plan assets and an early retirement window that was offered in 2001 and 2002. In 2003 we expect to record approximately \$1.8 million of pension income.

Pension plan assets are primarily made up of equity and fixed income investments. The market value of the plan assets has been affected by declines in equity markets. At December 31, 2002, the fair value of pension plan assets was \$382.3 million. Actual return on plan assets declined by approximately \$2.1 million during 2001 and by approximately \$58.5 million during 2002. Absent a substantial recovery in the equity markets, pension costs, cash funding requirements and the additional pension liability could substantially increase in future years.

See Note 15 of the Notes to Consolidated Financials Statements, "Employee Benefit Plans," for additional information

Revenue Recognition

Energy Sales

Energy sales are recognized as delivered and include an estimate for energy delivered but unbilled at the end of each year Power marketing activities are accounted for under the mark-to-market method of accounting. Under this method, changes in the portfolio value are recognized as gains or losses in the period of change. The net mark-to-market change is included in energy sales in our consolidated statements of income. The resulting unrealized gains and losses are recorded as energy trading assets and liabilities on our consolidated balance sheets.

We primarily use quoted market prices to value our power marketing and energy trading contracts. When market prices are not readily available or determinable, we use alternative approaches, such as model pricing. The market prices used to value these transactions reflect our best estimate of fair values considering various factors, including closing exchange and over-the-counter quotations, time value and volatility factors underlying the commitments. Results actually achieved from these activities could vary materially from intended results and could unfavorably affect our financial results

Monitored Services Revenues

Monitored services revenues are recognized when security services are provided System installation revenues, sales revenues on equipment upgrades and direct and incremental costs of installations and sales are deferred for residential customers with monitoring service contracts For commercial customers, revenue recognition is dependent upon each specific customer contract In instances when the company passes title to a system unaccompanied by a service agreement or the company passes title at a price that it believes is unaffected by an accompanying but undelivered service, the company recognizes revenues and costs in the period incurred. In cases where the company retains title to the system or it prices the system lower than it otherwise would because of an accompanying service agreement, the company defers and amortizes revenues and direct costs.

3

ri.

Deferred system and upgrade installation revenues are recognized over the expected life of the customer utilizing an accelerated method for residential and commercial customers and a straight-line method for Protection One's Multifamily customers. Deferred costs in excess of deferred revenue are recognized over the initial contract term, utilizing a straight-line method, typically two to three years for residential systems, five years for commercial systems and five to ten years for Multifamily systems. To the extent deferred costs are less than deferred revenues, such costs are recognized over the estimated life of the customer relationship.

Deferred revenues also result from customers who are billed for monitoring and extended service protection in advance of the period in which such services are provided, on a monthly, quarterly or annual basis. Revenues from monitoring activities are recognized in the period such services are provided.

Cumulative Effects of Accounting Changes

Accounting for Goodwill and for the Impairment and Disposal of Long-Lived Assets

Effective January 1, 2002, we adopted SFAS No 142 and SFAS No. 144. SFAS No. 142 established new standards for accounting for goodwill. SFAS No. 142 continues to require the recognition of goodwill as an asset, but discontinued amortization of goodwill. In addition, annual impairment tests must be performed using a fairvalue based approach as opposed to an undiscounted cash flow approach required under prior standards.

SFAS No. 144 established a new approach to determining whether our customer account asset is impaired. The approach no longer permits us to evaluate our customer account asset for impairment based on the net undiscounted cash flow stream obtained over the remaining life of goodwill associated with the customer accounts being evaluated. Rather, the cash flow stream used under SFAS No. 144 is limited to future estimated undiscounted cash flows from assets in the asset group, which include customer accounts, the primary asset of the reporting unit, plus an estimated amount for the sale of the remaining assets within the asset group (including goodwill). If the undiscounted cash flow stream from the asset group is less than the combined book value of the asset group, then we are required to mark the customer account asset down to fair value, by way of recording an impairment, to the extent fair value is less than our book value. To the extent net book value is less than fair value, no impairment would be recorded

To implement the new standards, an independent appraisal firm was engaged to help management estimate the fair values of Protection One's and Protection One Europe's goodwill and customer accounts

H

Based on this analysis, we recorded a charge in the first quarter of 2002 of approximately \$749.3 million (net of tax benefit and minority interests), of which \$555.6 million was related to goodwill and \$193.9 million was related to customer accounts.

Accounting for Derivative Instruments and Hedging Activities

Effective January 1, 2001, we adopted SFAS No. 133. We use derivative instruments (primarily swaps, options and futures) to manage interest rate exposure and the commodity price risk inherent in some of our fossil fuel and electricity purchases and sales. Under SFAS No. 133, all derivative instruments, including our energy trading contracts, are recorded on our consolidated balance sheet as either an asset or liability measured at fair value. Changes in a derivatives fair value must be recognized currently in earnings unless specific hedge accounting criteria are met, in which case changes are reflected in other comprehensive income. Cash flows from derivative instruments are presented in net cash flows from operating activities.

Derivative instruments used to manage commodity price risk inherent in fossil fuel and electricity purchases and sales are classified as energy trading contracts on our consolidated balance sheets. Energy trading contracts representing unrealized gain positions are reported as assets; energy trading contracts representing unrealized loss positions are reported as habilities.

Prior to January 1, 2001, gains and losses on our derivatives used for managing commodity price risk were deferred until settlement. These derivatives were not designated as hedges under SFAS No. 133. Accordingly, on January 1, 2001, we recognized an unrealized gain of \$18.7 million, net of \$12.3 million of tax. This gain is presented on our consolidated statement of income in 2001 as a cumulative effect of a change in accounting principle.

After January 1, 2001, changes in fair value of all derivative instruments used for managing commodity price risk that are not designated as hedges are recognized in revenue as discussed above under "— Revenue Recognition — Energy Sales." Accounting for derivatives under SFAS No. 133 will increase volatility of our future earnings.

Revenue Recognition

In the fourth quarter of 2000, we adopted Staff Accounting Bulletin (SAB) No. 101, "Revenue Recognition," which had a retroactive effective date of January 1, 2000 The impact of this accounting change generally required deferral of certain monitored security services sales for installation revenues and direct sales-related expenses. Deferral of these revenues and costs is generally necessary when installation revenues have been received and a monitoring contract to provide future service is obtained.

The cumulative effect of this change in accounting principle was a charge to income in 2000 of approximately \$3.8 million, net of \$1 1 million tax benefit, and is related to changes in revenue recognition at Protection One Europe Prior to the adoption of SAB No 101, Protection One Europe recognized installation revenues and related expenses upon completion of the installation

Accounting Changes

Accounting for Energy Trading Contracts

In October 2002, the Financial Accounting Standards Board (FASB), through the Emerging Issues Task Force (EITF), issued Issue No. 02-03, which rescinded Issue No. 98-10, "Accounting for Contracts Involved in Energy Trading and Risk Management Activities." As a result, all new contracts that would otherwise have been accounted for under Issue No. 98-10 and that do not fall within the scope of SFAS No. 133 can no longer be marked-to-market and recorded in earnings as of October 25, 2002. We are not affected by this change in accounting principle and are not required to reclassify any of our contracts. EITF Issue No. 02-03 also requires that energy trading contracts and derivatives, whether settled financially or physically, be reported in the income statement on a net basis effective January 1, 2003. We began to classify our energy trading contracts on a net basis during the third quarter of 2002.

On July 1, 2002, we began reporting mark-to-market gains and losses on energy trading contracts on a net basis, whether realized or unrealized, in our consolidated income statements. Prior to July 1, 2002, we reported gains on these contracts in sales and losses in cost of sales in our consolidated income statements. The changes are reflected in our consolidated financial statements for the year ended December 31, 2002. Prior periods shown in our consolidated financial statements have been reclassified to reflect the effect of this change and to be comparable as required by GAAP. As a result of the net presentation, we expect significant reductions in our energy revenues and expenses from those reported in prior periods, which will not affect gross profit or net income. A summary of the effects of this change for the years ended December 31, 2002, 2001 and 2000 is as follows:

Changes to Income Statements

Year Ended December 31, 2002	Prior to Reclassifications for Net Presentation	After Reclassifications for Net Presentation
	(în Tho	usands)
Energy sales	\$1,798,971 754,700	\$1,422,899 378,628
Energy gross profit	\$1,044,271	\$1,044,271
Year Ended December 31, 2001	Prior to Reclassifications for Net Presentation	After Reclassifications for Net Presentation
	(în Tho	usands)
Energy sales	\$1,706,311 793,210	\$1,307,177 394,076
Energy gross profit	\$ 913,101	\$ 913,101
Year Ended December 31, 2000	Prior to Reclassifications for Net Presentation	After Reclassifications for Net Presentation
	(In Tho	usands)
Energy sales	\$1,829,133 850,018	\$1,359,522 380,407
Energy gross profit	\$ 979,115	\$ 979,115

2002 WESTAR ENERGY

OPERATING RESULTS

Westar Energy Consolidated

2002 compared to 2001

We reported a loss of \$11.06 per share in 2002 compared to a loss of \$0.31 per share in 2001. This greater loss per share was due primarily to the 2002 impairment charges related to monitored services goodwill and customer accounts. A decline in monitored services revenues also contributed to the loss. Improved results from utility operations and declines in cost of sales and operating expenses and increases in other income from monitored services partially offset these items. For additional information, see the segment discussions below.

2001 compared to 2000

We reported a loss of \$0.31 per share in 2001 compared to earnings of \$1.96 per share in 2000. This decrease resulted from decreased electricity sales caused by milder weather, the decrease in electric rates in accordance with the July 25, 2001 KCC rate order, higher operating losses in our monitored services segment, and the fourth quarter charge related to a work force reduction Additionally, investment earnings and extraordinary gains on the retirement of debt were lower in 2001 than in 2000.

Segments of Business

Our business is segmented based on differences in products and services, production processes and management responsibility We have identified three reportable segments. Electric Utility, Monitored Services and Other.

- Electric Utility consists of our integrated electric utility operations, including the generation, transmission and distribution of power to our retail customers in Kansas and to wholesale customers, and our power marketing activities.
- Monitored Services, including the net effect of minority interests, is composed of our security alarm monitoring businesses in the United States and Europe.
- Other, includes our approximate 45% ownership interest in ONEOK at December 31, 2002, (which was reduced to a 27.5% interest on February 5, 2003), and other investments in the aggregate not material to our business or results of operations

We manage our business segments' performance based on their earnings (losses) before interest and taxes (EBIT) because EBIT is the primary measurement used by our management to evaluate segment performance. Our business managers have direct control over the items that affect the EBIT of their segments and we therefore believe EBIT is an appropriate measure of segment performance. EBIT does not represent cash flow from operations as defined by GAAP, should not be construed as an alternative to operating income and is indicative neither of operating performance nor cash flows available to fund our cash needs items excluded from EBIT are significant components in understanding and assessing our financial performance. Interest expense, income taxes, discontinued operations, cumulative effects of accounting changes and preferred dividends are items that are excluded from the calculation of EBIT. Our computation of EBIT may not be comparable to other similarly utled measures of other companies We provide a reconciliation of EBIT to GAAP income measurements in Note 32 of the Notes to Consolidated Financial Statements, "Segments of Business."

à 3

Electric Utility

We supply electric energy at retail to approximately 647,000 customers in Kansas including the communities of Wichita, Topeka, Lawrence, Manhattan, Salina and Hutchinson. We classify our customers as residential, commercial and industrial as defined in our tanffs. We also supply electric energy at wholesale to the electric distribution systems of 62 Kansas cities and four rural electric cooperatives We have contracts for the sale, purchase or exchange of wholesale electricity with other utilities. In addition, we have power marketing operations that purchase and sell electricity in areas outside our historical service territory.

Regulated electric utility sales are significantly impacted by such things as regulation (including rate regulation), customer conservation efforts, wholesale demand, the overall economy of our service area, the weather and competitive forces. Our wholesale sales are impacted by demand outside our service territory, the cost of fuel and purchased power, price volatility and available generation capacity.

Our electric sales for the three years ended December 31 were as follows:

	2002	2001	2000
		(In Thousands)	
Residential	\$ 442,106	\$ 419,492	\$ 452,674
Commercial	385,375	380,277	367,367
Industrial	242,847	244,392	252,243
Total	1,070,328	1,044,161	1,072,284
Network integration ^{al}	60,132	-	
Other ^{au}	46,693	50,669	49,629
Total retail	1,177,153	1,094,830	1,121,913
and interchange	245,746	212,347	. 237,609
Total	\$1,422,899	\$1,307,177	\$1,359,522

⁶⁰Network Integration: Reflects a new network transmission tariff that requires us to pay to the Southwest Power Pool (SPP) all expenses associated with transporting power from our generating stations. The SPP then pays us for transmitting power to the point of delivery into our retail distribution system These receipts from the SPP are reflected in revenues under the network integration classification For further information, see "--- Other Information -- Electric Utility -- Network Integration Transmission Service" below.

^(h)Other: Includes public street and highway lighting and miscellaneous electric revenues.

The following tables show changes in electric sales volumes, as measured by thousands of megawatt hours (MWh) of electricity we generate, for the three years ended December 31. No sales volumes

30

Ň

are shown for network integration or power marketing because these activities are not related to electricity we generate.

3

Details concerning EBIT and assets attributable to our electric utility segment are summarized in the tables below:

For the years ended December 31,	2002	2001	2000			
	(in Thousands)					
Depreciation and amortization Earnings (losses) before interest and taxes .	\$ 171,749 246,993	\$ 185,156 207,057	\$ 175,839 331,330			
December 31,	2002	2001	2000			
		(In Thousands)				
Identifiable assets	\$5,033,329	\$ 4,932,447	\$ 4,961,240			

2002 compared to 2001: Energy sales increased \$115.7 million, or 9%, due primarily to the \$60 1 million in new network integration tariff revenues (see "— Other Information — Electric Utility — Network Integration Transmission Service"), a \$33.4 million increase in power marketing, wholesale and interchange revenues and a \$27.7 million increase in residential and commercial electric sales revenues. Power marketing, wholesale and interchange revenues increased pnmanly as a result of increased sales volumes, offset by lower wholesale pnces. Favorable weather conditions and a slight increase in the number of utility customers contributed to the increase in residential and commercial electric sales revenues, which were offset by lower retail rates and decreased industrial revenues related to weak economic conditions.

Cost of sales decreased \$15.4 million, or 4%, due primarily to a \$14.6 million decrease in purchased power expense. Purchased power expense decreased due primarily to the increased availability of our generating units and lower prices.

Gross profit increased \$131 2 million, or 14%, for the reasons discussed above This increase in gross profit also reflects the impact of the adoption of SFAS No 133 on January 1, 2001 This new

standard required that we report a \$31.0 million gain in 2001 on certain derivative contracts (derivatives) as a cumulative effect of a change in accounting principle rather than include the gain in gross profit All gains and losses after January 1, 2001 on our derivatives that are not designated as hedges are reflected in gross profit. Had we included the \$31.0 million gain in revenues in 2001, gross profit would have increased \$100.1 million rather than \$131.2 million.

Operating expenses increased \$69.0 million, or 10%, due primarily to the charges associated with the network integration transmission tanff, reserve for potential liabilities to Mr. Wittig and Mr. Lake, employee severance costs related to the work force reduction and the compensation expense associated with an exchange of previously granted restricted share units as discussed in Note 15 of the Notes to Consolidated Financial Statements, "Employee Benefit Plans — Stock Based Compensation Plans." These increases were partially offset by a \$13.4 million decrease in depreciation expense related to the change in depreciation rates as discussed above in "— Critical Accounting Policies — Depreciation." In addition, our maintenance expense declined \$22.6 million, or 19%, due primarily to the lower forced outage rates of our generating units.

2001 compared to 2000: Energy sales decreased \$52.3 million, or 4%. Residential sales declined 7% and power marketing, wholesale and interchange sales declined 11%. Residential sales decreased due to weather conditions and our rate decrease, while power marketing, wholesale and interchange sales decreased because of lower prices and more power available in the market. Cost of sales increased \$13 7 million, or 4%, which was due principally to an increase in our natural gas fuel expenses resulting from the purchase of fuel for new generating units that began operating during 2001.

As a result of the decline in sales and the increase in cost of sales, gross profit decreased \$66.0 million, or 7%. This decline in gross profit also reflects the impact of the adoption of SFAS No. 133 on January 1, 2001. This new standard required that we report a \$31.0 million gain on certain derivatives as a cumulative effect of a change in accounting principle rather than include the gain in gross profit. Had we been permitted to classify this accounting change as an increase to revenues, gross profit would have declined by \$35.0 million rather than \$66.0 million.

Operating expenses increased \$45.7 million due primarily to recording approximately \$8.7 million of costs associated with the terminated Public Service Company of New Mexico merger transaction, approximately \$14.3 million in employee-severance costs related to the 2001 work force reductions, an increase in our pension and benefit expenses and an increase in general maintenance expenses

Monitored Services

Protection One and Protection One Europe comprise our monitored services business segment. The results discussed below reflect monitored services on a stand-alone basis. These results take into consideration Protection Orie's minority interest of approximately 12% at December 31, 2002, 13% at December 31, 2001, and 15% at December 31, 2000. As discussed above, our monitored services operations will be reported as discontinued operations as required by of SFAS No. 144 during the first quarter of 2003

Details concerning EBIT and assets attributable to our monitored services segment are as follows:

For the years ended December 31,	2002	2001	2000
		(in Thousands)	
Sales	\$347,967	\$ 408,330	\$ 529,584
Depreciation and amortization	98,111	225,133	245,297
Losses before interest and taxes	369,848	77,074	5,678
December 31,	2002	2001	2000
		(In Thousands)	
Identifiable assets	\$638,936	\$1,883,786	\$2,175,706

â

2002 compared to 2001: Sales decreased \$60.4 million due primanly to a decline in the average customer base and the renewal of existing customers for extended contract periods with a lower monthly rate. The monitored services segment experienced a net decline of 62,656 customers in 2002, which is attributable primarily to customer attrition. Although net customers decreased for the year, Protection One had a favorable decline in attrition in 2002 compared to 2001 due to the reasons discussed in "— Other Information — Monitored Services — Attrition" below

Protection One expects that the decline in its customer base will continue until the efforts it is making to generate new accounts and reduce attrition become more successful than they have been to date. Until it is able to reverse this trend, net losses of customer accounts will materially and adversely affect its business, financial condition and results of operations. For 2003, Protection One's focus is on improving returns on invested capital by realizing economies of scale from increasing customer density in the largest urban markets in the United States It plans to accomplish this by improving customer retention. See "— Other Information — Monitored Services — Attintion" below for additional information

Cost of sales decreased \$11.9 million due primarily to a reduction of telecommunication costs and consolidation of Protection One's monitoring functions. Operating expenses increased \$310.4 million due primarily to the 2002 impairment charges. Partially offsetting the increase in operating expenses was a decline in depreciation and amortization expense, which reflects a reduction in customer account amortization related to the impairment charges and elimination of goodwill amortization due to the implementation of SFAS No. 142. Also partially offsetting the increase in operating expenses were reductions in professional fees and outside services because of the completion of system integration projects and lower legal costs, a decrease in wage expense because of consolidation efforts, and a decline in bad debi expense and collection costs

As a result of the decline in gross profit and the increase in operating expenses, loss before interest and taxes increased \$292.8 million

Monitored services' total assets decreased approximately \$1.2 billion primarily as a result of the impairment of goodwill and customer account assets.

2001 compared to 2000: Sales decreased \$121.3 million due primarily to a decline in the monitored services segment's average customer base and the disposition of certain operations. The monitored services segment experienced a net decline of 272,549. customers in 2001. This decrease in customers is attributable primarily to customer attrition and a decrease of 63,875 customers due to the disposition of operations. Additionally, the number of Protection One customers declined by 62,443 customers due to the conversion of accounts to a common billing and monitoring system. This new system reports number of customer accounts on the basis of one customer for every location provided service even if Protection One has separate contracts to provide multiple services at a given location. Previous systems utilized a number of different billing and monitoring software programs, some of which would count each separate contracted service as a separate account regardless of location

Loss before interest and taxes increased \$71.4 million due primarily to the decrease in sales. Cost of sales decreased \$41.7 million due primarily to the discontinuation of Protection One's patrol services in May 2001, consolidation of Protection One's telecommunications facilities, a reduction of Protection One's telecommunications expense, consolidation of monitoring and customer service functions and the decline in customer accounts caused by dispositions of operations and attition See "--- Other Information --- Monitored Services --- Attrition" below for additional information.

Other

Other includes an approximate 45% interest in ONEOK at December 31, 2002, and other investments in the aggregate not material to our business or results of operations. Details concerning EBIT attributable to this segment are as follows:

For the years ended December 31,	2002	2001	2000	
		(In Thousands)		
Sales	\$ 252	\$ 1,359	\$ 1,484	
Depreciation and amortization	58	364	2,116	
Earnings (losses) before interest and taxes	68,491	23,936	169,211	
December 31,	2002	2001	2000	
		(in Thousands)		
Identifiable assets	\$770,834	\$816,919	\$664,774	

2002 compared to 2001: Sales shown above are from a paging services business that was sold in the first quarter of 2002. EBIT increased approximately \$44.6 million primarily as a result of greater investment earnings, which increased \$32.8 million as a result of the receipt of a one-time payment of approximately \$14.2 million related to a partial recovery of an investment and the \$11.1 million write down in 2001 of the cost basis to the fair value of certain securities held for investment. We also had a \$16.3 million decline on the loss on the extinguishment of debt

2001 compared to 2000: EBIT decreased approximately \$145.3 million due to various events affecting investment earnings in 2001 and 2000 investment earnings in 2001 included \$41.8 million of ONEOK investment income and a \$5.3 million gain related to the sale of an

investment These earnings were reduced by an \$11.1 million write down in 2001 of the cost basis to the fair value of certain securities held for investment and other investments. Investment earnings in 2000 included \$45.3 million of ONEOK investment income, a \$91.1 million gain from the sale of our investment in a gas compression company, a \$9.6 million gain related to an investment and a \$24.9 million gain from the sale of investments in paging companies.

WESTAR ENERGY CONSOLIDATED

The following discussion addresses changes in other items affecting net income for the years ended December 31, 2002, 2001 and 2000.

Interest Expense

2002 compared to 2001

Interest expense increased \$8.5 million due primarily to higher interest rates. In 2002, we refinanced short-term debt with long-term debt issued at interest rates higher than the interest rate on the short-term debt. The weighted average interest rate on debt outstanding increased to 6.34% at December 31, 2002 from 3.43% at December 31, 2001.

2001 compared to 2000

Interest expense decreased \$20.7 million due to lower interest rates and lower outstanding debt at Protection One The weighted average interest rate on our \$500 million revolving credit facility that was retired with proceeds from the May 10, 2002 and June 6, 2002 debt refinancings declined to 3.43% at December 31, 2001 from 8 11% at December 31, 2000.

Income Taxes

2002 compared to 2001

Income taxes decreased \$89 3 million in 2002 compared to 2001. This was due primanly to the increased loss before income taxes and flow through tax benefits associated with our security business. Our overall effective tax rate changed from a 64.0% benefit in 2001 to a 48.7% benefit in 2002. The change in our effective tax rate was due primanly to decreased earnings before income taxes and flow through tax benefits associated with our security business, including minority interest share of tax benefits and goodwill impairment. Other flow through tax benefits from dividends received, low income housing tax credits, the amortization of prior years' investment tax credits, tax reserve adjustment and the tax benefits from corporate owned life insurance contributed to this change in the effective tax rate.

2001 compared to 2000

Income taxes decreased \$140.7 million in 2001 compared to 2000. This was due primarily to having a loss before income taxes in 2001 Our overall effective tax rate changed from a 33.9% expense in 2000 to a 64.0% benefit in 2001. The change in our effective tax rate was due primarily to having a loss before income taxes in 2001. The tax benefit from having a loss, combined with flow through net tax benefits from dividends received, low income housing tax credits, the amortization of prior years' investment tax credits, the amortization of non-deductible goodwill, the effect of state income taxes and the tax benefits from corporate owned life insurance created this swing in the effective tax rate

LIQUIDITY AND CAPITAL RESOURCES

Overview

We beheve we will have sufficient cash to fund future operations of our business, debt reductions, including the annual \$100 million debt reductions in 2003 and 2004 ordered by the KCC, and the payment-of-dividends, from a <u>combination of</u> cash on hand, cash flow, proceeds from the sales of our non-utility and non-core assets and available borrowings under our revolving credit facility. Uncertainties affecting our ability to meet these requirements include, among others, the factors affecting sales described above, economic conditions, including the impact of inflation on operating expenses, regulatory actions, including the KCC orders received in the last quarter of 2002 and first quarter of 2003, our ability to implement the Debt Reduction Plan, compliance with future environmental regulations and the impact of our monitored services' operations and financial condition.

As of December 31, 2002, our total outstanding long-term debt was approximately \$3.4 billion, of which approximately \$3.0 billion was the obligation of our utility operations. In addition, as of December 31, 2002, our long-term habilities included \$214.5 million related to outstanding mandatorily redeemable preferred securities. This large amount of indebtedness could have a negative impact on, among other things, our ability to obtain additional financing in the future for working capital, capital expenditures and general corporate purposes and our ability to withstand a downturn in our business or the economy in general.

At December 31, 2002, current maturities of long-term debt increased \$148.8 million from 2001 due primarily to the upcoming maturities of the Kansas Gas and Electric Company (KGE) 7.6% first mortgage bonds that are due December 15, 2003 and the putable/callable notes due on August 15, 2003. We have irrevocably deposited with the bond trustee funds sufficient to provide for the future principal and interest payments on these 7.6% first mortgage bonds.

Capital Resources

We had \$123 million in cash and cash equivalents at December 31, 2002. We consider cash equivalents to be highly liquid investments with a maturity of three months or less when purchased. At December 31, 2002, we also had \$159 million of restricted cash classified as a current asset and \$35.8 million of restricted cash classified as a long-term asset. The following table details our restricted cash as of December 31, 2002:

	Restricted Cash Current Portion	Restricted Cash Long-term Portion	
	(In Tho	usands)	
Funds in trust for debt repayments	\$145,260	s —	
Protection One worker's compensation	2,615	_	
Prepaid capacity and transmission agreement	2,110	30,161	
Collateralized letters of credit		3,400	
Collateralized surety bonds Cash held in escrow as required by certain letters	-	2,199	
of credit and various other deposits	9,021	-	
Total	\$159,006	\$ 35,760	

We had \$149 million of available borrowings under our revolving credit facility at December 31, 2002

The Debt Reduction Plan provides for a systematic disposal of our non-utility and non-core assets and, if necessary, a sale of our equity. The proceeds of these transactions will be used to reduce debt. We may reduce debt pursuant to terms stated in the debt agreements or through open market purchases or tender offers. We may engage a financial advisor to assist in completing debt repurchases in the most cost-effective manner

We have registered debt securities for sale with the SEC. As of December 31, 2002, these included \$400 million of unsecured senior notes, \$500 million of our first mortgage bonds, and \$50 million of KGE first mortgage bonds. Any issuance of debt would require that we seek KCC approval.

The Westar Energy mortgage prohibits additional first mortgage bonds from being issued (except in connection with certain refundings) unless Westar Energy's unconsolidated net earnings available for interest, depreciation and property retirement (which as defined, does not include earnings or losses attributable to the ownership of securities of subsidianes), for a period of 12 consecutive months within 15 months preceding the issuance, are not less than the greater of twice the annual interest charges on, and 10% of the principal amount of, all first mortgage bonds outstanding after giving effect to the proposed issuance. In addition, the issuance of bonds is subject to limitations based upon the amount of bondable property additions. As of December 31, 2002, \$70.4 million principal amount of additional first mortgage bonds could be issued under the most restrictive provisions in the mortgage, except in connection with refundings.

KGE's mortgage prohibits additional first mortgage bonds from being issued (except in connection with certain refundings) unless KGE's net earnings before income taxes and before provision for retirement and depreciation of property for a penod of 12 consecutive months within 15 months preceding the issuance are not less than either two and one-half times the annual interest charges on, or 10% of the principal amount of, all KGE first mortgage bonds outstanding after giving effect to the proposed issuance. In addition, the issuance of bonds is subject to limitations based upon the amount of bondable property additions. As of December 31, 2002, approximately \$302 5 million principal amount of additional KGE first mortgage bonds could be issued under the most restrictive provisions in the mortgage

We may from time to time issue equity securities in private transactions and public offerings. We have approximately 11.2 million shares of common stock registered for sale with the SEC.

Cash Flows from (used in) Operating Activities

Our primary sources of operating cash flows are the operations of our electric utility and monitored services businesses and dividends from our ONEOK investment. Cash flows from operating activities increased \$154 4 million to \$372.7 million in 2002, from \$218 3 million in 2001. This increase is mostly attributable to an approximate \$131 2 million increase in utility gross margin for 2002 compared to 2001.

Cash flows from operating activities decreased \$252.5 million to \$218.3 million in 2001, from \$470.8 million in 2000. This decrease is mostly attributable to changes in our working capital. Operating cash flows in 2001 also decreased due to the continued declines in Protection One's and Protection One Europe's customer bases, which reduced our recurring monthly cash flow stream Operating cash flows also decreased in 2001 as we purchased additional coal to restock our inventory from the levels that existed in December 2000

Cash Flows from (used in) Investing Activities

In general, cash used for investing purposes relates to the growth and maintenance of the operations of our electric utility and monitored services businesses. The utility business is capital intensive and requires significant investment in plant on an annual basis. We spent \$126.8 million in 2002, \$227.0 million in 2001 and \$285.4 million in 2000 on net additions to utility property, plant and equipment, which included \$52 2 million in 2001 and \$87.7 million in 2000 for new generation facilities. We did not construct any new generation facilities in 2002. The monitored services business also requires significant capital related to the generation of customer accounts. Investment in customer accounts amounted to \$43.4 million in 2002, \$23.1 million in 2001 and \$45.7 million in 2000.

Investing cash flows were also impacted significantly by dispositions of monitored services businesses and the sale of marketable securities. These activities provided cash of \$16.8 million in 2002, \$50.8 million in 2001 and \$218.6 million in 2000.

Cash Flows from (used in) Financing Activities

We used \$203.6 million of net cash flows in 2002 for financing activities compared to net cash flows from financing activities of \$22 million in 2001, primarily due to the debt refinancings completed during 2002 In 2001, an increase in short-term debt was the principal source of cash flows from financing activities. Cash from financing activities was used to fund the retirement of long-term debt, deposits to the trustee to provide for repayment of an obligation, the acquisition of treasury stock, and the payment of dividends on our common stock. In 2000, we reduced our indicated annual dividend from \$2.14 per share to \$1.20 per share. This reduction, and continued reinvestment of dividends by our shareholders through the dividend reinvestment program, resulted in a significant reduction in our net cash dividend requirements.

Future Cash Requirements

The November 8, 2002 KCC order requires us to reduce debt by \$100 million annually in each of the next two years from internally generated cash flow. While we believe we can generate this level of internally generated cash flow, if we fail to meet this requirement, the KCC may, among other things, require us to reduce or eliminate our

dividend or issue equity securities In the Debt Reduction Plan, we anticipate meeting the \$100 million debt reduction goal.

We have a potential obligation to make a cash payment related to the call option associated with our putable/callable notes. See "---Summary of Significant Items --- Call Option" above for additional information.

Our business requires significant capital investments Through 2005, we expect we will need cash mostly for ongoing utility construction and maintenance programs designed to maintain and improve facilities providing electric service We do not anticipate needing additional generating capacity through 2005.

Capital expenditures for 2002 and anticipated capital expenditures for 2003 through 2005 are as follows

	Electric Utility	Monitored Services	Totai
		(in Thousands)	
2002	\$126,763	\$51,998	\$178,761
2003	150,600	35,560	186,160
2004	175,600	36,580	212,180
2005	160,400	40,580	200,980

These estimates are prepared for planning purposes and will be revised from time to time as discussed in Note 2 of the Notes to Consolidated Financial Statements, "Summary of Significant Accounting Policies." Actual expenditures will differ from our estimates.

Maturties of long-term debt as of December 31, 2002 are as follows:

Year				Principal Amount
				 (In Thousands)
2003 ⁶⁰ ⁶⁰ 2004 ⁶⁰ 2005 2006 2007 Thereafter	• • •			 \$ 316,736 302,132 858,964 110,676 755,855 1,030,696 \$3,375,059

^(a)Includes \$135 million in debt for which funds have been irrevocably deposited with the bond trustee to provide for repayment of the obligation.

⁶⁰ In addi n, we are required to reduce utility debt by at least \$100 million annually in each of the next two years as ordered by the KCC.

Contractual Obligations and Commercial Commitments

In the course of our business activities, we enter into a variety of contractual obligations and commercial commitments. Some of these result in direct obligations that are reflected in our consolidated balance sheets while others are commitments, some firm and some based on uncertainties, that are not reflected in our underlying consolidated financial statements. The obligations listed below do not include amounts for on-going needs for which no contractual obligations existed as of December 31, 2002, and represent only amounts that we were contractually obligated to meet as of December 31, 2002.

Contractual Cash Obligations

The following table summarizes the projected future cash payments for our contractual obligations existing at December 31, 2002:

	Total	2003	2004 - 2005	2006 - 2007	Thereafter
Contractual Obligation			(In Thousands)		
Long-term debt excluding capital leases ^{to}	\$ 3,347,703	\$310,642	\$1,148,982	\$ 857.383	\$1,030,696
Capital leases	30,633	5,581	10,849	10,186	4,017
Restricted cash deposited with the trustee for		5,501	10,045	10,100	1017
defeasance ⁶⁴	(135,000)	(135,000)			
Adjusted

Total contractual obligations, including adjusted					
long-term debt	\$6,191,434	\$525,236	\$1,578,649	\$ 1,266,167	\$2,821,382

^(a)See Note 12 of the Notes to Consolidated Financial Statements, "Long-Term Debt," for individual long-term debt maturities.

⁶⁰See "--- Future Cash Requirements" above for a description of funds that have been irrevocably deposited with the bond trustee for repayment of debi

⁶³We have an obligation to reduce debt by \$100 million annually in 2003 and 2004

Long-term debt: Our long-term debt existing as of December 31, 2002 is debt that has a final maturity of January 1, 2003 or later (including current maturities of long-term debt) See Note 12 of the Notes to Consolidated Financial Statements, "Long-Term Debt," for detailed information.

Capital leases: We maintain capital leases in the ordinary course of our business activities. These leases primarily include those for vehicles and equipment. See Note 25 of the Notes to Consolidated Financial Statements, "Leases," for additional information.

Operating leases: We maintain operating leases in the ordinary course of our business activities. These leases include those for office space, operating facilities, office equipment and operating equipment. These leases have various terms and expiration dates from 1 to 16 years. See Note 25 of the Notes to Consolidated Financial Statements, "Leases," for additional information.

Fossil fuel: To supply a portion of the fossil fuel requirements for our generating plants, we have entered into various commitments to obtain and deliver coal and for natural gas transportation. Some of these contracts contain provisions for price escalation and minimum purchase commitments. For additional information, see Note 17 of the Notes to Consolidated Financial Statements, "Commitments and Contingencies — Fuel Commitments."

Nuclear fuel: To supply a portion of the fuel requirements for Wolf Creek, we have entered into various commitments to obtain nuclear fuel consisting of uranium concentrates, conversion and enrichment. See Note 17 of the Notes to Consolidated Financial Statements, "Commitments and Contingencies — Fuel Commitments," for more details.

Call option on putable/callable notes: For information concerning a potential liability under the call option related to the issuance of \$400 million of our putable/callable notes, see Note 14 of the Notes to Consolidated Financial Statements, "Call Option."

Unconditional purchase obligations: We use purchase obligations as part of our ongoing utility operations and construction program Protection One's unconditional purchase obligations represent its contract tariff for telecommunication services. See Note 17 of the Notes to Consolidated Financial Statements, "Commitments and Contingencies — Purchase Orders and Contracts," for additional information.

Commercial Commitments

The following table summarizes our commercial commitments by date of expiration existing at December 31, 2002:

Commercial Commitments	Total	2003	2004 - 2005	2006 - 2007	Thereafter
			(in Thousands)		
Lines of credit . Outstanding letters	\$ 1,000	s –	\$1,000	s —	s –
of credit	9,859	8,509	150		1,200
Guarantees	1,344	162	352	393	437
Total commercial commitments .	\$12,203	\$8,671	\$1,502	\$ 393	\$1,637

Lines of credit: Certain banks provide us a revolving credit facility on a committed basis totaling \$150 million. As of December 31, 2002, borrowings on the revolving credit facility were \$1.0 million, leaving \$149 million remaining under this facility. In addition, we have a commitment to Protection One for a line of credit of up to \$228.4 million. As of March 14, 2003, Protection One had borrowed \$215.5 million under this facility, resulting in an undrawn commitment of \$12.9 million. This commitment is eliminated in consolidation and is therefore not included in the table above.

Outstanding letters of credit: We obtain letters of credit in the ordinary course of our operating activities for energy trading, worker's compensation, an aircraft lease and surety bonds. As of December 31, 2002, we had outstanding letters of credit of \$1.2 million related to our power marketing and trading activities and \$8 7 million related to other operating activities

Guarantees: In 1998, we issued a financial guarantee of an obligation of Onsite Energy Corporation under which our maximum liability

was \$1 3 million This guarantee was released in the first quarter of 2003.

Debt Covenants

Our debt financing agreements require, among other restrictions, that we satisfy certain financial covenants. These debt instruments contain restrictions based on EBITDA. The definition of EBITDA varies among the various indentures. EBITDA is generally derived by adding to income (loss) before income taxes, the sum of interest expense and depreciation and amortization expense. However, under the varying definitions of the indentures, additional adjustments are required A violation of these restrictions would result in an event of default that would allow the lenders to declare all amounts outstanding immediately due and payable. We are in compliance with these covenants. The most restrictive of these covenants in Westar Energy's debt instruments are as follows:

- Consolidated Leverage Ratio: Consolidated total debt to earnings before interest, taxes, depreciation and amortization (EBITDA) for the most recent four consecutive quarters must be less than 6.00 to 1.00 at December 31, 2002 and 5.75 to 1.00 each quarter thereafter until June 2005. At December 31, 2002, our ratio was 5.13.
- Consolidated Interest Coverage Ratio: EBITDA to consolidated interest expense for the most recent four consecutive quarters must be greater than 2.00 to 1.00. At December 31, 2002, our rano was 2.54.
- Consolidated Debt to Total Capital Ratio: Consolidated total debt to consolidated total capital for the most recent quarter must be less than 0.65 to 1.00. At December 31, 2002, our ratio was 0.618.

The indentures governing Protection One's public indebtedness require it to satisfy certain financial covenants in order to borrow additional funds. At December 31, 2002, Protection One was in compliance with the covenants under its debt instruments. The most restrictive of these covenants in Protection One's debt instruments are as follows:

- Total Debt to EBITDA Ratio: Total debt to annualized EBITDA for the most recent quarter must be less than 6 0 to 1.0. For the quarter ended December 31, 2002, the ratio was 4.0 to 1.0.
- EBITDA to Interest Expense Ratio: EBITDA to interest expense for the most recent quarter must be greater than 2.25 to 1.0. For the quarter ended December 31, 2002, the ratio was 3.1 to 1.0.
- Senior Debt to EBITDA Ratio: Senior debt to annualized EBITDA for the most recent quarter must be less than 4.0 to 1.0. For the quarter ended December 31, 2002, the ratio was 2.9 to 1.0.

The indentures contain other covenants that impose operational restrictions on Protection One that are not as burdensome to Protection One as those listed above, and none are based on credit ratings A violation of the indenture covenants would result in an event of default that would allow the lenders to declare all amounts outstanding immediately due and payable.

Following a change of control of Protection One, its revolving credit facility provided by Westar Industnes becomes due in full. The holders of Protection One's senior subordinated discount notes and convertible notes have an optional redemption at approximately 101% of par, and holders of Protection One's senior notes and senior subordinated notes have an optional redemption at 101% of par if a change in control is coupled with two ratings downgrades 御気

Sale of Accounts Receivable

On July 28, 2000, Westar Energy and KGE entered into an agreement under which we transfer an undivided percentage ownership interest in a revolving pool of our accounts receivable ansing from the sale of electricity to a multi-seller conduit administered by an independent financial institution through the use of a special purpose entity (SPE). We account for this transfer as a sale in accordance with SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities." The agreement was amended on July 25, 2002 and is annually renewable upon agreement by all parties. The amendment to the agreement extended the term until July 23, 2003 and limited the amount of the accounts receivable we had a right to sell during certain periods to \$125 million.

Under the terms of the agreement, Westar Energy and KGE may transfer accounts receivable to the bankruptcy-remote SPE, and the conduit must purchase from the SPE an undivided ownership interest of up to \$125 million in those receivables. The SPE has been structured to be legally separate from us, but it is wholly owned and consolidated. The percentage ownership interest in receivables purchased by the conduit may increase or decrease over time, depending on the characteristics of the SPE's receivables, including delinquency rates and debtor concentrations.

Under the terms of the agreement, the conduit pays the SPE the face amount of the undivided interest at the time of purchase. Subsequent to the initial purchase, additional interests are sold and collections applied by the SPE to the conduit, resulting in an adjustment to the outstanding conduit interest.

We record administrative expense on the undivided interest owned by the conduit, which was \$2.9 million for the year ended 2002, \$5.4 million for the year ended 2001 and \$3.7 million for the year ended 2000. These expenses are included in other income (expense) in our consolidated statements of income.

The outstanding balance of SPE receivables was \$48.2 million at December 31, 2002 and \$43.3 million at December 31, 2001, which is net of an undivided interest of \$110.0 million and \$100.0 million, respectively, in receivables sold by the SPE to the conduit. Our retained interest in the SPE's receivables is reported at fair value and is subordinate to, and provides credit enhancement for, the conduit's ownership interest in the SPE's receivables. Our retained interest is available to the conduit to pay any fees or expenses due to the conduit and to absorb all credit losses incurred on any of the SPE's receivables. The retained interest is included in accounts receivable, net, in our consolidated balance sheets.

A termination event will be triggered under the terms of the agreement if Westar Energy's credit rating ceases to be at least BB- by Standard & Poor's Ratings Group (S&P) or if the issuer credit rating for Westar Energy ceases to be at least Ba3 by Moody's Investors Service (Moody's). If a termination event were to occur, the administrative agent would be required to give notice to us at least five business days prior to a termination of the facility. This notice provision allows for the administrative agent to waive the termination event by not giving notice or, in the event notice is given, allows us to repay the facility

Refinancings

On May 10, 2002, we completed offerings for \$365 million of our first mortgage bonds and \$400 million of our unsecured senior notes, both of which will be due on May 1, 2007. The first mortgage bonds bear interest at an annual rate of 7 7/8% and the unsecured senior notes bear interest at an annual rate of 9 3/4%. Interest on the first morigage bonds and unsecured senior notes is payable semi-annually on May 1 and November 1 of each year. The net proceeds from these offerings were used to repay outstanding indebtedness of \$547 million under our existing secured bank term loan, provide for the repayment of \$100 million of our 7.25% first mortgage bonds due August 15, 2002 together with accrued interest, reduce the outstanding balance on our existing secured revolving credit facility and pay fees and expenses of the transactions In conjunction with our May 10, 2002 financing, we amended our secured revolving credit facility to reduce the total commitment under the facility to \$400 million from \$500 million and to release \$100 million of our first mortgage bonds from collateral.

On June 6, 2002, we entered into a secured credit agreement providing for a \$585 million term loan and a \$150 million revolving credit facility, each maturing on June 6, 2005, provided that if we have not refinanced or provided for the payment of our putable/ callable notes due August 15, 2003, or our 6.875% senior unsecured notes due August 1, 2004, at least 60 days prior to either of the respective due dates, the maturity date is the date 60 days prior to either of the respective due dates. All loans under the credit agreement are secured by KGE's first mortgage bonds. The proceeds of the term loan were used to reture an existing \$400 million revolving credit facility with an outstanding principal balance of \$380 million, to provide for the repayment at matunty of \$135 million principal amount of KGE first mortgage bonds due December 15, 2003 together with accrued interest, to repurchase approximately \$45 million of our outstanding unsecured notes and to pay customary fees and expenses of the transactions.

Interest Rate Swap

Effective October 4, 2001, we entered into a \$500 million interest rate swap agreement with a term of two years. At that time, the effect of the swap agreement was to fix the annual interest rate on the term loan at 6.18%. In June 2002, we refinanced the term loan associated with this swap, which increased the effective rate of the swap to 6.43%. At December 31, 2002, the variable rate in effect for the term loan was 4.40%. Changes in the fair value of this cash flow hedge are due to fluctuations in the variable interest rate.

Capital Structure

Our consolidated capital structure at December 31, 2002 and 2001 was as follows:

	2002	2001
Shareholders' equity	22 %	36 %
Preferred stock	1	1
Western Resources obligated mandatorily redeemable preferred securities of subsidiary trusts, holding solely		
company subordinated debentures	5	4
Long-term debt, net	72	59
Total	100 %	100 %

Dividend Policy

Our board of directors reviews our common stock dividend policy from time to time Among the factors the board of directors considers in determining dividend policy are earnings, cash flows, capitalization ratios, regulation, including the KCC's order requiring us to reduce our outstanding debt, competition and financial loan covenants. In February 2003, we declared a first-quarter 2003 dividend of \$0.19 per share. Our Articles of Incorporation restrict the payment of dividends or the making of other distributions on our common stock while any preferred shares remain outstanding unless certain capitalization ratios and other conditions are met. See Note 20 of the Notes to Consolidated Financial Statements, "Common Stock, Preferred Stock and Other Mandatorily Redeemable Securities," for a description of these provisions We do not expect these restrictions to have an impact on our ability to pay dividends on our common stock at the current rate.

Debt Repurchase Plans

Protection One may, from time to time, purchase its debt and equity securities in the open market or through negotiated transactions. We may also purchase our debt. The timing, terms of such purchases and amount of debt actually purchased will be determined based on KCC orders, market conditions and other factors.

Equity Issuance Plans

We may, from time to time, issue equity securities.

Credit Ratings

S&P, Moody's and Fitch Investors Service (Fitch) are independent credit-rating agencies that rate our debt securities. These ratings indicate the agencies' assessment of our ability to pay interest and principal on our securities

On April 2, 2002, Moody's downgraded its ratings on Protection One's outstanding securities with the outlook remaining negative. On April 29, 2002, Moody's confirmed our ratings with a negative outlook. On January 29, 2003, Fitch revised our and KGE's Rating Watch status from evolving to negative, but on March 11, 2003, Fitch affirmed its ratings for us and KGE and removed the ratings from Rating Watch Negative. Following the filing of the Debt Reduction Plan with the KCC, S&P affirmed its ratings for us and KGE and removed all ratings from CreditWatch Negative, changing such designation to CreditWatch Developing on February 6, 2003.

As of March 14, 2003, ratings wi	th t	hese ag	gencies are	: as fo	llows:
----------------------------------	------	---------	-------------	---------	--------

		Westar Energy Mortgage Bond Rating	Westar Energy Unsecured Debt	KGE Mortgage Bond Rating	Protection One Senior Unsecured Debt	Protection One Senior Subordinated Unsecured Debt
S&P		BBB-	BB-	BB+	B	CCC+
Fitch .		BB+	BB-	BB+	CCC+	CCC-
Moody's		Bal	Ba2	Ba1	Caal	Caa3

In general, declines in our credit ratings make debt financing more costly and more difficult to obtain on terms that are economically favorable to us Westar Energy and KGE do not have any credit rating conditions in any of the agreements under which our debt has been issued, except for conditions in the agreements governing the sale of our accounts receivable discussed above

OTHER INFORMATION

Electric Utility

Potential Sale of Utility Assets

On October 14, 2002, we announced an agreement with Midwest Energy, Inc. (Midwest Energy) for the sale to Midwest Energy of a portion of our transmission and distribution assets and rights to provide service to customers in an area of central Kansas. The sale will affect about 10,000 customers, or about 1.5% of our total customers, over 895 square miles. The area, which includes 42 towns, is on the west edge of our service territory and is largely surrounded by Midwest Energy's existing territory The proposed sale is contingent upon approval by the KCC and FERC. KCC hearings have been scheduled to begin on May 20, 2003 We can give no assurance as to when or if this transaction will occur. From time to time we may consider similar transactions.

City of Wichita Franchise

KGE's franchise with the City of Wichita to provide retail electric service is effective through December 1, 2003. We are currently negotiating with the City of Wichita for a long-term franchise agreement. There can be no assurance that we can successfully renegotiate the franchise with terms similar, or as favorable, as those in the current franchise. Under Kansas law, KGE will continue to have the right to serve the customers in Wichita following the expiration of the franchise. Customers within the Wichita metropolitan area account for approximately 21% of our total energy sales volumes.

Network Integration Transmission Service

Effective January 1, 2002, we began taking Network Integration Transmission Service under the SPP's Open Access Transmission Tariff. This provides a cost-effective way for us to participate in a broader market of generation resources with the possibility of lower transmission costs. This tariff provides for a zonal rate structure, whereby transmission customers pay a pro rata share, in the form of a reservation charge, for the use of the facilities for each transmission owner that serves them. As a result, the SPP has operational control over our transmission system, although we still own our transmission assets and maintain responsibility for dispatching, maintenance and storm restoration.

Currently, all revenues collected within a zone are allocated back to the transmission owner serving the zone. Since we are a transmission provider for our zone and are currently the only transmission customer taking service from that zone, we are currently being assessed 100% of the zonal costs and receiving all of the costs back as revenue, less servicing fees. In 2002, these network integration transmission costs were approximately \$65.9 million, and the associated revenues were approximately \$60.1 million, for a net expense of approximately \$5.8 million. The revenues received are reflected in electric operating revenues, and the related charges are expensed.

Stranded Costs

Stranded costs for a utility business are commitments or investments in, and carrying costs on, property, plant and equipment, and other regulatory assets that exceed the amount that can be recovered in a competitive market. We currently apply accounting standards that recognize the economic effects of rate regulation and record regulatory

Ο

Ø

ŝ

洞

assets and habilities related to our electric utility operations. If we determine that we no longer meet the criteria of SFAS No. 71, we may have a material non-cash charge to earnings. Reasons for discontinuing SFAS No. 71 accounting treatment include increasing competition that restricts our ability to charge prices needed to recover costs already incurred or a significant change by regulators from a cost-based rate regulation to another form of rate regulation. We periodically review SFAS No. 71 criteria and believe our net regulatory assets, including those related to generation, are probable of future recovery. If we discontinue SFAS No. 71 accounting treatment based upon competitive or other events, such as successful municipalization by areas we serve, the value of our net regulatory assets and our utility plant investments, particularly Wolf Creek, may be significantly impacted

Regulatory changes could adversely impact our ability to recover our investment in these assets. As of December 31, 2002, we have recorded regulatory assets that are currently subject to recovery in future rates of approximately \$360.3 million Of this amount, \$198 9 million is a receivable for income tax benefits previously passed on to customers The remainder of the regulatory assets are items that may give rise to stranded costs, including debt issuance costs, deferred employee benefit costs, deferred plant costs and coal contract settlement costs

2504412089

廨

In a competitive environment, we may not be able to fully recover our entire investment in Wolf Creek. KGE presently owns 47% of Wolf Creek We may also have stranded costs from an inability to recover our environmental remediation costs and long-term fuel contract costs in a competitive environment. If we determine that we have stranded costs and we cannot recover our investment in these assets, our future net utility income will be lower than our historical net utility income has been unless we compensate for the loss of such income with other measures.

EPA New Source Review

The Environmental Protection Agency (EPA) is conducting an enforcement initiative at a number of coal-fired power plants in an effort to determine whether modifications at those facilities were subject to New Source Review requirements or New Source Performance Standards under the Clean Air Act The EPA has requested information from us under Section 114(a) of the Clean Air Act (Section 114). A Section 114 information request requires us to provide responses to specific EPA questions regarding certain projects and maintenance activities that the EPA believes may have violated the New Source Performance Standard and New Source Review requirements of the Clean Air Act. The EPA contends that power plants are required to update emission controls at the time of major maintenance or capital activity We believe that maintenance and capital activities performed at our power plants are generally routine in nature and are typical for the industry. We are complying with this information request, but cannot predict the outcome of this investigation at this time. Should the EPA determine to take action, the resulting additional costs to comply could be material. We would expect to seek recovery through rates of any settlement amounts.

The EPA has initiated civil enforcement actions against other unaffiliated utilities as part of its initiative Settlement agreements entered into in connection with some of these actions have provided for expenditures to be made over extended time periods

Superfund Sites

In December 1999, we were identified as one of more than 1,000 potentially responsible parties at an EPA Superfund site in Kansas City, Kansas (Kansas City site). Based upon previous experience and the limited nature of our business transactions with the previous owners of the site, our obligation, if any, at the Kansas City site is not expected to have a material impact on our financial position or results of operations.

Nuclear Decommissioning

Decommissioning is a nuclear industry term for the permanent shutdown of a nuclear power plant and the removal of radioactive components in accordance with Nuclear Regulatory Commission (NRC) requirements. The NRC will terminate a plant's license and release the property for unrestricted use when a company has reduced the residual radioactivity of a nuclear plant to a level mandated by the NRC. The NRC requires companies with nuclear plants to prepare formal financial plans to fund decommissioning. These plans are designed so that funds required for decommissioning will be accumulated prior to the termination of the license of the related nuclear power plant.

We accrue decommissioning costs over the expected life of the Wolf Creek generating facility. The accrual is based on estimated unrecovered decommissioning costs, which consider inflation over the remaining estimated life of the generating facility and are net of expected earnings on amounts recovered from customers and deposited in an external trust fund.

The KCC reviews our decommissioning fund financial plans in two phases Phase one is the approval of the decommissioning study, the current year dollar amount and the future year dollar amount. Phase two is the filing of a "funding schedule" by the owner of the nuclear facility detailing its plans of how to fund the future year dollar amount for the pro rata share of the plant.

On February 25, 2002, we filed an application with the KCC to modify the funding schedule to reflect an assumed life of Wolf Creek through 2045 (see Note 3 of the Notes to Consolidated Financial Statements, "Rate Matters and Regulation"). This modification was granted on March 8, 2002. The filing reflects the current estimate in 1999 dollars of \$221 million, but a future estimate in 2045 through 2054 of \$1.28 billion. An updated decommissioning and dismantlement cost estimate was filed with the KCC on August 30, 2002 Costs outlined by this study were developed to decommission Wolf Creek following a shutdown. The analyses relied upon the sitespecific, technical information developed in 1999, updated to reflect current plant conditions and operating assumptions. Based on this study, our share of Wolf Creek's decommissioning costs, under the immediate dismantlement method, is estimated to be approximately \$220 million in 2002 dollars. These costs include decontamination, dismantling and site restoration and are not inflated, escalated, or discounted over the period of expenditure We anticipate a KCC order on the August 2002 decommissioning study in the second quarter of 2003. The actual decommissioning costs may vary from the estimates because of changes in technology and changes in costs for labor, materials and equipment

We will file a funding schedule to reflect the KCC's order on the August 2002 decommissioning study by the end of the second quarter of 2003 and anticipate a KCC order on the funding schedule in the third quarter of 2003.

Decommissioning costs are currently being charged to operating expense in accordance with the July 25, 2001 KCC rate order as modified by the KCC's approval of the March 8, 2002 funding schedule. Electric rates charged to customers provide for recovery of these decommissioning costs over the life of Wolf Creek as determined by the KCC through 2045. The NRC requires that funds to meet its decommissioning funding assurance requirement be in our decommissioning fund by the time our license expires in 2025 We believe that the KCC approved funding level will be sufficient to meet the NRC minimum financial assurance requirement. However, our results of operations would be materially adversely affected if we are not allowed to recover the full amount of the funding requirement

Amounts expensed approximated \$3.85 million in 2002 and will remain unchanged through 2044, subject to the August 2002 decommissioning cost review and revised funding schedule to be filed in the second quarter of 2003. These amounts are deposited in an external trust fund. The average after-tax expected return on trust assets is 5.56%.

Our investment in the decommissioning fund is recorded at fair value, including reinvested earnings. It approximated \$63.5 million at December 31, 2002 and \$66.6 million at December 31, 2001. The balance in the trust fund decreased from 2001 to 2002 due to the decline in the market value of equity securities held in the trust. Trust fund earnings accumulate in the fund balance and increase the recorded decommissioning hability.

Asset Retirement Obligations

In June 2001, the FASB issued SFAS No. 143, "Accounting for Asset Retirement Obligations." SFAS No 143 provides accounting requirements for the recognition and measurement of habilities associated with the retirement of tangible long-lived assets. Under the standard, these habilities will be recognized at fair value as incurred and capitalized and depreciated over the appropriate period as part of the cost of the related tangible long-lived assets. The adoption of SFAS No. 143 will not impact income. Any income effects are offset by a regulatory asset created pursuant to SFAS No. 71. Retirement obligations associated with long-lived assets included within the scope of SFAS No. 143 are those for which a legal obligation exists under enacted laws, statutes, written or oral contracts, including obligations ansing under the doctrine of promissory estoppel.

We adopted SFAS No. 143 on January 1, 2003, which required us to recognize and estimate the liability for our 47% share of the estimated cost to decommission Wolf Creek. SFAS No 143 requires the recognition of the present value of the asset retirement obligation we incurred at the time Wolf Creek was placed into service in 1985. On January 1, 2003, we recorded an asset retirement obligation of \$74 7 million In addition, we increased our property and equipment balance, net of accumulated depreciation, by \$10 7 million These amounts were estimated based on the calculation guidelines of SFAS No 143 We also established a regulatory asset for \$64 0 million,

which represents the accretion of the liability since 1985 and the increased depreciation expense associated with the increase in plant

Monitored Services

Impairment Charges

Effective January 1, 2002, we adopted SFAS No. 142 and SFAS No. 144. SFAS No 142 establishes new standards for accounting for goodwill. SFAS No. 142 continues to require the recognition of goodwill as an asset, but discontinues amortization of goodwill. In addition, annual impairment tests must be performed using a fair-value based approach as opposed to an undiscounted cash flow approach required under prior standards. The completion of the impairment tests, based upon a valuation performed by an independent appraisal firm, as of January 1, 2002, indicated that the carrying values of goodwill at Protection One and Protection One Europe had been impaired and impairment charges were recorded as discussed below.

Another impairment test of Protection One's goodwill and customer accounts was completed as of July 1, 2002 (the date selected for Protection One's annual impairment test), with the independent appraisal firm providing the valuation of the estimated fair value of Protection One's reporting units, and no impairment was indicated. Protection One's stock price declined after regulatory orders were issued (see Note 3 of the Notes to Consolidated Financial Statements, "Rate Matters and Regulation"), including the KCC's December 23, 2002, order. As a result, Protection One retained the independent appraisal firm to perform an additional valuation of Protection One's reporting units so it could perform an impairment test as of December 31, 2002, which resulted in the additional impairment charge discussed below.

SFAS No. 144 established a new approach to determining whether our customer account asset is impaired. The approach no longer permits us to evaluate our customer account asset for impairment based on the net undiscounted cash flow stream obtained over the remaining life of goodwill associated with the customer accounts being evaluated. Rather, the cash flow stream used under SFAS No 144 is limited to future estimated undiscounted cash flows from assets in the asset group, which include customer accounts, the primary asset of the reporting unit, plus an estimated amount for the sale of the remaining assets within the asset group (including goodwill). If the undiscounted cash flow stream from the asset group is less than the combined book value of the asset group, then we are required to mark the customer account asset down to fair value, by recording an impairment, to the extent fair value is less than our book value. To the extent net book value 15 less than fair value, no impairment would be recorded.

The new rule substantially reduces the net undiscounted cash flows for customer account impairment evaluation purposes as compared to the previous accounting rules. The undiscounted cash flow stream has been reduced from the 16 year remaining life of the goodwill to the nine year remaining life of customer accounts for impairment evaluation purposes. Using these new guidelines, we determined that there was an indication of impairment of the carrying value of the customer accounts and an impairment charge was recorded as discussed below

To implement the new standards, an independent appraisal firm was engaged to help management estimate the fair values of Protection One's and Protection One Europe's goodwill and customer accounts. Based on this analysis, we recorded a charge in the first quarter of 2002 of approximately \$749.3 million (net of tax benefit and minority interests), of which \$555.4 million was related to goodwill and \$193.9 million was related to customer accounts

The impairment charge for goodwill recorded in the first quarter of 2002 is reflected in our consolidated statement of income as a cumulative effect of a change in accounting principle. The impairment charge for customer accounts is reflected in our consolidated statement of income as an operating expense. These impairment charges reduce the recorded value of these assets to their estimated fair values at January 1, 2002.

Protection One completed an additional impairment test of goodwill as of December 31, 2002. We recorded an impairment charge of \$79.7 million, net of tax benefit and minority interests, in the fourth quarter of 2002 to reflect the impairment of all remaining goodwill of Protection One's North America segment, which is reflected in our consolidated statement of income as an operating expense.

1

We solicited and received indications of value for Protection One Europe from potential buyers. These indications of value are within a range we would be willing to accept. They indicated the recorded goodwill of Protection One Europe had no value. Accordingly, we recorded a \$36 million impairment charge in the fourth quarter of 2002 to reflect the impairment of all remaining goodwill at Protection One Europe, which is reflected in our consolidated statement of income as an operating expense. We are willing to accept offers in the indicated range due to our ability to use the tax loss on this sale to offset the taxes that would otherwise be due from our sale of other investments. We will recognize a \$58 million tax benefit in the first quarter of 2003 when Protection One Europe is classified as a discontinued operation.

These charges for the year ended December 31, 2002 are detailed as follows:

Impairment of Goodwill	Impairment of Customer Accounts	Total
	(in Thousands)	
\$ 719,885	\$ 339,974	\$1,059,859
116,154	_	116,154
\$ 836,039	\$ 339,974	1,176,013
		(203,958)
		(107,172)
		\$ 864,883
	of Goodwill \$ 719,885 116,154	of Goodwill of Customer Accounts (In Thousands) \$ 719,885 \$ 339,974 116,154 —

The investment at cost in customer accounts at December 31, 2002 was \$1.1 billion and at December 31, 2001 was approximately \$14 billion. Accumulated amortization of the investment in customer accounts at December 31, 2002 was \$678 9 million and at December 31, 2001 was \$614.5 million We recorded approximately \$83 3 million of customer account amortization expense during the year ended December 31, 2002, \$148 0 million during the same period of 2001 and \$158.7 million during the year ended December 31, 2000. Customer account amortization expense is reduced primarily as a result of the impairment charge that reduced our customer account balance. The table below reflects the estimated aggregate customer account amortization expense for 2003 and each of the four succeeding fiscal years.

	2003	2004	2005	2006	2007
			(in Thousand	s)	
Estimated amortization expense	\$ 83,389	\$ 83,282	\$66,998	\$ 66,641	\$ 60,320

We are required to perform impairment tests for long-lived assets prospectively for our monitored services segment as long as it continues to incur recurring losses or for other matters that may negatively impact its businesses. Goodwill will be required to be tested upon certain triggering events, which include recurring operating losses, adverse business conditions, adverse regulatory rulings, declines in market values and other matters that negatively impact value. Given the potentially negative implications from the KCC's December 23, 2002 order, and the subsequent decline in Protection One's stock price, Protection One tested its goodwill for impairment at December 31, 2002, which resulted in the additional impairment charge discussed above. If future impairment tests for either goodwill or customer accounts indicate fair value is less than book value, we will be required to recognize additional impairment charges on these assets in the future. Any such impairment charges could be material.

Change in Estimate of Customer Life

During the first quarter of 2002, Protection One evaluated the estimated life and amortization rates for customer accounts, based on the results of a lifing study performed by a third party appraisal firm in the first quarter of 2002. The report showed Protection One's North America customer pool can expect a declining revenue stream over the next 30 years with an estimated average remaining life of 9 years. Protection One's Multifamily pool can expect a declining revenue stream over the next 30 years with an estimated average remaining life of 10 years. Taking into account the results of the lifing study and the inherent expected declining revenue streams for the North America and Multifamily customer pools, in particular the first five years, Protection One adjusted the rate of amortization on customer accounts for its North America and Multifamily customer pools to better match the rate and period of amortization expense with the expected decline in revenues. In the first quarter of 2002, Protection One changed its amortization rate for its North America pool to a 10-year 135% declining balance method from a 10-year 130% declining balance method. For the Multifamily pool, Protection One will continue to amortize on a straight-line basis utilizing a shorter nine year life. Protection One accounted for these amortization changes prospectively beginning January 1, 2002, as a change in estimate. These changes in estimates increased amortization expense for the . year ended December 31, 2002 by approximately \$0.8 million, net of \$0.5 million tax.

Attrition

Customer attrition has a direct impact on the results of our monitored services operations since it affects its revenues, amortization expense and cash flow. Attrition is defined as a ratio, the numerator of which is the gross number of lost customer accounts for a given period, net of the adjustments described below, and the denominator of which is the average number of accounts for a given period. In some instances, estimates are used to derive attrition data. Adjustments are made to lost accounts primarily for the net change, either positive or negative, in the wholesale base and for accounts that are covered under a purchase price holdback and are "put" back to the seller. The gross accounts lost during a period are reduced by the amount of the guarantee provided for in the purchase agreements with sellers. In some cases, the amount of the purchase holdback may be less than actual attrition experience. Adjustments to lost accounts for purchase holdbacks is expected to be lower in the future because Protection One is purchasing fewer accounts in the types of transactions that create holdbacks and it has extinguished a substantial portion of its purchase holdback reserve. The gross accounts lost during a period are not reduced by "move in" accounts, which are accounts where a new customer moves into the premises equipped with a Protection One security system and vacated by a prior customer, or "competitive takeover" accounts, which are accounts where the owner of a premise monitored by a competitor requests that we provide monitoring services.

Actual attrition experience shows that the relationship period with any individual customer can vary significantly. Customers' service can be discontinued for a variety of reasons, including relocation, non-payment, customers' perception of value and competition. A portion of the acquired customer base can be expected to discontinue service every year. Any significant change in the pattern of historical attrition experience would have a material effect on our results of operations from monitored services.

Attrition is monitored each quarter based on an annualized and trailing twelve-month basis. This method utilizes the average customer account base for the applicable period in measuring attrition. Therefore, in periods of customer account growth, customer attrition may be understated and in periods of customer account decline, customer attrition may be overstated.

Customer attrition for the years ended December 31, 2002, 2001 and 2000 is summarized below.

		G	ustomer Acco	unt Attriti	on	
	December 3	1, 2002	December	31, 2001	December	31, 2000
	Annualized Fourth Quarter	Trailing Twelve Month	Annualized Fourth Quarter	Trailing Twelve Month	Annualized Fourth Quarter	Trailing Twelve Month
Protection One .	11.9%	112%	18 5%	15.5%	15 2%	142%
Protection One Europe	15 2%	13 5%	10.3%	10.2%	11 4%	12 1%

- Our monitored services segment had a net decrease of 62,656 customers from December 31, 2001 to December 31, 2002 Attrition decreased at Protection One in 2002 compared to 2001 for a variety of reasons, including
 - An aggressive campaign dubbed "Save Our Subscribers," designed to retain existing customers
 - An emphasis on customer service and autition reduction by branch and monitoring center personnel

 Legal action taken against competitors who illegally solicit our customers.

Related Party Transactions

Below, we describe significant transactions between us and Westar Industries and some of our other subsidiaries and related parties. We have disclosed these significant transactions even if they have been eliminated in the preparation of our consolidated results and financial position.

ONEOK Shared Services Agreement

We and ONEOK have shared services agreements in which we provide and bill one another for facilities, utility field work, information technology, customer support, meter reading and bill processing. Payments for these services are based on various hourly charges, negotiated fees and out-of-pocket expenses.

	2002	2001	2000
		(In Thousands)	
Charges to ONEOK	. \$8,357 3,324	\$8,202 3,279	\$8,463 3,420
Net receivable from ONEOK, outstanding at December 31	1,457	1,424	1,205

ONEOK gave us notice of termination effective December 2003 of this shared services agreement We expect termination of this agreement will increase our annual costs to provide these services by approximately \$11 million to \$13 million.

Protection One Shared Services Agreement

We provide administrative services to Protection One pursuant to services agreements, including accounting, tax, audit, human resources, legal, purchasing, facilities and technology services Fees for these services are based upon various hourly charges, negotiated fees and out-of-pocket expenses Protection One incurred charges of \$3.9 million in 2002, \$8.1 million in 2001 and \$7.3 million in 2000. These intercompany charges have been eliminated in consolidation.

Westar Energy and Protection One have entered into an amended service agreement that stipulates that if Westar Energy sells its interest in Protection One, Westar Energy and Protection One will negotiate, in good-faith, the terms and conditions for continuation of the services during an agreed-upon transition period. This agreement is subject to KCC approval, which has not yet been received.

Transactions Between Westar Industries and Subsidiaries

ţ

Protection One Credit Facility

Westar Industries is the lender under Protection One's senior credit facility. The senior credit facility was amended to increase the capacity from \$155 million to \$280 million during the year ended December 31, 2002 On August 26, 2002, the senior credit facility was further amended to extend the maturity date to January 5, 2004. On March 11, 2003, the KCC limited the amount of the credit facility to \$228.4 million, authorized us to fund the facility and extend the term of the facility to January 5, 2005 and required the facility to be paid in full and terminated upon the disposition of all or part of our investment in Protection One. We are in discussions with Protection One about the extension of the facility and we intend to renew the facility through January 5, 2005, should such renewal be necessary to provide Protection One with continued liquidity For further information, see Note 34 of the Notes to Consolidated Financial Statements, "Subsequent Events"

As of December 31, 2002, \$215 5 million was drawn under the facility The remaining availability under this facility as of December 31, 2002 was \$64.5 million At March 14, 2003, Protection One had outstanding borrowings of \$215.5 million and \$12.9 million of remaining capacity. Amounts outstanding, accrued interest and facility fees have been eliminated in our consolidated financial statements.

Purchases of Securities

Westar Industries, Protection One and we have purchased our and Protection One debt securities and preferred stock in the open market. These repurchases have been accounted for as retirements on a consolidated basis. The table below summarizes these transactions for the years ended December 31, 2002, 2001 and 2000.

December 31,	2002	2001	20	90

^(a) Represents the fair value of a call option associated with our putable/callable notes (see Note 14 of the Hotes to Consolidated Financial Statements, "Call Option").

⁶⁰ In 2001, \$37.9 million of these bonds were purchased by Westar industries and \$27.6 million of these were transferred to Protection One in exchange for cash

⁶⁰ In 2000, \$170.0 million of these bonds were purchased by Westar Industries and \$103.9 million of these were transferred to Protection One in exchange for cash and the settlement of certain intercompany payables and receivables

See Note 26 of the Notes to Consolidated Financial Statements, "Gain on Debt Retirements," for information about a change in accounting treatment that requires that gains and losses arising from the purchases and sales of these securities be recorded as other income rather than as an extraordinary item. See Note 34 of the Notes to Consolidated Financial Statements, "Subsequent Events — Purchase of Stock from Protection One" and "Subsequent Events — Purchases of Debt Securities," for information regarding purchases of securities that have occurred during 2003

Tax Sharing Agreement

We have a tax sharing agreement with Protection One. This pro rata tax sharing agreement allows Protection One to be reimbursed for current tax benefits utilized in our consolidated tax return. We and Protection One are eligible to file on a consolidated basis for tax purposes so long as we maintain an 80% ownership interest in Protection One. We reimbursed Protection One \$13.5 million for tax year 2001 and \$7.4 million for tax year 2000. On March 11, 2003, the KCC issued an order that allows us to make a cash payment to Protection One of approximately \$20 million for tax year 2002.

Financial Advisory Services

Protection One entered into an agreement pursuant to which it paid a quarterly fee to Westar Industries for financial advisory services equal to 0.125% of its consolidated total assets at the end of each quarter. This agreement was approved by the independent members of Protection One's board of directors Protection One incurred approximately \$3.6 million of such fees during the year ended December 31, 2002. These amounts have been eliminated in our consolidated financial statements. This agreement was terminated effective September 30, 2002.

Loans to Officers

During 2001 and 2002, we extended loans to our officers for the purpose of purchasing shares of our common stock. The officers are personally lable for the repayment of the loans, which are unsecured and bear interest, payable quarterly, at a vanable rate equal to our short-term borrowing rate. The loans mature on December 4, 2004. The aggregate balance outstanding at December 31, 2002 was approximately \$1.8 million, which is classified as a reduction to shareholders' equity in the accompanying consolidated balance sheets For the year ended December 31, 2002, we recorded approximately \$97,000 in interest income on these loans. No additional loans will be made as a result of federal legislation that became effective July 30, 2002.

Transactions Between Westar Energy and KGE

We perform KGE's cash management function, including cash receipts and disbursements. An intercompany account is used to record net receipts and disbursements between us and KGE. KGE's net amount payable from affiliates approximated \$24.1 million at December 31, 2002, and the net amount receivable from affiliates approximated \$17.3 million at December 31, 2001. These intercompany charges have been eliminated in consolidation.

We provide all employees utilized by KGE We allocate certain operating expenses to KGE. These expenses are allocated, depending on the nature of the expense, based on allocation studies, net investment, number of customers, and/or other appropriate factors. We believe such allocation procedures are reasonable.

Transactions with Protection One

During the fourth quarter of 2001, KGE entered into an option agreement to sell an office building located in downtown Wichita, Kansas, to Protection One for approximately \$0.5 million The sales price was determined by management based on three independent appraisers' findings This transaction was completed during June 2002 We recognized a loss of \$2.6 million on this transaction and we

ŝ

M

S

expected to realize annual operating cost savings of approximately \$0.9 million. The cost savings will be treated as a regulatory hability in accordance with a March 26, 2002, KCC order. For the year ended December 31, 2002, we recorded \$0.5 million in cost savings as a regulatory hability.

Protection One Europe

On February 29, 2000, Westar Industries purchased the European operations of Protection One, and certain investments held by a subsidiary of Protection One, for an aggregate purchase price of \$244 million. Westar Industries paid approximately \$183 million in cash and transferred Protection One debt securities with a market value of approximately \$61 million to Protection One Cash proceeds from the transaction were used to reduce the outstanding balance owed to Westar Industries on Protection One's revolving credit facility. No gain or loss was recorded on this intercompany transaction and the net book value of the assets was unaffected.

Hedging Activity

We use financial and physical instruments to hedge a portion of our anticipated fossil fuel needs. At the time we enter into these transactions, we are unable to determine what the value will be when the agreements are actually settled.

In an effort to mitigate fuel commodity price market nsk, we use hedging arrangements to reduce our exposure to increased coal, natural gas and oil prices. Our future exposure to changes in fossil fuel prices will be dependent upon the market prices and the extent and effectiveness of any hedging arrangements into which we enter.

See Note 6 of the Notes to Consolidated Financial Statements, "Financial Instruments, Energy Trading and Risk Management — Derivative Instruments and Hedge Accounting — Hedging Activities," for detailed information regarding hedging relationships and an interest rate swap we entered into during the third quarter of 2001.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Price Risks

Our hedging and trading activities involve risks, including commodity price risk, equity price risk, interest rate risk and credit risk. Commodity price risk is the risk that changes in commodity prices may impact the price at which we are able to buy and sell electricity and purchase fuels for our generating units. These commodities have experienced price volatility in the past and can be expected to do so in the future. This volatility may increase or decrease future earnings.

Equity price risk is the risk we may be exposed to based on changes in the market value of our equity securities.

Interest rate risk is the risk of loss associated with movements in market interest rates. During 2002, we used an interest rate swap to manage our exposure to variable interest rates. The swap converted \$500 million of variable rate debt to a fixed rate. In the future, we may continue to use swaps or other financial instruments to manage interest rate risk.

Credit nsk is the nsk of loss resulting from non-performance by a counterparty of its contractual obligations. We have exposure to credit nsk and counterparty default through our retail, power marketing and trading activities. We maintain credit policies intended to reduce overall credit nsk and actively monitor these policies to reflect changes and scope of operations. We employ additional credit risk control mechanisms when appropriate, such as letters of credit, parental guarantees and standardized master netting agreements from counterparties that allow for some of the offsetting of positive and negative exposures. Credit exposure is monitored and, when necessary, the activity with a specific counterparty is limited until credit enhancement is provided. Results actually achieved from hedging and trading activities could vary materially from intended results and could materially affect our financial results depending on the success of our credit risk management efforts.

Commodity Price Exposure

We engage in both financial and physical trading to manage our commodity price risk. We trade electricity, coal, natural gas and oil We use a variety of financial instruments, including forward contracts, options and swaps and trade energy commodity contracts daily. We also use hedging techniques to manage overall fuel expenditures. We procure physical product under fixed price agreements and spot market transactions.

We are involved in trading activities primarily to reduce risk from market fluctuations, capitalize on our market knowledge and enhance system reliability Net open positions exist, or are established, due to the origination of new transactions and our assessment of, and response to, changing market conditions. To the extent we have open positions, we are exposed to the risk that changing market prices could have a material, adverse impact on our financial position or results of operations

We manage and measure the market price risk exposure of our trading portfolio using a variance/covariance value-at-risk (VaR) model. VaR measures the predicted worst-case loss at a specific confidence level over a specified period of time. In addition to VaR, we employ additional risk control processes such as stress testing, daily loss limits, and commodity position limits. We expect to use the same VaR model and control processes in 2003.

The use of the VaR method requires a number of key assumptions, including the selection of a confidence level for losses and the estimated holding period. We express VaR as a potential dollar loss based on a 95% confidence level using a one-day holding period. The calculation includes derivative commodity instruments used for both trading and risk management purposes. The VaR amounts for 2002 and 2001 were as follows:

		2002	2001
		(In Tho	usands)
High		\$1,857	\$5,314
Low	•	150	170
Average	· · · · · · · · · · · · · · · · · · ·	782	2,422

궦

We have considered a number of nsks and costs associated with the future contractual commitments included in our energy portfolio. These risks include credit risks associated with the financial condition of counterparties, product location (basis) differentials and other risks. Declines in the credit-worthiness of our counterparties could have a material adverse impact on our overall exposure to credit risk. We maintain credit policies with regard to our counterparties that, in managements view, reduce overall credit risk. There can be no assurance that the employment of VaR, or other risk management tools we employ, will eliminate the risk of loss.

We are also exposed to commodity price changes outside of trading activities. We use derivatives for non-trading purposes and a mix of various fuel types primarily to reduce exposure relative to the volaulity of market and commodity prices. The wholesale power market is extremely volatile in price and supply. This volatility impacts our costs of power purchased and our participation in power trades. If we were unable to generate an adequate supply of electricity for our native load customers, we would purchase power in the wholesale market to the extent it is available or economically feasible to do so and/or implement curtailment or interruption procedures as allowed for in our tanffs and terms and conditions of service. To the extent open positions exist in our power marketing portfolio, we are exposed to changing market prices that may adversely impact our financial position and results of operations The increased expenses or loss of revenues associated with this could be material and adverse to our consolidated results of operations and financial condition.

From 2001 to 2002, we experienced a 10% decrease in the average pince per MWh of electricity purchased for utility operations.

Purchased power market volatility could be greater than the average

Lⁿ price decrease indicates. If we were to have a 10% increase in our \sim purchased power price from 2002 to 2003, given the amount of

power purchased for utility operations during 2002, we would have exposure of approximately \$3.5 million of operating income Due to the volatility of the power market, past prices cannot be used to predict future prices

We use a mix of vanous fossil fuel types, including coal, natural gas and oil, to operate our system, which helps lessen our risk associated with any one fuel type A significant portion of our coal requirements are under long-term contract, which removes most of the price risk associated with this commodity type. During 2002, we experienced an approximate 2% increase, or \$0 056 per MMBtu, in our average cost for natural gas purchased for utility operations. We decreased our gas usage by 1.9 million MMBtu compared to the amount burned in 2001. Due to the volatility of natural gas prices, we have begun to increasingly utilize our ability to switch to lower cost fuel types as the market allows. We expect that exposure to natural gas price changes will not be material in 2003 due to our natural gas hedge that has fixed the price of our gas through July 2004

 We use uranium to fuel our nuclear generating station and have on hand or under contract 100% of Wolf Creek's uranium, uranium conversion and uranium enrichment needs for 2003 We have on hand or under contract 76% of the uranium and uranium conversion and 80% of the uranium enrichment required for operation of Wolf Creek through March 2008. The balance is expected to be obtained through spot market and contract purchases, which means we will be exposed to the price nsk associated with these components.

Additional factors that affect our commodity price exposure are the quantity and availability of fuel used for generation and the quantity of electricity customers will consume. Quantities of fossil fuel used for generation could vary dramatically from year to year based on the individual fuel's availability, price, deliverability, unit outages and nuclear refueling. Our customers' electricity usage could also vary dramatically year to year based on the weather or other factors.

Interest Rate Exposure

We had approximately \$523.4 million of variable rate debt and current maturities of fixed rate debt as of December 31, 2002. A 100 basis point change in each debt series' benchmark rate, used to set the rate for such series would impact net income on an annualized basis by approximately \$2.5 million after tax.

Under SFAS No. 133, we are required to mark to market changes in the anticipated amount of the liability related to the portion of the \$400 million in notes that have been retired so that our consolidated balance sheet reflects the current fair value of the free standing portion of the call option as discussed in Note 14 of the Notes to Consolidated Financial Statements, "Call Option." The amount of our hability will increase or decrease approximately \$5 million for every 10-basis point change in the 10-year forward treasury rate. Related to the call option, for the year ended December 31, 2002, we recorded a non-cash mark-to-market charge of \$23.7 million, net of \$15.7 million tax benefit, to reflect the fair value of the call option associated with the retired notes. We intend to repurchase or provide for the repayment of all or a portion of these notes on or prior to June 15, 2003. Any repurchase of these notes will require us to mark to market additional amounts of the call option. We cannot predict changes in the market value of the call option and therefore cannot estimate amounts of future mark-to-market non-cash charges associated with the call option or the impact on our earnings.

Foreign Currency Exchange Rates

We have foreign operations with functional currencies other than the U.S. dollar. As of December 31, 2002, the unrealized loss on currency translation was approximately \$2.5 million pretax. A 10% change in the currency exchange rates would not have a material effect on other comprehensive income.

Equity Price Risk

During 2002, we were not substantially exposed to equity price risk. As discussed in Note 4 of the Notes to Consolidated Financial Statements, "Changes in ONEOK Ownership," we sold a substantial portion of our equity investment in ONEOK. During 2003, we will account for our ONEOK common stock investment as an availablefor-sale security under SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities" and mark to market its fair value through other comprehensive income.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

TABLE OF CONTENTS

INDEPENDENT AUDITORS' REPORT

To the Board of Directors and Shareholders of Westar Energy, Inc. Topeka, Kansas

PAGE

We have audited the accompanying consolidated balance sheets of Westar Energy, Inc. and subsidiaries (the Company) as of December 31, 2002 and 2001, and the related consolidated statements of income (loss), comprehensive income (loss), shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2002. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2002 and 2001, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2002, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 23 to the financial statements, on January 1, 2002, the Company adopted Statement of Financial Accounting Standards No. 142, Accounting for Goodwill and Other Intangible Assets and Statement of Financial Accounting Standards No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets. As discussed in Note 2 to the financial statements, on January 1, 2001 the Company adopted Statement of Financial Accounting Standards No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended. As discussed in Note 2 to the financial statements, on January 1, 2000, the Company adopted Statements 101, Revenue Recognition

The accompanying notes are an integral part of these consolidated financial statements

WESTAR ENERGY, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

I. DESCRIPTION OF BUSINESS

Westar Energy, Inc., a Kansas corporation incorporated in 1924, operates the largest electric utility in Kansas and owns interests in monitored security businesses and other investments Unless the context otherwise inducates, all references in this Annual Report on Form 10-K to "the company," "we," "us," "our" or similar words are to Westar Energy, Inc. and its consolidated subsidiaries. The term "Westar Energy" refers to Westar Energy, Inc. alone and not together with its consolidated subsidiaries. We provide electric generation, transmission and distribution services to approximately 647,000 customers in Kansas. We also provide monitored security services to over 1.1 million customers in the United States and Europe ONEOK, Inc. (ONEOK), in which we owned an approximate 45% interest at December 31, 2002, (reduced to an approximate 27.5% interest at March 14, 2003) provides natural gas transmission and distribution services to approximately 1.9 million customers in Kansas, Oklahoma and Texas. Our corporate headquarters are located at 818 South Kansas Avenue, Topeka, Kansas 66612.

Westar Energy and Kansas Gas and Electric Company (KGE), a wholly owned subsidiary, provide rate regulated electric service. KGE owns 47% of Wolf Creek Nuclear Operating Corporation (WCNOC), the operating company for Wolf Creek Generating Station (Wolf Creek) our nuclear powered generating facility.

Westar Industries, Inc. (Westar Industries), our wholly owned subsidiary, owns our interests in Protection One Inc. (Protection One), Protection One Europe, ONEOK and our other non-utility businesses. Protection One, a publicly traded, approximately 88%owned subsidiary, and Protection One Europe provide monitored security services. Protection One Europe refers collectively to Protection One International, Inc., a wholly owned subsidiary of Westar Industries, and its subsidiaries, including a French subsidiary in which it owns an approximate 99.8% interest.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

We prepare our consolidated financial statements in accordance with accounting principles generally accepted in the United States of America (GAAP). Our consolidated financial statements include all operating divisions and majority owned subsidiaries for which we maintain controlling interests. Common stock investments that are not majority owned are accounted for using the equity method when our investment allows us the ability to exert significant influence. Undivided interests in jointly-owned generation facilities are consolidated on a pro rata basis. All material intercompany accounts and transactions have been eliminated in consolidation

Use of Management's Estimates

The preparation of consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, habilities, revenues and expenses, and related disclosure of contingent assets and habilities at the date of our consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. We evaluate our estimates on an on-going basis, including those related to bad debts, inventones, depreciation, revenue recognition, investments, customer accounts, goodwill, intangible assets, income taxes, pensions and other post retirement and post-employment benefits, decommissioning of Wolf Creek, environmental issues, contingencies and litigation. Actual results may differ from those estimates under different assumptions or conditions.

Regulatory Accounting

We currently apply accounting standards for our regulated utility operations that recognize the economic effects of rate regulation in accordance with Statement of Financial Accounting Standards (SFAS) No. 71, "Accounting for the Effects of Certain Types of Regulation," and, accordingly, have recorded regulatory assets and habilities when required by a regulatory order or based on regulatory precedent.

Regulatory assets represent incurred costs that have been deferred because they are probable of future recovery in customer rates. Regulatory liabilities represent obligations to make refunds to customers for previous collections for costs that are not likely to be incurred in the future. We have recorded these regulatory assets and liabilities in accordance with SFAS No. 71. If we were required to terminate application of SFAS No. 71 for all of our regulated operations, we would have to record the amounts of all regulatory assets and liabilities in our consolidated statements of income at that time. Our earnings would be reduced by the net amount calculated from the table below, net of applicable income taxes. Regulatory assets and liabilities reflected in our consolidated balance sheets are as follows:

As of December 31,	2002	2001	
	(In The	ousands)	
Recoverable income taxes	\$ 198,866	\$221,373	
Debt issuance costs	75,838	58,054	
Deferred employee benefit costs	25,555	32.687	
Deferred plant costs	29,037	29,499	
2002 ice storm costs	14,963	·	
Other regulatory assets	16,088	16,412	
Total regulatory assets	\$360,347	\$358,025	
Total regulatory liabilities	\$ 8,445	\$ 6,037	

- Recoverable income taxes: Recoverable income taxes represent amounts due from customers for accelerated tax benefits that have been previously flowed through to customers and are expected to be recovered in the future as the accelerated tax benefits reverse. This item will be recovered over the life of the utility plant.
- Debt issuance costs: Debt reacquisition expenses are amortized over the remaining term of the reacquired debt or, if refinanced, the term of the new debt. Debt issuance costs are amortized and will be recovered over the term of the associated debt.
- Deferred employee benefit costs: Deferred employee benefit costs represent post-retirement and post-employment expenses in excess of amounts paid that are to be recovered over a period of five years as authonzed by the Kansas Corporation Commission (KCC).
- Deferred plant costs: Deferred plant costs relate to the Wolf Creek nuclear generating facility For further information, see "---Depreciation," discussed below
- 2002 ice storm costs: Restoration costs associated with an ice storm that occurred in January 2002 See Note 30 for additional information regarding the ice storm

.:

A return is allowed on coal contract settlement costs (included in "Other regulatory assets" in the table above) and on the 2002 ice storm costs.

Cash and Cash Equivalents

We consider highly liquid investments with a maturity of three months or less when purchased to be cash equivalents.

Restricted Cash

Restricted cash consists of cash irrevocably deposited in trust for debt repayments, cash collateralizing Protection One's workers' compensation obligations, a prepaid capacity and transmission agreement, letters of credit, surety bonds and escrow arrangements as required by certain letters of credit, and various other deposits.

Inventories and Supplies

Inventories and supplies for our utility business are stated at average cost. Inventories for our monitored services segment, comprised of alarm systems and parts, are stated at the lower of average cost or market.

Property, Plant and Equipment

2504412090

З,

ហ

Property, plant and equipment is stated at cost. For utility plant, cost includes contracted services, direct labor and materials, indirect charges for engineering and supervision, and an allowance for funds used during construction (AFUDC). AFUDC represents the cost of borrowed funds used to finance construction projects. The AFUDC rate was 5 95% in 2002, 9.01% in 2001 and 7.39% in 2000. The cost of additions to utility plant and replacement units of property is capitalized. Interest capitalized into construction in progress was \$2.2 million in 2002, \$8 7 million in 2001 and \$9.4 million in 2000.

Maintenance costs and replacement of minor items of property are charged to expense as incurred Incremental costs incurred during scheduled Wolf Creek refueling and maintenance outages are deferred and amortized monthly over the unit's operating cycle, normally about 18 months For utility plant, when units of depreciable property are retired, the original cost and removal cost, less salvage value, are charged to accumulated depreciation

Depreciation

Utility plant is depreciated on the straight-line method at the lesser of rates set by the KCC or rates based on the estimated remaining useful lives of the assets, which are based on an average annual composite basis using group rates that approximated 2.66% during 2002, 3 03% during 2001 and 2.99% during 2000.

In its rate order of July 25, 2001, the KCC extended the estimated service life for certain of our generating assets, including Wolf Creek and the LaCygne 2 generating station, for regulatory rate making purposes. The estimated returement date for Wolf Creek was extended from 2025 to 2045, although our operating license for Wolf Creek expires in 2025, and the estimated retirement date for LaCygne

2 was extended to 2032, although the term of our lease for LaCygne 2 expires in 2016 On April 1, 2002, we adopted the new depreciation rates as prescribed in the KCC order. We continue to depreciate Wolf Creek over the term of our operating license, and we continue to depreciate LaCygne 2 over the term of our lease. We have created a regulatory asset, included under "Deferred plant costs" in the above table, for the amount that our depreciation expense

On an annual basis, our depreciation expense will be reduced by approximately \$30.0 million as a result of these extensions. If our generating license for Wolf Creek is not renewed or the term of our lease for LaCygne 2 is not extended, we will need to seek relief from the KCC to recover the remaining cost of these assets.

Non-utility property, plant and equipment is depreciated over the estimated useful lives of the related assets. We periodically evaluate our depreciation rates considering the past and expected future expense in the operation of our facilities.

Depreciable lives of property, plant and equipment are as follows:

· ·	Years
Utility:	
Fossil fuel generating facilities	6 to 68
Nuclear fuel generating facility	42 to 65
Transmission facilities	28 to 67
Distribution facilities	19 to 57
Other	5 to 55
Non-utility:	
Buildings	40
Installed systems	10
Furniture, fixtures and equipment	5 to 10
Leasehold improvements	5 to 10
Vehicles	5
Data processing and telecommunications	1 to 7

Nuclear Fuel

Our share of the cost of nuclear fuel in process of refinement, conversion, enrichment and fabrication is recorded as an asset in property, plant and equipment on our consolidated balance sheets at original cost and is amortized to cost of sales based upon the quantity of heat produced (MMBtu) for the generation of electricity. The accumulated amortization of nuclear fuel in the reactor was \$25.2 million at December 31, 2002 and \$35.6 million at December 31, 2001. Spent fuel charged to cost of sales was \$17.8 million in 2002, \$22.1 million in 2001 and \$19.6 million in 2000.

Customer Accounts

Customer accounts are stated at cost and are amortized over the estimated customer life. The cost includes amounts paid to dealers and the estimated fair value of accounts acquired in business acquisitions. Internal costs incurred in support of acquiring customer accounts are expensed as incurred.

Protection One's and Protection One Europe's amortization rates consider the average estimated remaining life and historical and projected attintion rates. The amortization method for each customer pool is as follows:

Pool					_		Method
North America Acquired Westingh Other customers	1005	е сı	ustom	iers	•		Eight-year 120% declining balance Ten-year 135% declining balance
Europe Multifamily	•			•	 ••	_•	Ten-year 125% declining balance Nine-year straight-line

In accordance with SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of," long-lived assets held and used by Protection One and Protection One Europe are evaluated for recoverability on a periodic basis or as circumstances warrant An impairment would be recognized when the undiscounted expected future operating cash flows by customer pool derived from customer accounts is less than the carrying value of capitalized customer accounts and related goodwill. See Note 23 for information regarding SFAS No. 144, "Accounting for the Impairment and Disposal of Long-Lived Assets," which replaces SFAS No. 121 as of January 1, 2002.

Due to the customer attrition experienced in 2002, 2001 and 2000, the decline in market value of Protection One's publicly traded equity and debt securities and recurring losses, Protection One and Protection One Europe performed impairment tests on their customer account assets and goodwill in 2002, 2001 and 2000 These tests indicated that future estimated undiscounted cash flows exceeded the sum of the recorded balances for customer accounts and goodwill. See Note 23 for a discussion of the impairment recorded on these assets during 2002 pursuant to the adoption of new accounting principles.

Goodwill

Goodwill represents the excess of the purchase price over the fair value of net assets acquired by Protection One and Protection One Europe. Protection One and Protection One Europe changed their estimated goodwill hife from 40 years to 20 years as of January 1, 2000. For 2001 and 2000, remaining goodwill, net of accumulated amortization, was amortized over its remaining useful hife based on a 20-year hife

For 2001 and 2000, the carrying value of goodwill was included in the evaluations of recoverability of customer accounts No reduction in the carrying value was necessary at December 31, 2001 or 2000

Effective as of January 1, 2002, we adopted SFAS No. 142, "Accounting for Goodwill and Other Intangible Assets" and no longer amortize goodwill. We are subject to the annual goodwill impairment test. See Note 23 for information regarding the effect of adopting SFAS No. 142.

Cash Surrender Value of Life Insurance

The following amounts related to corporate-owned life insurance policies (COLI) are recorded in other long-term assets on our consolidated balance sheets at December 31:

	2002	2001
	(in Mi	llions)
Cash surrender value of policies ^(a)	\$ 824 0	\$ 772 8
Borrowings against policies	(7763)	(723 6)
COU, net	\$ 477	\$ 492

⁶⁰Cash surrender value of policies as presented represents the value of the policies as of the end of the respective policy years and not as of December 31, 2002 and 2001

Income is recorded for increases in cash surrender value and net death proceeds Interest incurred on amounts borrowed is offset against policy income. Income recognized from death proceeds is highly variable from period to period Death benefits recognized as other income approximated \$3.6 million in 2002, \$2.7 million in 2001 and \$0.8 million in 2000

Minority Interests

Minority interests represent the minority shareholders' proportionate share of the shareholders' equity and net losses of Protection One and Protection One Europe

Revenue Recognition

Energy Sales

Energy sales are recognized as delivered and include an estimate for energy delivered but unbilled at the end of each year. Power marketing activities are accounted for under the mark-to-market method of accounting. Under this method, changes in the portfolio value are recognized as gains or losses in the period of change. The net mark-to-market change is included in energy sales in our consolidated statements of income. The resulting unrealized gains and losses are recorded as energy trading assets and liabilities on our consolidated balance sheets.

We primarily use quoted market prices to value our power marketing and energy trading contracts. When market prices are not readily available or determinable, we use alternative approaches, such as model pricing. The market prices used to value these transactions reflect our best estimate of fair values considering various factors, including closing exchange and over-the-counter quotations, time value and volatility factors underlying the commitments. Results actually achieved from these activities could vary materially from intended results and could unfavorably affect our financial results.

Monitored Services Revenues

Monitored services revenues are recognized when security services are provided. System installation revenues, sales revenues on equipment upgrades and direct and incremental costs of installations and sales are deferred for residential customers with monitoring service contracts. For commercial customers, revenue recognition is dependent upon each specific customer contract. In instances when the company passes title to a system unaccompanied by a service agreement or the company passes title at a price that it believes is unaffected by an accompanying but undelivered service, the company recognizes revenues and costs in the period incurred. In cases where the company retains title to the system or it prices the system lower than it otherwise would because of an accompanying service agreement, the company defers and amortizes revenues and direct costs.

Deferred system and upgrade installation revenues are recognized over the expected life of the customer utilizing an accelerated method for residential and commercial customers and a straight-line method for Protection One's Multifamily customers. Deferred costs in excess of deferred revenue are recognized over the initial contract term, utilizing a straight-line method, typically two to three years for residential systems, five years for commercial systems and five to ten years for Multifamily systems. To the extent deferred costs are less than deferred revenues, such costs are recognized over the estimated life of the customer relationship.

Deferred revenues also result from customers who are billed for monitoring and extended service protection in advance of the period in which such services are provided, on a monthly, quarterly or annual basis Revenues from monitoring activities are recognized in the period such services are provided

Income Taxes

Our consolidated financial statements use the liability method to reflect income taxes Deferred tax assets and liabilities are recognized for temporary differences in amounts recorded for financial reporting purposes and their respective tax bases. We amortize deferred investment tax credits over the lives of the related properties

Foreign Currency Translation

The assets and liabilities of our foreign operations are translated into U.S. dollars at current exchange rates, and revenues and expenses are translated at average exchange rates.

Cumulative Effects of Accounting Changes

Accounting for Goodwill

Effective January 1, 2002, we adopted SFAS No. 142. See Note 23 for the cumulative effect of this adoption.

Accounting for Derivative Instruments and Hedging Activities

Effective January 1, 2001, we adopted SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," as amended by SFAS Nos. 137 and 138 (collectively, SFAS No 133). We use derivative instruments (primarily swaps, options and futures) to manage interest rate exposure and the commodity price risk inherent in some of our fossil fuel and electricity purchases and sales. Under SFAS No. 133, all derivative instruments, including our energy trading contracts, are recorded on our consolidated balance sheets as either an asset or hability measured at fair value Changes in a derivative's fair value must be recognized currently in earnings unless specific hedge accounting critena are met, in which case changes are reflected in other comprehensive income. Cash flows from derivative instruments are presented in net cash flows from operating activities.

Herivative instruments used to manage commodity price risk
 inherent in fossil fuel and electricity purchases and sales are classified
 as energy trading contracts on our consolidated balance sheets.
 Energy trading contracts representing unrealized gain positions are
 reported as assets; energy trading contracts representing unrealized (N loss positions are reported as habilities

Pnor to January 1, 2001, gains and losses on our derivatives used for managing commodity price risk were deferred until settlement. These derivatives were not designated as hedges under SFAS No. 133. Accordingly, on January 1, 2001, we recognized an unrealized gain of \$18.7 million, net of \$12.3 million of tax. This gain is presented on our consolidated statement of income for 2001 as a cumulative effect of a change in accounting principle.

After January 1, 2001, changes in fair value of all derivative instruments used for managing commodity price nsk that are not designated as hedges are recognized in revenue as discussed above under "— Revenue Recognition — Energy Sales." Accounting for derivatives under SFAS No. 133 will increase volatility of our future earnings.

Revenue Recognition

ሻ

In the fourth quarter of 2000, we adopted Staff Accounting Bulletin (SAB) No. 101, "Revenue Recognition," which had a retroactive effective date of January 1, 2000 The impact of this accounting change generally required deferral of certain monitored security services sales for installation revenues and direct sales-related expenses Deferral of these revenues and costs is generally necessary when installation revenues have been received and a monitoring contract to provide future service is obtained

The cumulative effect of this change in accounting principle was a charge to income in 2000 of approximately \$3.8 million, net of \$1.1 million tax benefit, and is related to changes in revenue recognition at Protection One Europe Prior to the adoption of SAB No. 101, Protection One Europe recognized installation revenues and related expenses upon completion of the installation.

Accounting Changes

Stock Based Compensation

In December 2002, Financial Accounting Standards Board (FASB) issued SFAS No. 148, "Accounting for Stock-Based Compensation --Transition and Disclosure," which amends SFAS No. 123, "Accounting for Stock-Based Compensation." SFAS No. 148 provides alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation In addition, it amends the disclosure requirements of SFAS No 123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. This statement requires that companies follow the prescribed format and provide the additional disclosures in their annual reports for fiscal years ending after December 15, 2002. We apply the recognition and measurement principles of APB Opinion No. 25, "Accounting for Stock Issued to Employees," as allowed by SFAS Nos. 123 and 148, and related interpretations in accounting for our stock-based compensation plans, as described in Note 15. We have adopted the disclosure requirements of SFAS No. 148.

For purposes of the pro forma disclosures required by SFAS No. 148, the estimated fair value of the options is amortized to expense over the options' vesting period. Under SFAS No. 123, compensation expense would have been \$0.8 million in 2002 and \$1.1 million in 2000 We would have recorded income of \$0.5 million in 2001 under SFAS No. 123. Information related to the pro forma impact on our earnings and earnings per share follows.

	2002	2001	2000
	(Dollars in Tho	usands, Except Per	Share Amounts)

Accounting for Energy Trading Contracts

In October 2002, the FASB, through the Emerging Issues Task Force (EITF), issued Issue No. 02-03, which rescinded Issue No. 98-10, "Accounting for Contracts Involved in Energy Trading and Risk Management Activities." As a result, all new contracts that would otherwise have been accounted for under Issue No. 98-10 and that do not fall within the scope of SFAS No. 133 can no longer be marked-to-market and recorded in earnings as of October 25, 2002 We are not affected by this change in accounting principle and are not required to reclassify any of our contracts EITF Issue No 02-03 also requires that energy trading contracts and derivatives, whether settled financially or physically, be reported in the income statement on a net basis effective January 1, 2003 We began to classify our energy trading contracts on a net basis during the third quarter of 2002

On July 1, 2002, we began reporting mark-to-market gains and losses on energy trading contracts on a net basis, whether realized or unrealized, in our consolidated income statements. Prior to July 1, 2002, we reported gains on these contracts in sales and losses in cost of sales in our consolidated income statements. See Note 6 for additional information on the effects of the accounting change.

Gains and Losses from Extinguishment of Debt

Effective July 1, 2002, we adopted SFAS No. 145, "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections," which prohibits treating gains and losses associated with extinguishments resulting from a company's risk management strategy as extraordinary. See Note 26 for additional information on this pronouncement.

During the last three years, Protection One and our debt securities were repurchased in the open market and gains were recognized on the retirement of these debt securities. We recognized \$12.0 million, net of \$6.3 million tax, in 2002; \$23.2 million, net of \$12.6 million tax, in 2001; and \$49.2 million, net of \$26.5 million tax, in 2000.

Accounting for Guarantees

In November 2002, FASB issued Interpretation (FIN) No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others," which provides guidance for accounting for guarantees. For any guarantee entered into after November 2002, a guarantor is required to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing the guarantee. Any future guarantee that we enter into will be accounted for as a liability.

In 1998, we issued a financial guarantee of an obligation of Onsite Energy Corporation under which our maximum hability was \$1.3 million. This guarantee was released in the first quarter of 2003.

Consolidation of Variable Interest Entities

In January 2003, the FASB issued FIN No. 46, "Consolidation of Variable Interest Entities — an Interpretation of ARB No. 51." This interpretation provides guidance related to identifying variable interest entities (previously known generally as special purpose entities or SPEs) and determining whether such entities should be consolidated. Certain disclosures are required when FIN No. 46 becomes effective if it is reasonably possible that a company will consolidate or disclose information about a variable interest entity when it initially applies FIN No. 46. This interpretation must be applied immediately to variable interest entities created or obtained after January 31, 2003. For those variable interest entities created or obtained on or before January 31, 2003, we must apply the provisions of FIN No. 46 in the third quarter of 2003. We are currently evaluating the effect of FIN No. 46.

Dilutive Shares

Basic earnings per share applicable to common stock are based on the weighted average number of common shares outstanding and vested during the penod reported. Diluted earnings per share include the effect of potential issuances of common shares resulting from the assumed vesting of all outstanding restricted share units (RSU) and exercise of all outstanding stock options issued pursuant to the terms of our stock-based compensation plans. The dilutive effect of stock-based compensation plans. The dilutive effect of stock-based compensation plans is computed using the treasury stock method. The number of potential dilutive securities was 676,329 shares for 2002, 963,749 shares for 2001 and 629,016 shares for 2000. The potentially dilutive securities for 2002 and 2001 were not included in the computation of diluted earnings per share, since to do so would have been antidilutive.

Diluted earnings per share amounts shown in the accompanying financial statements reflect the inclusion of non-vested restricted share awards and the effect of stock options outstanding. The following represents a reconciliation of the weighted average number of common shares outstanding for basic and dilutive purposes.

Year Ended December 31,	2002	2001	2000
Denominator for Basic and Diluted Earnings Per	Share:		
Denominator for basic earnings per share - weighted average shares ⁶⁰	71,731,580	70,649,969	68,962,245
Restricted share awards	_	-	629,016
Denominator for diluted earnings per share - weighted average shares	71,731,580	. 70,649,969	69,591,261
⁶⁰ The amounts in the table above do not inclu Protection One.	de shares own	ed by Westar	Industries or

Supplemental Cash Flow Information

Cash paid for interest and income taxes for each of the three years ended December 31, are as follows:

	2002	2001	2000
Cash Paid For:		(in Thousands)	
Interest on financing activities,			
net of amount capitalized	\$274,859	\$256,764	\$261,720
Income taxes	741	6,162	29,682
Non-Cash Financing Transactions:			
Issuance of stock to subsidiary (Note 20) .	86,870	364,035	-

Reclassifications

Certain amounts in prior years have been reclassified to conform with classifications used in the current year presentation.

đ

3. RATE MATTERS AND REGULATION

KCC Rate Proceedings

On November 27, 2000, Westar Energy and KGE filed applications with the KCC for an increase in retail rates. On July 25, 2001, the KCC ordered an annual reduction in our combined electric rates of \$22.7 million, consisting of a \$41.2 million reduction in KGE's rates and an \$18.5 million increase in Westar Energy's rates.

On August 9, 2001, Westar Energy and KGE filed petitions with the KCC requesting reconsideration of the July 25, 2001 order. The petitions specifically asked for reconsideration of changes in depreciation, reductions in rate base related to deferred income taxes associated with the KGE acquisition premium and a deferred gain on the sale and leaseback of LaCygne 2, wholesale revenue imputation and several other issues. On September 5, 2001, the KCC issued an order in response to our motions for reconsideration that increased Westar Energy's rates by an additional \$7.0 million. The \$41.2 million rate reduction in KGE's rates remained unchanged. On November 9, 2001, we filed an appeal of the KCC decisions with the Kansas Court of Appeals in an action captioned "Western Resources, Inc. and Kansas Gas and Electric Company vs. The State Corporation Commission of the State of Kansas" On March 8, 2002, the Court of Appeals upheld the KCC orders. On April 8, 2002, we filed a petition for review of the decision of the Court of Appeals with the Kansas Supreme Court. Our petition for review was denied on June 12, 2002.

KCC Orders and Debt Reduction and Restructuring Plan

November 8, 2002 KCC Order

On November 8, 2002, the KCC issued an order addressing our proposed financial plan presented to the KCC on November 6, 2001 and subsequently amended on January 29, 2002. The order contained the following findings and directions:

- The order directed us to reverse certain transactions, including reversing certain intercompany accounting entries so certain capital contributions by us to Westar Industries are reflected as an intercompany payable owed by Westar Industries to us, and reversing all transactions in 2002 recorded as equity investments by us in Westar Industries so such transactions are reflected as intercompany payables owed by Westar Industries to us.
- The order directed us to submit a plan within 90 days for restructuring our organizational structure so that our KPL electric utility business operating as a division of us is placed in a separate subsidiary. The plan required us to include the process for restructuring, an analysis of whether the restructuring is consistent with our present debt indentures and loan agreements, and if not, the necessary amendments to proceed with the restructuring. The restructuring plan was required to be accompanied by an updated cost allocation manual to track costs and investments attributable to our regulated electric utility and non-regulated activities Following approval of the restructuring plan and the updated cost allocation manual, we will be required to provide the KCC with separate quarterly financial statements for us and our electric utility operations We filed a plan with the KCC on February 6, 2003 as discussed below in "- February 6, 2003 Debt Reduction and Restructuring Plan"
- The order directed us to provide a written explanation if the amount of debt secured by utility assets that we transfer to the new utility subsidiary exceeds \$1 5 billion

- The order directed us to reduce our consolidated debt, to consider certain actions for reducing our consolidated debt, and to provide expert testimony supporting any decision to reject a suggested action. For the two years beginning on the date we submit our restructuring plan, we are required to reduce utility debt by at least \$100 million annually. The suggested actions include payments of \$100 million each year from internally generated cash flow, the issuance of common stock, the sale of ONEOK stock, a reduction in, or elimination of, our dividend, and the sale of Protection One.
- The order initiated an investigation into the appropriate type, quantity, structure and regulation of the non-utility businesses with which our utility businesses may be affiliated.
- The order established standstill protections requiring that we seek KCC approval before we take certain actions, including making any loan to, investment in or transfer of cash in excess of \$100,000 to a non-utility affihate, entering into any agreement with a non-utility affihiate where the value of goods or services exchanged exceeds \$100,000, investing by us or an affiliate of more than \$100,000 in an existing or new non-utility business, transferring any non-cash assets or intellectual property to any non-utility affiliate, issuing any debt, or selling any ONEOK stock without complying with the requirements of a July 9, 2002 KCC order. In addition, we must charge interest to non-utility affiliates at the incremental cost of their debt on outstanding balances of any existing or future interaffiliate loans, receivables or other cash advances due us. These restrictions apply both to us and our KGE subsidiary.

On November 25, 2002, we filed a motion for reconsideration and clarification of some provisions of the order. In response, the KCC issued an order on December 23, 2002 as discussed below

December 23, 2002 KCC Order

On December 23, 2002, the KCC issued an order modifying the requirements of the November 8, 2002 order concerning creation of a utility-only subsidiary and filing of a financial plan. The order directed that no later than August 1, 2003, our KPL utility division must be held within a utility-only subsidiary. The consolidated debt for all of our utility businesses, the KPL utility division and KGE, shall not exceed \$1.67 billion.

February 6, 2003 Debt Reduction and Restructuring Plan

On February 6, 2003, we filed a Debt Reduction and Restructuring Plan (the Debt Reduction Plan) with the KCC outlining our plans for paying down debt and restructuring the company. The Debt Reduction Plan detailed items that have already been accomplished, including, among other things, that:

- Consistent with the KCC's prior orders, we have terminated certain agreements and reversed certain intercompany transactions that might have prevented or impeded returning to being a stand-alone electric utility
- We have sold a portion of our ONEOK stock and raised \$300 million, the net proceeds of which we anticipate using to repurchase or provide for the repayment of all of the 6 25% senior unsecured notes that have a final maturity of August 15, 2018 and are putable and callable on August 15, 2003 (the putable/callable notes) and a portion of our 6 875% senior unsecured notes
- Our board of directors has established a dividend policy that reduced our quarterly common dividend by 37% to a dividend rate of \$0 19 per share for the first quarter of 2003

In addition, the Debt Reduction Plan calls for

- The sale of Protection One Europe
- The sale of our interest in Protection One.
- The sale of all of our remaining shares of ONEOK preferred stock (21.8 million shares) and common stock (4 7 million shares) We anticipate that all remaining ONEOK securities will be liquidated by year-end 2004
- The sale of other non-core and non-utility assets. We intend to dispose of these assets in an orderly fashion While not expected to be significant in the Debt Reduction Plan, net proceeds from these dispositions will also be used for debt reduction
- The potential issuance of equity securities in the second half of 2004, if needed to further reduce debt, following the disposition of all material non-utility and non-core assets.

February 10, 2003 KCC Order

On February 10, 2003, the KCC issued an order granting limited reconsideration of its December 23, 2002 order The KCC stayed the requirement of the December 23, 2002 order that we form a utilityonly subsidiary The KCC also stated that the Debt Reduction Plan appears to make a good-faith effort to address the concerns expressed in the KCCs prior orders and that the KCC needed additional time to review the Debt Reduction Plan prior to addressing other issues raised in our petition for reconsideration of the December 23, 2002 order.

The KCC staff and other parties to the KCC docket considering the Debt Reduction Plan have filed comments on the Debt Reduction Plan. The KCC has not yet established a procedural schedule for considering the Debt Reduction Plan and the related comments. We are unable to predict what action the KCC will take with respect to the Debt Reduction Plan

March 11, 2003 KCC Order

On March 11, 2003, the KCC issued an order conditionally approving a partial supulation entered into by us, Protection One and certain parties in the KCC docket considering the Debt Reduction Plan The order, among other things, (a) authorized us to make a payment to Protection One of approximately \$20 million for the 2002 tax year under the tax sharing agreement with Protection One, (b) authorized Westar Industnes to extend the matunty date of the credit facility it provides to Protection One to January 5, 2005, (c) reduced the amount that may be advanced to Protection One under the credit facility to \$228.4 million, (d) authorized us to pay approximately \$1.0 million to Protection One as reimbursement for information technology services provided to us, and related costs incurred, by a subsidiary of Protection One, and (e) authorized us to pay approximately \$3.4 million to Protection One as reimbursement for aviation services provided by a subsidiary of Protection One and for the repurchase of the stock of the subsidiary The March 11, 2003 KCC order is filed as Exhibit 99(1) to this Annual Report on Form 10-K and incorporated herein by reference.

FERC Proceeding

On September 6, 2002, we filed an application with the Federal Energy Regulatory Commission (FERC) seeking authorization to

issue unsecured long-term debt securities, on or before October 31, 2004, in an amount not to exceed \$650 million at any one time. On February 20, 2003, FERC approved our request subject to certain conditions and also issued generic industry wide guidelines for future debt financings On March 14, 2003, we informed FERC that we do not intend to issue any debt securities pursuant to the authority granted on February 20, 2003.

4. CHANGES IN ONEOK OWNERSHIP

On January 9, 2003, we announced that Westar Industries had entered into an agreement with ONEOK to sell ONEOK a portion of the shares of ONEOK Series A Convertible Preferred Stock held by Westar Industries at the prevailing market price, less transaction costs, and to exchange Westar Industries' remaining shares of Series A Convertible Preferred Stock for new shares of ONEOK Series D Non-Cumulative Convertible Preferred Stock. On February 5, 2003, ONEOK repurchased from Westar Industries 9,038,755 shares of its Series A Convertible Preferred Stock, which were convertible into 18,077,511 shares of common stock. We received \$300 million as a result of this sale.

Westar Industnes also exchanged its remaining shares of Senes A Convertible Preferred Stock for 21,815,386 new shares of ONEOKs Senes D Convertible Preferred Stock. ONEOK has agreed to file a shelf registration statement covering the Senes D Convertible Preferred and common stock held by Westar Industries under the Securities . Act of 1933. Future sales will be subject to conditions including the effectiveness of such registration, the required waiver or expiration of a 180-day lock-up period ending on July 22, 2003, and future market conditions As of March 14, 2003, Westar Industries holds an approximate 27.5% ownership interest in ONEOK assuming conversion of the Senes D Convertible Preferred Stock.

The Series D Convertible Preferred Stock has substantially the same terms as the Series A Convertible Preferred Stock, except that:

- The Senes D Convertible Preferred Stock has a fixed quarterly cash dividend of 23.125 cents per share, as declared by ONEOK's board of directors;
- The Series D Convertible Preferred Stock is transferable to a third party as convertible preferred stock;
- The Senes D Convertible Preferred Stock is redeemable by ONEOK at any time after August 1, 2006 in the event that the closing price of ONEOK common stock exceeds \$25 for 30 consecutive trading days after such date, at a per share redemption price of \$20;
- Each share of Series D Convertible Preferred Stock is convertible into one share of ONEOK common stock, subject to adjustment for stock splits, stock dividends, reverse stock splits or any transaction with comparable effects; and
- Westar Industnes may not convert any shares of Senes D Convertible Preferred Stock held by it unless the annual per share dividend for the ONEOK common stock for the previous year is greater than 92 5 cents per share and such conversion would not subject us, Westar Industries nor ONEOK to the Public Utility Holding Company Act of 1935

潮

504120910

r N

We, Westar Industries and ONEOK also agreed to amend the terms of the existing Shareholder Agreement (Shareholder Agreement) and Registration Rights Agreement. Under the new agreements:

- Westar Industries is prohibited from acquiring any additional securities of ONEOK.
- Westar Industries may make private sales of shares as long as each sale involves less than 5% of ONEOK's outstanding common shares (assuming conversion of the Senes D Convertible Preferred Stock to be sold) and is made to an owner of less than 5% of ONEOK's outstanding common shares. Westar Industries may make public sales in any broad underwritten offering under the shelf registration statement to be filed by ONEOK within 60 days of the agreement, and has piggy-back registration rights.
- Westar Industries has the nght to designate one ONEOK board member. Our designee will not have the nght to sit on any committee of ONEOKs board of directors. We have also agreed to vote in favor of the election of all candidates for director nominated by ONEOKs board of directors.
- Westar Industries is not obligated to sell into stock repurchases by ONEOK.
- The new Shareholder Agreement will terminate if our or any affiliates
- beneficial ownership falls below 10% of ONEOK's outstanding common shares (assuming conversion of the Senes D Convertible Preferred into ONEOK common stock).
- The top-up rights, dilutive issuance rights and buy/sell option provided for in the previous Shareholder Agreement were eliminated in the new agreement.

In 2002 and prior periods, we accounted for our ONEOK common stock investment under the equity method of accounting. During 2003, we will account for our ONEOK common stock investment as an available-for-sale security under SFAS No 115, "Accounting for Certain Investments in Debt and Equity Securities," and mark to market its fair value through other comprehensive income. We will begin accounting for our ONEOK Series D Convertible Preferred Stock investment under this method if and when a public market for these securities develops.

5. ACCOUNTS RECEIVABLE

Our accounts receivable on our consolidated balance sheets are comprised as follows:

As of December 31,	2002	2001
	(in Tho	usands)
Gross accounts receivable	\$180,410 (19,868) 44,205 (110,000)	\$173,175 (19,082) 42,731 (100,000)
Accounts receivable, net	\$ 94,747	\$ 96,824

On July 28, 2000, Westar Energy and KGE entered into an agreement under which we transfer an undivided percentage ownership interest in a revolving pool of our accounts receivable arising from the sale of electricity to a multi-seller conduit administered by an independent financial institution through the use of a special purpose entity (SPE). We account for this transfer as a sale in accordance with SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities." The agreement was amended on July 25, 2002 and is annually renewable upon agreement by all parties. The amendment to the agreement extended the term until July 23, 2003 and limited the amount of the accounts receivable we had a right to sell during certain periods to \$125 million.

Under the terms of the agreement, Westar Energy and KGE may transfer accounts receivable to the bankruptcy-remote SPE, and the conduit must purchase from the SPE an undivided ownership interest of up to \$125 million in those receivables. The SPE has been structured to be legally separate from us, but it is wholly owned and consolidated. The percentage ownership interest in receivables purchased by the conduit may increase or decrease over time, depending on the characteristics of the SPE's receivables, including delinquency rates and debtor concentrations.

Under the terms of the agreement, the conduit pays the SPE the face amount of the undivided interest at the time of purchase. Subsequent to the initial purchase, additional interests are sold and collections applied by the SPE to the conduit, resulting in an adjustment to the outstanding conduit interest.

We record administrative expense on the undivided interest owned by the conduit, which was \$2.9 million for the year ended 2002, \$5.4 million for the year ended 2001 and \$3.7 million for the year ended 2000. These expenses are included in other income (expense) in our consolidated statements of income.

The outstanding balance of SPE receivables was \$48.2 million at December 31, 2002 and \$43.3 million at December 31, 2001, which is net of an undivided interest of \$110.0 million and \$100.0 million, respectively, in receivables sold by the SPE to the conduit. Our retained interest in the SPE's receivables is reported at fair value and is subordinate to, and provides credit enhancement for, the conduit's ownership interest in the SPE's receivables. Our retained interest is available to the conduit to pay any fees or expenses due to the conduit and to absorb all credit losses incurred on any of the SPE's receivables. The retained interest is included in accounts receivable, net, in our consolidated balance sheets.

A termination event will be triggered under the terms of the agreement if Westar Energy's credit rating ceases to be at least BB- by Standard & Poor's Ratings Group (S&P) or if the issuer credit rating for Westar Energy ceases to be at least Ba3 by Moody's Investors Service (Moody's). If a termination event were to occur, the administrative agent would be required to give notice to us at least five business days prior to a termination of the facility. This notice provision allows for the administrative agent to waive the termination event by not giving notice or, in the event notice is given, allows us to repay the facility.

i

6. FINANCIAL INSTRUMENTS, ENERGY TRADING AND RISK MANAGEMENT

Values of Financial Instruments

The carrying values and estimated fair values of our financial instruments are as follows:

	Carryin	g Value	Fair Value				
As of December 31,	2002	2001	2002	2001			
	(in Thousands)						
Fixed-rate debt, net of		•					
current maturities ⁴⁴	\$2,354,488	\$2,323,935	\$2,290,141	\$2,135,595			
Other mandatorily							
redeemable securities ^(a)	214,505	220,000	133,829	190,960			

⁶⁰ Fair value is estimated based on quoted market prices for the same or similar issues or on the current rates offered for instruments of the same remaining maturities and redemption provisions.

The recorded amounts of accounts receivable and other current financial instruments approximate fair value. Cash and cash equivalents, short-term borrowings and variable-rate debt are carried at cost, which approximates fair value and are not included in the table above.

The fair value estimates presented herein are based on information available at December 31, 2002 and 2001. These fair value estimates have not been comprehensively revalued for the purpose of these consolidated financial statements since that date and current estimates of fair value may differ significantly from the amounts presented herein.

Derivative Instruments and Hedge Accounting

Our operations are exposed to market risks from changes in commodity prices, foreign currency exchange rates, interest rates and equity prices that could affect our results of operations and financial condition. We manage our exposure to these market risks through our regular operating and financing activities and, when deemed appropriate, hedge a portion of these risks through the use of derivative financial instruments. We use the term hedge to mean a strategy designed to manage risks of volatility in prices or rate movements on some assets, liabilities or anticipated transactions by creating a relationship in which gains or losses on derivative instruments are expected to counterbalance the losses or gains on the assets, liabilities or anticipated transactions exposed to such market risks. We use derivative instruments as risk management tools consistent with our business plans and prudent business practices and for energy trading purposes.

We use derivative financial and physical instruments primarily to manage risk as it relates to changes in the prices of commodities including natural gas, oil, coal and electricity and changes in interest rates. We also use derivative instruments for trading purposes in order to take advantage of favorable price movements and market timing activities in the wholesale power and fossil fuel markets. Derivative instruments used to manage commodity price risk inherent in fossil fuel and electricity purchases and sales are classified as energy trading contracts on our consolidated balance sheets Energy trading contracts representing unrealized gain positions are reported as assets; energy trading contracts representing unrealized loss positions are reported as liabilities

Energy Trading Activities

We engage in both financial and physical trading to manage our commodity price risk. We trade electricity, coal, natural gas and oil. We use a variety of financial instruments, including forward contracts, options and swaps and trade energy commodity contracts daily. We also use hedging techniques to manage overall fuel expenditures. We procure physical product under fixed price agreements and spot market transactions.

Within the trading portfolio, we take certain positions to hedge a portion of physical sale or purchase contracts and we take certain positions to take advantage of market trends and conditions. Changes in value are reflected in our consolidated statements of income. We believe financial instruments help us manage our contractual commitments, reduce our exposure to changes in cash market prices and take advantage of selected market opportunities. We refer to these transactions as energy trading activities.

We are involved in trading activities primarily to reduce risk from market fluctuations, capitalize on our market knowledge and enhance system reliability. Net open positions exist, or are established, due to the origination of new transactions and our assessment of, and response to, changing market conditions. To the extent we have open positions, we are exposed to the risk that changing market prices could have a material, adverse impact on our financial position or results of operations.

We have considered a number of risks and costs associated with the future contractual commitments included in our energy portfolio. These risks include credit risks associated with the financial condition of counterparties, product location (basis) differentials and other risks. Declines in the creditworthiness of our counterparties could have a material adverse impact on our overall exposure to credit risk. We maintain credit policies with regard to our counterparties that, in management's view, reduce overall credit risk.

We are also exposed to commodity price changes outside of trading activities We use derivatives for non-trading purposes and a mix of various fuel types primarily to reduce exposure relative to the volatility of market and commodity prices. The wholesale power market is extremely volatile in price and supply. This volatility impacts our costs of power purchased and our participation in power trades. If we were unable to generate an adequate supply of electricity for our native load customers, we would purchase power in the wholesale market to the extent it is available or economically feasible to do so and/or implement curtailment or interruption procedures as allowed for in our tariffs and terms and conditions of service. To the extent open positions exist in our power marketing portfolio, we are exposed to changing market prices that may adversely impact our financial position and results of operations. The increased expenses or loss of revenues associated with this could be material and adverse to our consolidated results of operations and financial condition. Due to the volatility of power market and gas prices, past prices cannot be used to predict future prices

ą

We use a mix of various fossil fuel types, including coal, natural gas and oil, to operate our system, which helps lessen our risk associated with any one fuel type. A significant portion of our coal requirements are under long-term contract, which removes most of the price risk associated with this commodity type. Due to the volatility of natural gas prices, we have begun to increasingly utilize our ability to switch to lower cost fuel types as the market allows.

Additional factors that affect our commodity price exposure are the quantity and availability of fuel used for generation and the quantity of electricity customers will consume. Quantities of fossil fuel used for generation could vary dramatically year to year based on the particular fuel's availability, price, deliverability, unit outages and nuclear refueling. Our customers' electricity usage could also vary dramatically year to year based on weather or other factors.

Although we generally attempt to balance our physical and financial contracts in terms of quantities and contract performance, net open positions typically exist. We will at times create a net open position or allow a net open position to continue when we believe that future price movements will increase the portfolio's value. To the extent we have an open position, we are exposed to changing market prices that could have a maternal adverse impact on our financial position or results of operations.

The prices we use to value price risk management activities reflect our estimate of fair values considering various factors, including closing exchange and over-the-counter quotations, time value of money and price volatility factors underlying the commitments. We adjust prices to reflect the potential impact of liquidating our position in an orderly manner over a reasonable period of time under present market conditions. We consider a number of risks and costs associated with the future contractual commitments included in our energy portfolio, including credit risks associated with the financial condition of counterparties and the time value of money. We continuously monitor the portfolio and value it daily based on present market conditions.

Future changes in our creditworthiness and the creditworthiness of our counterparties may change the value of our portfolio We adjust the value of contracts and set dollar limits with counterparties based on our assessment of their credit quality.

We use derivative financial instruments to reduce our exposure to certain fluctuations in some commodity prices, interest rates, and other market risks. When we enter into a financial instrument, we formally designate and document the instrument as a hedge of a specific underlying exposure, as well as the risk management objectives and strategies for undertaking the hedge transaction. Because of the high degree of correlation between the hedging instrument and the underlying exposure being hedged, fluctuations in the value of the derivative instruments are generally offset by changes in the value or cash flows of the underlying exposures being hedged.

We record derivatives used for hedging commodity price risk in our consolidated balance sheets at fair value as energy trading contracts.

The effective portion of the gain or loss on a derivative instrument designated as a cash flow hedge is reported as a component of accumulated other comprehensive income (loss). This amount is reclassified into earnings in the period during which the hedged transaction affects earnings. Effectiveness is the degree to which gains and losses on the hedging instruments offset the gains and losses on the hedged item. The ineffective portion of the hedging relationship is recognized currently in earnings.

The fair values of derivatives used to hedge or modify our risks fluctuate over time. These fair value amounts should not be viewed in isolation, but rather in relation to the fair values or cash flows of the underlying hedged transactions and the overall reduction in our risk relating to adverse fluctuations in interest rates, commodity prices and other market factors. In addition, the net income effect resulting from our derivative instruments is recorded in the same line item within our consolidated statements of income as the underlying exposure being hedged. We also formally assess, both at the inception and at least quarterly thereafter, whether the financial instruments that are used in hedging transactions are effective at offsetting changes in either the fair value or cash flows of the related underlying exposures. Any ineffective portion of a financial instrument's change in fair value is immediately recognized in net income.

Hedging Activities

During the third quarter of 2001, we entered into hedging relationships to manage commodity price risk associated with future natural gas purchases in order to protect us and our customers from adverse price fluctuations in the natural gas market. Initially, we entered into futures and swap contracts with terms extending through July 2004 to hedge price risk for a portion of our anticipated natural gas fuel requirements for our generation facilities. We have designated these hedging relationships as cash flow hedges in accordance with SFAS No. 133.

In 2002, due to the increased availability of our coal units and because we began burning more oil as use of oil became more economically favorable than gas, we did not burn our forecasted amount of natural gas. In September 2002, we determined that we had over-hedged approximately 12,000,000 MMBtu for the remaining period of the hedge. As a result of the discontinuance of this portion of the cash flow hedge, we recognized a gain in earnings of \$4.0 million. We are currently forecasting that we need a notional volume of 7,000,000 MMBtu for the remainder of the hedged period through July 2004.

Effective October 4, 2001, we entered into a \$500 million interest rate swap agreement with a term of two years. At that time, the effect of the swap agreement was to fix the annual interest rate on the term loan at 6.18%. In June 2002, we refinanced the term loan associated with this swap, which increased the effective rate of the swap to 6.43% At December 31, 2002, the variable rate in effect for the term loan was 4.40%. Changes in the fair value of this cash flow hedge are due to fluctuations in the variable interest rate.

6

The following table summarizes the effects our natural gas hedge and our interest rate swap had on our financial position and results of operations for the year ended December 31, 2002.

	Natural gas Hedge ^{ee}	Interest Rate Swap	Total Cash Flow Hedges
	(Do	illars in Thousands)	
Fair value of derivative instruments			
Current	. \$ 4,198	\$ 8,762	\$12,960
Long-term	1,476		1,476
Total	\$ 5,674	\$ 8,762	\$14,436
Change in amounts in accumulated			
other comprehensive income	\$25,571	\$(6,106)	\$19,465
Adjustment for losses included			
in net income	1,992	-	1,992
Change in estimated income			
tax expense (benefit)	(10,964)	2,428	(8,536)
Net Comprehensive (Gain) Loss	\$16,599	\$(3,678)	\$12,921
Antiopated reclassifications to earnings in the next 12 months ⁶⁴	\$ 4,198	\$ 8,762	\$12,960
Duration of hedge designation as of December 31, 2002	19 months	10 months	_

⁶⁰ Natural gas hedge assets and habilities are classified in the balance sheet as energy trading contracts Due to the volatility of gas commodity prices, it is probable that gas prices will increase and decrease over the remaining 19 months that these relationships are in place

⁶⁰ The actual amounts that will be reclassified to earnings could vary materially from this estimated amount due to changes in market conditions.

Fair Value of Energy Trading Contracts

The tables below show fair value of energy trading contracts outstanding for the year ended December 31, 2002, their sources and matunty periods:

	Fair Value of Contracts
	(in Thousands)
Net fair value of contracts outstanding at the beginning of the period Less contracts realized or otherwise settled during the period	47 444
Plus fair value of new contracts entered into during the period	. 24,478
Fair value of contracts outstanding at the end of the period	\$ 9,643

These contracts were valued through market exchanges and, where necessary, broker quotes and industry publications. The sources of the fair values of the financial instruments related to these contracts are summarized in the following table:

	Fair Value of Contracts at End of Period

Effects of Accounting Changes — Accounting for Energy Trading Contracts

In October 2002, the FASB, through the EITF, issued Issue No. 02-03, which rescinded Issue No. 98-10, "Accounting for Contracts Involved in Energy Trading and Risk Management Activities." As a result, all new contracts that would otherwise have been accounted for under Issue No. 98-10 and that do not fall within the scope of SFAS No. 133 can no longer be marked-to-market and recorded in earnings as of October 25, 2002. We are not affected by this change in accounting principle and are not required to reclassify any of our contracts. EITF Issue No. 02-03 also requires that energy trading contracts and derivatives, whether settled financially or physically, be reported in the income statement on a net basis effective January 1, 2003. We began to classify our energy trading contracts on a net basis during the third quarter of 2002.

On July 1, 2002, we began reporting mark-to-market gains and losses on energy trading contracts on a net basis, whether realized or unrealized, in our consolidated income statements. Prior to July 1, 2002, we reported gains on these contracts in sales and losses in cost of sales in our consolidated income statements. The changes are reflected in our consolidated financial statements for the year ended December 31, 2002. Prior periods shown in our consolidated financial statements have been reclassified to reflect the effect of this change and to be comparable as required by GAAP. As a result of the net presentation, we expect significant reductions in our energy revenues and expenses from those reported in prior periods, which will not affect gross profit or net income. A summary of the effects of this change for the years ended December 31, 2002, 2001 and 2000 is as follows:

Changes to Income Statements		
Year Ended December 31, 2002	Prior to Reclassifications for Net Presentation	After Reclassifications for Net Presentation
	(In Tho	usands)
Energy sales	\$1,798,971 754,700	\$1,422,899 378,628
Energy gross profit	\$1,044,271	\$1,044,271
Year Ended December 31, 2001	Prior to Reclassifications for Net Presentation	After Reclassifications for Net Presentation
	(în Tha	usands)
Energy sales Energy cost of sales	\$1,706,311 793,210	\$1,307,177 394,076
Energy gross profit	\$ 913,101	\$ 913,101
Year Ended December 31, 2000	Prior to Reclassifications for Net Presentation	After Reclassification for Net Presentation
	(în The	pusands)
Energy sales	\$1,829,133 850,018	\$1,359,522 380,407

⁶⁰ We also received approximately \$40 million of preferred and common dividends in 2002, 2001 and 2000. ONEOK equity earnings for 2001 were lower due to charges recorded for Enron Corp exposure and for certain regulatory issues ONEOK had in Oklahoma.

The following is summarized unaudited ONEOK financial information related to our investment in ONEOK:

As of December 31,		2002	2001
		(in Tho	usands)
Balance Sheet			
Current assets		\$1,626,648	\$1,542,767
Non-current assets		4,104,210	4,310,533
Current liabilities		1,720,708	1,792,558
Long-term debt, net		1,511,118	1,498,012

Revenues	\$2,104,280	\$1,915,941	\$1,996,179
Gross profit	975,660	826,375	745.652
Income from continuing operations		•	• -
before cumulative effect of a	,		
change in accounting principle	155,976	78,837	137,666
Net income	166,624	101,565	145,607

ONEOK earnings for 2001 include a pretax charge of \$34.6 million for unrecovered gas costs from the winter of 2000-2001 and a \$37.4 million pretax charge related to the Enron Corp. (Enron) bankruptcy. The charge for the outstanding gas costs is a result of the Oklahoma Corporation Commission order denying ONEOK the right to collect a portion of gas costs incurred during the winter of 2000-2001. Gas prices increased significantly in this period due to high demand and a perceived supply shortage. The charges related to Enron's bankruptcy are due to Enron's non-payment of both financial and physical natural gas positions for November and December of 2001.

During 2001, we disposed of 98% of our portfolio of affordable housing tax credit limited partnerships. The net impact of our total investment in these partnerships on our earnings, including equity in earnings, loss on disposal and generated tax credits was a benefit of \$5.3 million.

During 2002, the net impact on our earnings from our remaining investments in affordable housing tax credit limited partnerships was an expense of \$0.4 million

1

The following is a rollforward of the investment in customer accounts (at cost) of the monitored services segment for the following years:

As of December 31,	2002	2001
	(In Thousands)	
Beginning customer accounts, net	\$786,839	\$963,595
Acquisition of customer accounts	16,450	8,300
Amortization of customer accounts	(83,301)	(148,006)
Sale of accounts	(738)	(42,246)
Impairment charges (Note 23)	(338,104)	_
Purchase holdbacks and other	(2,289)	5,196
Ending customer accounts, net	\$378,857	\$786,839

Accumulated amortization of the investment in customer accounts at December 31, 2002 was \$678.9 million and \$614.5 million at December 31, 2001. Customer account amortization expense was \$83.3 million for 2002, \$148.0 million for 2001, and \$158.7 million for 2000.

During 2002, the monitored services segment had a net loss of 62,656 customers or a 5.3% decrease in its customer base from January 1, 2002.

11. SHORT-TERM DEBT

Certain banks provide us a revolving credit facility on a committed basis totaling \$150 million. The facility is secured by KGE's first mortgage bonds and matures on June 6, 2005, provided that if we have not refinanced or provided for the payment of our putable/ callable notes due August 15, 2003, or our 6.875% senior unsecured notes due August 1, 2004, at least 60 days prior to either of the respective due dates, the maturity date is 60 days prior to either of the respective due dates As of December 31, 2002, borrowings on the revolving credit facility were \$1.0 million, leaving \$149 million remaining capacity under this facility. See Note 12 for a discussion of covenants applicable to our credit facilities.

We also had arrangements with certain banks to provide unsecured short-term lines of credit on a committed basis totaling approximately \$7.0 million through December 31, 2002. These lines of credit were canceled on December 31, 2002.

Information regarding our short-term borrowings is as follows:

As of December 31,		2002	2001	
		(Dollars in	Thousands)	
Borrowings outstanding at year end				
Credit agreement and a miscellaneous				
insurance financing arrangement	••••	\$ 2,763	\$222,300

The amount of Westar Energy's first mortgage bonds authonzed by its Mortgage and Deed of Trust, dated July 1, 1939, as supplemented, is unlimited. The amount of KGE's first mortgage bonds authonzed by the KGE Mortgage and Deed of Trust, dated April 1, 1940, as supplemented, is limited to a maximum of \$2 billion, unless amended. First mortgage bonds are secured by utility assets. Amounts of additional bonds that may be issued are subject to property, earnings and certain restrictive provisions of each mortgage. As of December 31, 2002, \$70.4 million principal amount of additional first mortgage bonds could be issued under the most restrictive provisions in Westar Energy's mortgage, except in connection with refundings. As of December 31, 2002, approximately \$302.5 million principal amount of additional KGE first mortgage bonds could be issued under the most restrictive provisions in the mortgage.

Protection One Europe has recognized as a financing transaction cash received through the sale of security equipment and future cash flows to be received under security equipment operating lease agreements with customers to a third-party financing company.

The indentures governing all of Protection One's debt securities require that Protection One offer to repurchase the securities in certain circumstances following a change of control.

Debt Covenants

Our debt financing agreements require, among other restrictions, that we satisfy certain financial covenants. These debt instruments contain restrictions based on EBITDA. The definition of EBITDA varies among the various indentures. EBITDA is generally derived by adding to income (loss) before income taxes, the sum of interest expense and depreciation and amortization expense. However, under the varying definitions of the indentures, additional adjustments are required. A violation of these restrictions would result in an event of default that would allow the lenders to declare all amounts outstanding immediately due and payable. We are in compliance with these covenants. The most restrictive of these covenants in Westar Energy's debt instruments are as follows:

- Consolidated Leverage Ratio: Consolidated total debt to earnings before interest, taxes, depreciation and amortization (EBITDA) for the most recent four consecutive quarters must be less than 6.00 to 1.00 at December 31, 2002 and 5.75 to 1.00 each quarter thereafter until June 2005 At December 31, 2002, our ratio was 5.13.
- Consolidated Interest Coverage Ratio: EBITDA to consolidated interest expense for the most recent four consecutive quarters must be greater than 2.00 to 1.00. At December 31, 2002, our ratio was 2.54.
- Consolidated Debt to Total Capital Ratio: Consolidated total debt to consolidated total capital for the most recent quarter must be less than 0 65 to 1 00 At December 31, 2002, our ratio was 0 618.

The indentures governing Protection One's public indebtedness require it to satisfy certain financial covenants in order to borrow additional funds. At December 31, 2002, Protection One was in compliance with the covenants under its debt instruments. The most restrictive of these covenants in Protection One's debt instruments are as follows:

- Total Debt to EBITDA Ratio: Total debt to annualized EBITDA for the most recent quarter must be less than 6.0 to 1.0. For the quarter ended December 31, 2002, the ratio was 4.0 to 1.0.
- EBITDA to Interest Expense Ratio: EBITDA to Interest expense for the most recent quarter must be greater than 2.25 to 1.0. For the quarter ended December 31, 2002, the ratio was 3.1 to 1.0.
- Senior Debt to EBITDA Ratio: Senior debt to annualized EBITDA for the most recent quarter must be less than 4.0 to 1.0. For the quarter ended December 31, 2002, the ratio was 2.9 to 1.0.

The indentures contain other covenants that impose operational restrictions on Protection One that are not as burdensome to Protection One as those listed above, and none are based on credit ratings. A violation of the indenture covenants would result in an event of default that would allow the lenders to declare all amounts outstanding immediately due and payable.

Following a change of control of Protection One, its revolving credit facility provided by Westar Industries becomes due in full. The holders of Protection One's senior subordinated discount notes and convertible notes have an optional redemption at approximately 101% of par, and holders of Protection One's senior notes and senior subordinated notes have an optional redemption at 101% of par if a change in control is coupled with two ratings downgrades.

Maturities

Matunties of long-term debt as of December 31, 2002 are as follows:

^(a) Includes \$135 million in debt for which funds have been irrevocably deposited with the bond trustee to provide for repayment of an obligation.

⁶⁰ In addition, we are required by a KCC order to reduce utility debt by at least \$100 million annually in each of the next two years

Our interest expense on long-term debt was \$229.5 million in 2002, \$220 2 million in 2001 and \$218.3 million in 2000.

13. DEBT FINANCINGS

On May 10, 2002, we completed offerings for \$365 million of our first mortgage bonds and \$400 million of our unsecured senior notes. both of which will be due on May 1, 2007. The first mortgage bonds bear interest at an annual rate of 7 7/8% and the unsecured senior notes bear interest at an annual rate of 9 3/4% Interest on the first mortgage bonds and unsecured senior notes is payable semi-annually on May 1 and November 1 of each year. The net proceeds from these offerings were used to repay outstanding indebtedness of \$547 million under our existing secured bank term loan, provide for the repayment of \$100 million of our 7.25% first mortgage bonds due August 15, 2002 together with accrued interest, reduce the outstanding balance on our existing secured revolving credit facility and pay fees and expenses of the transactions. In conjunction with our May 10, 2002 financing, we amended our secured revolving credit facility to reduce the total commitment under the facility to \$400 million from \$500 million and to release \$100 million of our first mortgage bonds from collateral

On June 6, 2002, we entered into a secured credit agreement providing for a \$585 million term loan and a \$150 million revolving credit facility, each maturing on June 6, 2005, provided that if we have not refinanced or provided for the payment of our putable/callable notes due August 15, 2003, or our 6.875% senior unsecured notes due August 1, 2004, at least 60 days prior to either of the respective due dates, the maturity date is the date 60 days prior to either of the respective due dates. All loans under the credit agreement are secured by KGE's first mortgage bonds. The proceeds of the term loan were used to retire an existing \$400 million revolving credit facility with an outstanding principal balance of \$380 million, to provide for the repayment at maturity of \$135 million principal amount of KGE first mortgage bonds due December 15, 2003 together with accrued interest, to repurchase approximately \$45 million of our outstanding unsecured notes and to pay customary fees and expenses of the transactions.

We will continue to report as outstanding debt on our consolidated balance sheet the \$135 million principal amount of KGE first mortgage bonds due December 15, 2003, until the funds that have been irrevocably deposited with the trustee are used to retire such bonds at maturity. The cash deposited with the trustee is included in our consolidated balance sheet as part of restricted cash and can only be used for the purpose of repaying this indebtedness and related interest. In August 1998, we entered into a call option with an investment bank related to the issuance of \$400 million of our putable/callable notes. This call option is required to be settled by August 2003 through either a cash payment or a remarketing or refinancing of the putable/callable notes. The ultimate value of the call option will be based on the difference between the 10-year United States treasury rate on August 12, 2003 and 5 44% If the 10-year United States treasury rate on August 12, 2003 is less than 5.44%, we will have a liability to the investment bank at that time. At December 31, 2002, our potential hability under the call option was \$62.2 million. Based on the 10-year forward treasury rate on March 14, 2003 of 3.91%, we would be obligated to make a cash payment of approximately \$69.1 million to settle the call option if we did not remarket or refinance the notes. The amount of our hability will increase or decrease approximately \$5 million for every 10-basis point change in the 10-year forward treasury rate. If settled through a remarketing or refinancing, any liability related to the call option will be amortized as a credit to interest expense over the term of the new debt. The investment bank will price the notes to yield a market premium adequate to allow the investment bank to retain proceeds equal to the fair value of the call option at settlement.

At the time of issuance of the notes in 1998, we were not required by GAAP to account separately for the call option. However, when we began returing these notes as a part of our overall debt reduction strategy, the portion of the call option associated with the retired notes became a free-standing option required to be treated as a derivative instrument under SFAS No. 133. In addition, under SFAS No. 133, we are required to mark to market changes in the anticipated amount of the liability related to the portion of the \$400 million in notes that have been retured so that our balance sheet reflects the current fair value of the free standing portion of the call option. For 2002, we recognized a loss of \$10.1 milhon, net of \$6.7 million tax benefit, related to the fair value of the call option associated with the putable/callable notes at the time the notes were retired. This loss is included in our consolidated statements of income as part of the gain on extinguishment of debt line nem of other income. For 2002, we also recorded an additional non-cash charge of \$13.6 million, net of \$9 0 million tax benefit, to reflect mark to market changes in the fair value of the call option associated with the retired notes. This charge is reflected in the other line item of other income in our consolidated statements of income. In total, the loss recorded related to the fair value of the call option for the year ended December 31, 2002 was \$23.7 million, net of \$15.7 million tax benefit.

j,

15. EMPLOYEE BENEFIT PLANS

Pension

We maintain qualified noncontributory defined benefit pension plans covering substantially all utility employees. Pension benefits are based on years of service and the employee's compensation during the five highest paid consecutive years out of ten before retirement. Our policy is to fund pension costs accrued, subject to limitations set by the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code. We also maintain a non-qualified Executive Salary Continuation Plan for the benefit of certain officers.

Post-retirement Benefits

We accrue the cost of post-retirement benefits, primarily medical benefit costs, during the years an employee provides service.

The following tables summarize the status of our pension and other post-retirement benefit plans:

,	Pension E	lenefits	Post-retireme	nt Benefits

In selecting an assumed discount rate, fixed income security yield rates for 30-year Treasury bonds and corporate high-grade bond yields are considered. The assumed rate of return on plan assets is based on long-term returns forecast for the type of investments held by the plan.

Pension plan assets are primarily made up of equity and fixed income investments. The market value of the plan assets has been affected by declines in equity markets. At December 31, 2002, the fair value of pension plan assets was \$382.3 million. Actual return on plan assets declined by approximately \$2.1 million during 2001 and by approximately \$58.5 million during 2002. Absent a substantial recovery in the equity markets, pension costs, cash funding requirements and the additional pension liability could substantially increase in future years.

For measurement purposes, an annual health care cost growth rate of 10% was assumed for 2002, decreasing by 1% per year to 5% in 2007 and thereafter. The health care cost trend rate has a significant effect on the projected benefit obligation. Increasing the trend rate by 1% each year would increase the present value of the accumulated projected benefit obligation by \$2.2 million and the aggregate of the service and interest cost components by \$0.2 million. A 1% decrease in the trend rate would decrease the present value of the accumulated projected benefit obligation by \$2.2 million and the aggregate of the service and interest cost components by \$0.2 million. A 1% decrease in the trend rate would decrease the present value of the accumulated projected benefit obligation by \$2.2 million and the aggregate of the service and interest cost components by \$0.2 million.

Savings Plans

We maintain savings plans in which substantially all employees participate, with the exception of Protection One and Protection One Europe employees We match employees' contributions up to specified maximum limits. Our contributions to the plans are deposited with a trustee and are invested in one or more funds, including the company

쾳

stock fund at the direction of plan participants Our contributions were \$3.8 million for 2002, \$4.4 million for 2001 and \$3.9 million for 2000.

Under our qualified employee stock purchase plan established in 1999, full-time, non-union employees may purchase designated shares of our common stock at no more than a 15% discounted price. Our employees purchased 46,431 shares in 2002 at an average price of \$8.43 per share. Employees purchased 67,519 shares at an average price of \$14.56 per share in 2001 and employees purchased 249,050 shares at an average price of \$14.00 per share in 2000. A total of 1,250,000 shares of common stock have been reserved for issuance under this program.

Protection One also maintains a savings plan. Contributions are allocated among participants based upon the respective contributions made by the participants through salary reductions during the year. Protection One's matching contributions may be made in Protection One common stock, in cash or in a combination of both stock and cash. Protection One's matching cash contribution to the plan was approximately \$1.1 million for 2002, \$1.1 million for 2001 and \$0.7 million for 2000.

Protection One maintains a qualified employee stock purchase plan that allows eligible employees to acquire shares of Protection One common stock at no more than a 15% discounted price. Employees purchased 151,244 shares in 2002 at an average price of \$1.69 per share. Employees purchased 489,791 shares at an average price of \$0.77 per share in 2001 and 145,523 shares at an average price of \$0.69 per share in 2000. A total of 1,650,000 shares of common stock have been reserved for issuance under this program.

Stock Based Compensation Plans

We have a long-term incentive and share award plan (LTISA Plan), which is a stock-based compensation plan in which utility employees are eligible for awards. The LTISA Plan was implemented as a means to attract, retain and motivate employees and board members (plan participants). Under the LTISA Plan, we may grant awards in the form of stock options, dividend equivalents, share appreciation rights, restricted shares, RSUs, performance shares and performance share units to plan participants. Up to five million shares of common stock may be granted under the LTISA Plan. Dividend equivalents accrue on the awarded RSUs Dividend equivalents are the nght to receive cash equal to the value of dividends paid on our common stock.

During 2002, 584,165 RSUs were granted to a broad-based group of over 800 non-union employees. Each RSU represents a right to receive one share of our common stock at the end of the restricted period assuming performance criteria are met. In addition, RSUs linked to 783,400 shares of Protection One common stock and 12,193 shares of Guardian International, Inc. preferred stock held by us were granted to certain officers. During 2001, 579,915 RSUs were granted. Also in 2000, non-union employees were offered the opportunity to exchange their stock options for RSUs of approximately equal economic value. As a result, 2,246,865 stock options were canceled in 2000 in exchange for 614,741 RSUs. The grant of RSUs is shown as a separate component of shareholders' equity Unearned compensation is being amortized to expense over the vesting period. This compensation expense is shown as a separate component of shareholders' equity During the second quarter of 2002, active employees awarded RSUs in prior years were allowed to exchange eligible RSUs for shares of common stock. As a result, approximately 145,000 RSUs were exchanged for approximately 105,000 shares of our common stock. In addition, approximately 317,000 RSUs held by certain executive officers were exchanged for approximately 12,500 shares of Guardian International, Inc. preferred stock held by us. Compensation expense associated with this exchange totaled approximately \$9.0 million for 2002. Also, in September 2002, former employees had the opportunity to convert vested RSUs into common stock. As a result, 34,433 shares of our common stock were issued in exchange for 68,865 RSUs.

Another component of the LTISA Plan is the Executive Stock for Compensation program, where in the past eligible employees were entitled to receive RSUs in lieu of current cash compensation. The Executive Stock for Compensation program was modified in 2001 to pay a portion of current compensation in the form of stock. Although this plan was discontinued, dividends will continue to be paid to plan participants on their outstanding plan balance until distribution. At the end of the deferral period, RSUs are paid in the form of stock. In 2002, plan participants were awarded 12,121 shares of common stock for dividends. In 2001, eligible employees were awarded 31,881 shares of common stock representing \$0.7 million of compensation. In 2000, 95,000 RSUs were awarded in lieu of \$1.3 million in cash compensation. Participants received common stock distributions of 40,097 shares in 2002 and 974 shares in 2001 and 2,978 shares in 2000.

1999	27 8125-32.125	64,000
1998	38 625	69,000
Total outstanding		1,619,868

An equal number of dividend equivalents was issued to recipients of stock options and RSUs. Recipients of RSUs receive dividend equivalents when dividends are paid on shares of company stock. The value of each dividend equivalent related to stock options is calculated by accumulating dividends that would have been paid or payable on a share of company common stock. The dividend equivalents, with respect to stock options, expire after nine years from date of grant. The weighted-average fair value at the grant-date of the dividend equivalents on stock options was \$6.35 in 2002 and \$6.28 in 2001.

The fair value of stock options and dividend equivalents were estimated on the date of grant using the Black-Scholes Option Pricing model. The model assumed the following at December 31, 2000. There were no options granted in 2002 or 2001.

			2000
Dividend yield	 		 6 32%
Expected stock price volatility		••	 16 42%
Risk-free interest rate			 5 79%
Remaining expected option life			 5 years

Protection One Stock Warrants and Options

Protection One has outstanding stock warrants and options that were considered reissued and exercisable upon our acquisition of Protection One on November 24, 1997. The 1997 Long-Term Incentive Plan (the LTIP), approved by the Protection One stockholders on November 24, 1997, provides for the award of incentive stock options to directors, officers and key employees. Under the LTIP, 4.2 million shares of Protection One are reserved for issuance, subject to such adjustment as may be necessary to reflect changes in the number or kinds of shares of common stock or other securities of Protection One The LTIP provides for the granting of options that qualify as incentive stock options under the Internal Revenue Code and options that do not so qualify

Options issued since 1997 have a term of 10 years and vest ratably over 3 years. The purchase price of the shares issuable pursuant to the options is equal to (or greater than) the fair market value of the common stock at the date of the option grant. A summary of warrant and option activity for Protection One common stock from December 31, 2000 through December 31, 2002 is as follows:

As of December 31,	200	2	200	1	2000

On April 16, 2001, Protection One granted an option to purchase an aggregate of 875,000 shares of its common stock to its chief executive officer as part of his employment agreement with Protection One. The option has a term of ten years and vests ratably over three years. The purchase pnce of the shares issuable pursuant to the option is \$1.32 per share while the fair market value of the common stock at the date of the option grant was \$1.79 per share resulting in \$0.4 million in deferred compensation expense amortized over three years. The expense amounts were \$0.1 million and \$0.1 million, respectively, for 2002 and 2001.

The weighted average fair value of options for Protection One stock granted by Protection One estimated on the date of grant was \$1.95 during 2002, \$0 98 during 2001 and \$1.13 during 2000. The fair value was calculated using the following assumptions:

Year Ended December 31,	2002	2001	2000
Expected stock price volatility	91 30%	83.92%	92.97%
Risk free interest rate	5 12%	4 95%	4 88%
Expected option life	7 years	7 years	6 years

On April 16, 2001, Protection One granted an option to purchase an aggregate of 250,000 shares of its common stock to Guardian International, Inc (Guardian), in connection with the hiring of Protection One's chief executive officer, who was formerly the chief executive officer of Guardian The option has a term of ten years and vests ratably over three years The purchase price of the shares

.

1 X

issuable pursuant to the option is \$1.32 per share while the fair market value of the common stock at the date of the option grant was \$1.79 per share resulting in \$0.4 million expense in 2001. On December 31, 2001, all shares were outstanding and none were exercisable. On December 31, 2002, all shares were outstanding and 83,334 shares are exercisable. The shares issued to Guardian are not included in the outstanding options listed in the above tables.

Split Dollar Life Insurance Program

In 1998, we established a split dollar life insurance program for our benefit and the benefit of certain of our executive officers. Under the program, we purchased life insurance policies, which provide the beneficiary a death benefit in an amount equal to the face amount of the policy reduced by the greater of (1) all premiums paid by the company or (ii) the cash surrender value of the policy, which amount, at the death of the executive, will be returned to us. We retam an equity interest in the death benefit and cash surrender value of the policy to secure this repayment obligation

Subject to certain conditions, executive officers may transfer to us their interest in the death benefit based on a predetermined formula. The liability associated with this program was \$12.0 million as of December 31, 2002 and \$18.6 million as of December 31, 2001. The obligations under this program can increase and decrease based on our total return to shareholders and payments to plan participants. This liability decreased approximately \$6.6 million in 2002 due to payments to plan participants, \$0.5 million in 2001 due to balance adjustments, and \$12.8 million in 2000 due primarily to payments to plan participants.

16. INCOME TAXES

Income tax expense (benefit) is composed of the following components at December 31:

	2002	2001	2000
Current income taxes.		(In Thousands)	
	6/1ED 4343	(/34 0/3)	6 30 747

Deferred tax assets and habilities are reflected on our consolidated balance sheets as follows:

December 31,	2002	2001
	(in Tho	usands)
Current deferred tax assets, net	\$	\$ 23,284
Non-current deferred tax liabilities, net	811,879	1,020,993
Net deferred tax habilities	\$814,877	\$ 997,709

In accordance with various rate orders, we have not yet collected through rates certain accelerated tax deductions, which have been passed on to customers. We believe it is probable that the net future increases in income taxes payable will be recovered from customers. We have recorded a regulatory asset for these amounts. These assets are also a temporary difference for which deferred income tax liabilities have been provided. This hability is classified above as deferred future income taxes.

The effective income tax rates set forth below are computed by dividing total federal and state income taxes by the sum of such taxes and net income. The difference between the effective tax rates and the federal statutory income tax rates is as follows:

For the Year Ended December 31,	2002	2001	2000
Effective income tax rate	(48 7)%	(64.0)%	33 9 %
Effect of			
State income taxes	(1 1)	8 0	(60)

17. COMMITMENTS AND CONTINGENCIES

City of Wichita Franchise

KGE's franchise with the City of Wichita to provide retail electric service is effective through December 1, 2003 We are currently negotiating with the City of Wichita for a long-term franchise agreement. There can be no assurance that we can successfully renegotiate the franchise with terms similar, or as favorable, as those in the current franchise. Under Kansas law, KGE will continue to have the nght to serve the customers in Wichita following the expiration of the franchise. Customers within the Wichita metropolitan area account for approximately 21% of our total energy sales volumes

Purchase Orders and Contracts

As part of our ongoing operations and construction program, we have purchase orders and contracts, excluding fuel (which is discussed below under "---- Fuel Commitments,") that have an unexpended balance of approximately \$153.1 million at December 31, 2002, of which \$32.2 million has been committed. The \$32.2 million commitment relates to purchase obligations issued and outstanding at year-end, as well as a contract tanff for telecommunication services.

The aggregate amount of required payments at December 31, 2002 is as follows:

	 	Committed Amount
		(in Thousands)
2003 2004 2005 2006	 · · · · · · · · · · · · ·	\$24,475 7,469 270 11 \$32,225

Clean Air Act

We must comply with the provisions of The Clean Air Act Amendments of 1990 that require a two-phase reduction in certain emissions. We have installed continuous monitoring and reporting equipment to meet the acid rain requirements. Material capital expenditures have not been required to meet Phase II sulfur dioxide and nitrogen oxide requirements. We may purchase SO² allowances as necessary to meet these requirements.

Manufactured Gas Sites

We have been associated with 15 former manufactured gas sites located in Kansas that may contain coal tar and other potentially harmful materials. We and the Kansas Department of Health and Environment (KDHE) entered into a consent agreement governing all future work at these sites. The terms of the consent agreement will allow us to investigate these sites and set remediation priorities based on the results of the investigations and risk analysis. At December 31, 2002, the costs incurred for preliminary site investigation and risk assessment have been minimal. In accordance with the terms of the strategic alliance with ONEOK, ownership of twelve of these sites and the responsibility for clean up of these sites were transferred to ONEOK. The ONEOK agreement limits our future liability associated with these sites to an immaterial amount. Our investment earnings from ONEOK could be impacted by these costs

EPA New Source Review

The Environmental Protection Agency (EPA) is conducting an enforcement initiative at a number of coal-fired power plants in an effort to determine whether modifications at those facilities were subject to New Source Review requirements or New Source Performance Standards under the Clean Air Act. The EPA has requested information from us under Section 114(a) of the Clean Air Act (Section 114). A Section 114 information request requires us to provide responses to specific EPA questions regarding certain projects and maintenance activities that the EPA believes may have violated the New Source Performance Standard and New Source Review requirements of the Clean Air Act. The EPA contends that power plants are required to update emission controls at the time of major maintenance or capital activity. We believe that maintenance and capital activities performed at our power plants are generally routine in nature and are typical for the industry. We are complying with this information request, but cannot predict the outcome of this investigation at this time. Should the EPA determine to take action, the resulting additional costs to comply could be material. We would expect to seek recovery through rates of any settlement amounts.

The EPA has initiated civil enforcement actions against other unaffiliated utilities as part of its initiative. Settlement agreements entered into in connection with some of these actions have provided for expenditures to be made over extended time periods.

Solid Waste Landfills

We have operating solid waste landfills at Jeffrey Energy Center, Tecumseh Energy Center and Lawrence Energy Center (LEC) for the single purpose of disposing of coal combustion waste material. Additionally, there is one retured landfill at both LEC and Neosho Energy Center. All landfills are permitted by the KDHE and meet all applicable requirements The operating landfill at LEC is projected to be full by 2007 requiring us to permit and construct a new landfill at this site. It is anticipated that the lead time for permitting a new landfill may be significant, which will require this activity to begin in 2003.

Superfund Sites

In December 1999, we were identified as one of more than 1,000 potentially responsible parties at an EPA Superfund site in Kansas City, Kansas (Kansas City site). Based upon previous experience and the limited nature of our business transactions with the previous owners of the site, our obligation, if any, at the Kansas City site is not expected to have a material impact on our financial position or results of operations.

Nuclear Decommissioning

Decommissioning is a nuclear industry term for the permanent shutdown of a nuclear power plant and the removal of radioactive components in accordance with Nuclear Regulatory Commission (NRC) requirements. The NRC will terminate a plant's license and release the property for unrestricted use when a company has reduced the residual radioactivity of a nuclear plant to a level mandated by the NRC The NRC requires companies with nuclear plants to prepare formal financial plans to fund decommissioning These plans are designed so that funds required for decommissioning will be accumulated prior to the termination of the license of the related nuclear power plant

We accrue decommissioning costs over the expected life of the Wolf Creek generating facility The accrual is based on estimated unrecovered decommissioning costs, which consider inflation over the remaining estimated life of the generating facility and are net of expected earnings on amounts recovered from customers and deposited in an external trust fund

The KCC reviews our decommissioning fund financial plans in two phases Phase one is the approval of the decommissioning study, the current year dollar amount and the future year dollar amount. Phase two is the filing of a "funding schedule" by the owner of the nuclear facility detailing its plans of how to fund the future year dollar amount for the pro rata share of the plant.

On February 25, 2002, we filed an application with the KCC to modify the funding schedule to reflect an assumed life of Wolf Creek through 2045 (see Note 3). This modification was granted on March 8, 2002. The filing reflects the current estimate in 1999 dollars of \$221 million, but a future estimate in 2045 through 2054 of \$1.28 billion. An updated decommissioning and dismantlement cost estimate was filed with the KCC on August 30, 2002. Costs outlined by this study were developed to decommission Wolf Creek following a shutdown. The analyses relied upon the site-specific, technical information developed in 1999, updated to reflect current plant conditions and operating assumptions. Based on this study, our share of Wolf Creeks decommissioning costs, under the immediate dismantlement method, is estimated to be approximately \$220 million in 2002 dollars. These costs include decontamination, dismantling and site restoration and are not inflated, escalated, or discounted over the period of expenditure. We anticipate a KCC order on the August 2002 decommissioning study in the second quarter of 2003. The actual decommissioning costs may vary from the estimates because of changes in technology and changes in costs for labor, materials and equipment.

We will file a funding schedule to reflect the KCC's order on the August 2002 decommissioning study by the end of the second quarter of 2003 and anticipate a KCC order on the funding schedule in the third quarter of 2003

Decommissioning costs are currently being charged to operating expense in accordance with the July 25, 2001 KCC rate order as modified by the KCC's approval of the March 8, 2002 funding schedule. Electric rates charged to customers provide for recovery of these decommissioning costs over the life of Wolf Creek as determined by the KCC through 2045. The Nuclear Regulatory Commission (NRC) requires that funds to meet its decommissioning funding assurance requirement be in our decommissioning fund by the time our license expires in 2025. We believe that the KCC approved funding level will be sufficient to meet the NRC minimum financial assurance requirement.

Amounts expensed approximated \$3 85 million in 2002 and will remain unchanged through 2044, subject to the August 2002 decommissioning cost review and revised funding schedule to be filed in the second quarter of 2003 These amounts are deposited in an external trust fund The average after-tax expected return on trust assets is 5 56%

Our investment in the decommissioning fund is recorded at fair value, including reinvested earnings. It approximated \$63.5 million at December 31, 2002 and \$66.6 million at December 31, 2001 The balance in the trust fund decreased from 2001 to 2002 due to the decline in the market value of equity securities held in the trust Trust fund earnings accumulate in the fund balance and increase the recorded decommissioning hability.

Asset Retirement Obligations

In June 2001, the FASB issued SFAS No. 143, "Accounting for Asset Retirement Obligations." SFAS No. 143 provides accounting requirements for the recognition and measurement of liabilities associated with the retirement of tangible long-lived assets. Under the standard, these liabilities will be recognized at fair value as incurred and capitalized and depreciated over the appropriate period as part of the cost of the related tangible long-lived assets. The adoption of SFAS No. 143 will not impact income Any income effects are offset by a regulatory asset created pursuant to SFAS No. 71. Retirement obligations associated with long-lived assets included within the scope of SFAS No. 143 are those for which a legal obligation exists under enacted laws, statutes, written or oral contracts, including obligations arising under the doctrine of promissory estoppel.

We adopted SFAS No. 143 on January 1, 2003, which required us to recognize and estimate the liability for our 47% share of the estimated cost to decommission Wolf Creek. SFAS No. 143 requires the recognition of the present value of the asset retirement obligation we incurred at the time Wolf Creek was placed into service in 1985. On January 1, 2003, we recorded an asset retirement obligation of \$74.7 million. In addition, we increased our property and equipment balance, net of accumulated depreciation, by \$10.7 million. These amounts were estimated based on the calculation guidelines of SFAS No. 143. We also established a regulatory asset for \$64.0 million, which represents the accretion of the liability since 1985 and the increased depreciation expense associated with the increase in plant.

Storage of Spent Nuclear Fuel

Under the Nuclear Waste Policy Act of 1982, the Department of Energy (DOE) is responsible for the permanent disposal of spent nuclear fuel. Wolf Creek pays the DOE a quarterly fee of one-tenth of a cent for each kilowatt-hour of net nuclear generation produced for the future disposal of spent nuclear fuel. These disposal costs are charged to cost of sales.

A permanent disposal site will not be available for the nuclear industry until 2010 or later. Under current DOE policy, once a permanent site is available, the DOE will accept spent nuclear fuel on a priority basis. The owners of the oldest spent fuel will be given the highest priority. As a result, disposal services for Wolf Creek will not be available prior to 2016. Wolf Creek has on-site temporary storage for spent nuclear fuel. In early 2000, Wolf Creek completed replacement of spent fuel storage racks to increase its on-site storage capacity for all spent fuel expected to be generated by Wolf Creek through the end of its licensed life in 2025.

On February 14, 2002, the Secretary of Energy submitted to the President a recommendation for approval of the Yucca Mountain site in Nevada for the development of a nuclear waste repository for the disposal of spent nuclear fuel and high level nuclear waste from the nation's defense activities. In July 2002, the President signed a resolution approving the Yucca Mountain site after receiving the approval of this site from the U S Senate and House of Representatives. This action allows the DOE to apply to the NRC to license the project. The DOE expects that this facility will open in 2010 However, the opening of the Yucca Mountain site as a permanent repository for spent nuclear fuel

Nuclear Insurance

We maintain nuclear insurance for Wolf Creek in four areas liability, worker radiation, property and accidental outage. These policies contain certain industry standard exclusions, including, but not limited to, ordinary wear and tear, and war. Terrorist acts are not excluded from the property and accidental outage policies, but are covered as a common occurrence under the Non-Terrorism Risk Insurance Act. The term common occurrence means that if terronst acts occur against one or more commercial nuclear power plants insured by our insurance company within a 12-month period, all of these terrorist acts will be treated as one event and the owners of the plants will share one full limit of each type of policy, which is currently \$3.24 billion plus any reinsurance recoverable by Nuclear Electric Insurance Limited (NEIL), our insurance provider. Currently there is \$1 billion of reinsurance purchased by NEIL. Claims that arise from terrorist acts are also covered by our nuclear liability and worker radiation policies. These policies are subject to one industry aggregate limit for such acts, currently \$300 million for the risk of terrorism. Unlike the property and accidental outage policies, an industry-wide retrospective assessment program (discussed below) applies once the nuclear liability and worker radiation policies have been exhausted.

Nuclear Liability Insurance

Pursuant to the Price-Anderson Act, we are required to insure against public liability claims resulting from nuclear incidents to the full limit of public liability, which is currently approximately \$9.5 billion. This limit of liability consists of the maximum available commercial insurance of \$300 million, and the remaining \$9.2 billion is provided through mandatory participation in an industry-wide retrospective assessment program Under this retrospective assessment program, we can be assessed up to \$88.1 million per incident at any commercial reactor in the country, payable at no more than \$10 million per incident per year. This assessment is subject to an inflation adjustment based on the Consumer Price Index and applicable premium taxes This assessment also applies in excess of our worker radiation claims insurance. In addition, the U.S. Congress could impose additional revenue-raising measures to pay claims If the \$9.5 billion liability limitation is insufficient, the U.S. Congress will consider taking whatever action is necessary to compensate the public for valid claims.

The Price-Anderson Act expired in August 2002 In late 2002, a renewal act was approved by Congress to be part of an energy bill to extend the Act for 15 years from August 1, 2002. The renewal act would have increased the annual retrospective premium limit from \$10 million to \$15 million per reactor per incident and increased the maximum potential assessment from \$88.1 million to \$98 7 million per reactor per incident Although the renewal act was approved by Congress, the energy bill was never signed by the President However, in February 2003, the Act was extended to December 31, 2003 with no changes except for its expiration date. We expect that the Act will be renewed, but we are unable to predict whether the Act will be modified as proposed in 2002

Nuclear Property Insurance

The owners carry decontamination liability, premature decommissioning liability and property damage insurance for Wolf Creek totaling approximately \$2.75 billion (\$1 3 billion our share). This insurance is provided by NEIL. In the event of an accident, insurance proceeds must first be used for reactor stabilization and site decontamination in accordance with a plan mandated by the NRC. Our share of any remaining proceeds can be used to pay for property damage or decontamination expenses or, if certain requirements are met including decommissioning the plant, toward a shortfall in the decommissioning trust fund.

Accidental Nuclear Outage Insurance

The owners also carry additional insurance with NEIL to cover costs of replacement power and other extra expenses incurred during a prolonged outage resulting from accidental property damage at Wolf Creek. If significant losses were incurred at any of the nuclear plants insured under the NEIL policies, we may be subject to retrospective assessments under the current policies of approximately \$24.5 million (\$11.5 million our share).

Although we maintain various insurance policies to provide coverage for potential losses and liabilities resulting from an accident or an extended outage, our insurance coverage may not be adequate to cover the costs that could result from a catastrophic accident or extended outage at Wolf Creek. Any substantial losses not covered by insurance, to the extent not recoverable through rates, would have a material adverse effect on our financial condition and results of operations.

Fuel Commitments

To supply a portion of the fuel requirements for our generating plants, we have entered into various commitments to obtain nuclear fuel and coal. Some of these contracts contain provisions for price escalation and minimum purchase commitments. At December 31, 2002, our share of WCNOC's nuclear fuel commitments were approximately \$5.0 million for uranium concentrates expiring in 2003, \$0.6 million for conversion expiring in 2003, \$21.5 million for enrichment expiring at various times through 2006 and \$57.5 million for fabrication through 2025.

At December 31, 2002, our coal and coal transportation contract commitments in 2002 dollars under the remaining terms of the contracts were approximately \$2.0 billion. The largest contract expires in 2020, with the remaining contracts expiring at various times through 2013.

At December 31, 2002, our natural gas transportation commitments in 2002 dollars under the remaining terms of the contracts were approximately \$56.2 million. The natural gas transportation contracts provide firm service to several of our gas burning facilities and expire at various times through 2010, except for one contract that expires in 2016.

Energy Act

As part of the 1992 Energy Policy Act, a special assessment is being collected from utilities for a uranium enrichment decontamination and decommissioning fund. Our portion of the assessment for Wolf Creek is approximately \$8.1 million. To date, we have paid approximately \$6.8 million, with the remainder payable over the next four years. Such costs are recovered through the rate-making process

Ln.

18. LEGAL PROCEEDINGS

We, Westar Industries, Protection One, its subsidiary Protection One Alarm Monitoring, Inc. (Monitoring) and certain present and former officers and directors of Protection One were defendants in a purported class action lutgation in the U.S. District Court for the Central District of California, "Alec Garbini, et al v Protection One, Inc, et al," No. CV 99-3755 DT (RCx). On August 20, 2002, the parties filed a Stipulation of Settlement which provided for, among other things, no finding of wrongdoing on the part of any of the defendants, or any other finding that the claims alleged had merit, and a \$7.5 million payment to the plaintiffs, which has been fully funded by Protection One's existing insurance. On November 4. 2002, the district court approved the settlement and entered an Order and Final Judgment. The court certified a class for settlement purposes consisting of all persons and entities who purchased or otherwise acquired the common stock of Protection One during the time period beginning and including February 10, 1998 through February 2, 2001. The Order and Final Judgment provides for, among other things, dismissal with prejudice and release of all Class members' claims against us, Westar Industries, Protection One, Monitoring, and the present and former officers and directors of Protection One.

We and the Public Service Company of New Mexico settled the hugation between us on September 24, 2002. Each side agreed to release all of its claims and potential claims in connection with the transaction.

We and certain of our present and former officers are defendants in five purported class action lawsuits filed during January and February 2003 in U.S District Court in Topeka, Kansas. All of the lawsuits allege securities law violations resulting from power marketing transactions with Cleco Corporation (Cleco) and the first and second quarter 2002 restatements related to the revised goodwill impairment charge and the mark to market charge on our putable/callable notes. We intend to vigorously defend against these actions. We are unable to predict the ultimate impact of this matter on our financial position, results of operations and cash flows.

We and certain of our present and former officers are defendants in purported class action lawsuits filed during March 2003 in U.S District Court in Topeka, Kansas on behalf of participants in and beneficiaries of our Employees' 401(k) Savings Plan. All of the lawsuits allege violations of the Employee Retirement Income Security Act arising from the conduct of certain present and former officers who served or are serving as fiducianes for the plan. The conduct is related to the matters alleged as a basis for securities law violations in the class action lawsuits disclosed in the preceding paragraph We intend to vigorously defend against these actions. We are unable to predict the ultimate impact of this matter on our financial position, results of operations and cash flows

We and our subsidiaries are involved in various other legal, environmental and regulatory proceedings We believe that adequate provisions have been made and accordingly believe that the ultimate disposition of such matters will not have a material adverse effect upon our overall financial position or results of operations

See also Notes 3, 19 and 35 for discussion of KCC regulatory proceedings and a FERC proceeding, an investigation by the United States Attorney's Office, an inquiry by the Securities and Exchange Commission (SEC), an investigation by FERC of certain of our power transactions and potential habilities to David C Wittig and Douglas T Lake

19. ONGOING INVESTIGATIONS

Grand Jury Subpoena

On September 17, 2002, we were served with a federal grand jury subpoena by the United States Attorney's Office in Topeka, Kansas, requesting information concerning the use of aircraft and our annual shareholder meetings Since that date, the United States Attorney's Office has served additional subpoenas on us and certain of our employees requesting further information concerning the use of aircraft; executive compensation arrangements with Mr. Wittig, Mr. Lake and other former and present officiers; the proposed rights offenng of Westar Industries stock; and the company in general. We are providing information in response to these requests and are fully cooperating in the investigation. We have not been informed that we are a target of the investigation or its impact on us.

Securities and Exchange Commission Inquiry

On November 1, 2002, the SEC notified us that it would be conducting an inquiry into the matters involved in the restatement of our first and second quarter 2002 financial statements. Our counsel has communicated with the SEC about these matters and other matters within the scope of the grand jury investigation. We are unable to predict the ultimate outcome of the inquiry or its impact on us.

Special Committee Investigation

Our board of directors appointed a Special Committee of directors to investigate management matters and matters that are the subject of the grand jury investigation and SEC inquiry. The Special Committee retained counsel and other advisors. The Special Committee investigation has been completed and has not resulted in adjustments to our consolidated financial statements.

FERC Subpoena

On December 16, 2002, we received a subpoena from FERC seeking details on power trades with Cleco and its affiliates, documents concerning power transactions between our system and our marketing operations and information on power trades in which we or other trading companies acted as intermedianes.

Cleco publicly disclosed in November 2002 that Cleco and its affiliates had engaged in certain trades that may have violated FERC affiliate transaction rules applicable to Cleco. The affiliate transactions involved power sales from one Cleco affiliate to Westar Energy and then back to another or the same Cleco affiliate. The transactions totaled approximately \$3.8 million in 2002, \$12.6 million in 2001 and \$3.4 million in 2000. The total amount of these transactions represented less than 1% of our total revenues in 2002, 2001 and 2000.

Among the issues being reviewed by FERC are transactions we conducted with third parties to facilitate power transfers between our system and our marketing operations. These transactions and other power marketing and trading activities were recently reviewed in a KCC ordered audit of our power marketing operations. This review was conducted by an independent third party with industry expenence who was approved by the KCC The review found no irregulanties in the structure or pricing of the transactions

We have provided information to FERC in response to the subpoena We believe that our participation in these transactions did not violate FERC rules and regulations However, we are unable to predict the ultimate outcome of the investigation

<u>.</u>

20. COMMON STOCK, PREFERRED STOCK AND OTHER MANDATORILY REDEEMABLE SECURITIES

Our Restated Articles of Incorporation, as amended, provide for 150,000,000 authorized shares of common stock. At December 31, 2002, 72,840,217 shares were issued and 71,506,953 shares were outstanding.

We have a Direct Stock Purchase Plan (DSPP). Shares issued under the DSPP may be either original issue shares or shares purchased in the open market. During 2002, a total of 7,087,125 shares were purchased from the company through the issuance of 6,936,289 original issue shares and 150,836 through the reissuance of treasury shares. Of the total shares purchased from us in 2002, 5,253,502 were acquired by Westar Industries and the balance of the shares were for the DSPP, ESPP, 401(k) match and other stock based plans operated under the 1996 Long-Term Incentive and Share Award Plan. At December 31, 2002, 1,855,808 shares were available under the DSPP registration statement.

The November 8, 2002 KCC order directed us to reverse all transactions in 2002 recorded as equity investments by us in Westar Industries. In compliance with that order, on December 9, 2002, Westar Industries transferred to us 20,301,489 shares of our common stock that had been previously issued to Westar Industries.

Treasury Stock

At December 31, 2002, we had a treasury stock balance of 1,333,264 shares. Westar Industries did not own any of our common stock and Protection One owned 850,000 shares of our common stock. At December 31, 2001, all of our treasury stock was owned by Westar Industries, except for 50,000 shares owned by Protection One.

See Note 34 for information regarding our purchase during the first quarter of 2003 of shares of our common stock held by Protection One.

Preferred Stock Not Subject to Mandatory Redemption

Westar Energy's cumulative preferred stock is redeemable in whole or in part on 30 to 60 days notice at our option.

Rate	Principal Outstanding	Call Price	Premium	Total Amount to Redeem		
	(Dollars in Thousands)					
4 500%	\$ 13,354	108 00%	\$1,068	\$ 14,422		
4.250%	4,304	101 50%	65	4,369		
5 000%	3,778	102.00%	76	3,854		
	\$21,436		\$1,209	\$ 22,645		

The provisions of Westar Energy's Restated Articles of Incorporation, as amended, contain restrictions on the payment of dividends or the making of other distributions on our common stock while any preferred shares remain outstanding unless certain capitalization ratios and other conditions are met. If the ratio of the capital represented by our preferred stock and common stock (together, Subordinated Stock) (including premiums on capital stock) and its surplus accounts, to its total capital and its surplus accounts at the end of the second month immediately preceding the date of the proposed payment, adjusted to reflect the proposed payment (Capitalization Ratio), will be less than 20%, then the payment of the dividends on Subordinated Stock shall not exceed 50% of net income available for dividends for the 12-month period ending with and including the date of the proposed payment. If the Capitalization Ratio is 20% or more but less than 25%, then the payment of dividends on the Subordinated Stock, including the proposed payment, then the payments shall not exceed 75% of its net income available for dividends for such 12-month period. Except to the extent permitted above, no payment or other distribution may be made that would reduce the Capitalization Ratio to less than 25%. At December 31, 2002, the capitalization ratio was greater than 25%.

So long as there are any outstanding shares of Westar Energy preferred stock, Westar Energy shall not without the consent of a majority of the shares of preferred stock or if more than one-third of the outstanding shares of preferred stock vote negatively and without the consent of a percentage of any and all classes required by law and Westar Energy's Articles of Incorporation, declare or pay any dividends (other than stock dividends or dividends applied by the recipient to the purchase of additional shares) or make any other distribution upon Subordinated Stock unless, immediately after such distribution or payment the sum of Westar Energy's capital represented by the outstanding Subordinated Stock and our earned and any capital surplus shall not be less than \$10.5 million plus an amount equal to twice the annual dividend requirement on all the then outstanding shares of preferred stock.

Other Mandatorily Redeemable Securities

On December 14, 1995, Western Resources Capital I, a wholly owned trust, issued \$100 million of 7 7/8% Cumulative Quarterly Income Preferred Securities, Senes A, of which \$98.8 million were outstanding at December 31, 2002. The securities are redeemable at the option of Western Resources Capital I on or after December 11, 2000, at \$25 per security plus accrued interest and unpaid dividends. Holders of the securities are entitled to receive distributions at an annual rate of 7 7/8% of the liquidation value of \$25. Distributions are payable quarterly and are tax deductible by us. These distributions are recorded as interest expense. The sole asset of the trust is \$103 million principal amount of Westar Energy 7 7/8% Deferrable Interest Subordinated Debentures, Series A due December 11, 2025.

On July 31, 1996, Western Resources Capital II, a wholly owned trust, issued \$120 million of 8 1/2% Cumulative Quarterly Income Preferred Securities, Series B, of which \$115.7 million were outstanding at December 31, 2002. The securities are redeemable at the option of Western Resources Capital II, on or after July 31, 2001, at \$25 per preferred security plus accumulated and unpaid distributions. Holders of the securities are entitled to receive distributions at an annual rate of 8 1/2% of the liquidation value of \$25. Distributions are payable quarterly and are tax deductible by us These distributions are recorded as interest expense. The sole asset of the trust is \$124 million principal amount of Westar Energy 8 1/2% Deferrable Interest Subordinated Debentures, Series B due July 31, 2036.

In addition to Westar Energy's obligations under the Subordinated Debentures discussed above, Westar Energy has guaranteed, on a subordinated basis, payment of distributions on the preferred securities These undertakings constitute a full and unconditional guarantee by Westar Energy of the trust's obligations under the preferred securities

21. MARKETABLE SECURITIES

During the last three years, we sold substantially all of our investments in marketable securities. These securities were classified as available-for-sale. Realized gains and losses are included in earnings and were derived using the specific identification method. The following table summarizes our marketable security sales for the years ended December 31, 2002, 2001 and 2000:

Marketable Security Sales	2007	2001	2000
		(In Thousand	is)
Sales proceeds	. 5 -	\$ 2,829	\$ 218,609

⁶⁰During 2000, we sold our equity investment in a gas compression company and realized a pre-tax gain of \$911 million.

In February 2000, one of the paging companies we held an interest in made an announcement that significantly increased the market value of paging company securities in general During the first quarter of 2000, we sold the remainder of these securities for a gain of \$24.9 million.

During 2001, we wrote down the cost basis of certain securities to their estimated fair value. The fair value of these equity securities had declined below our cost basis, and we determined that the decline was other than temporary. The amount of the write down totaled \$11.1 million, of which \$9.6 million related to an investment. The write down . included in other income (expense).

See Note 4 for information regarding the classification of our ONEOK investment.

22. MONITORED SERVICES DISPOSITIONS

In 2001, Protection One and Protection One Europe disposed of certain monitored security operations for approximately \$480 million and we recorded a pre-tax loss of \$13.1 million.

23. IMPAIRMENT CHARGES

Effective January 1, 2002, we adopted SFAS No. 142 and SFAS No 144. SFAS No. 142 establishes new standards for accounting for goodwill. SFAS No. 142 continues to require the recognition of goodwill as an asset, but discontinues amortization of goodwill. In addition, annual impairment tests must be performed using a fairvalue based approach as opposed to an undiscounted cash flow approach required under prior standards. The completion of the impairment tests, based upon a valuation performed by an independent appraisal firm, as of January 1, 2002, indicated that the carrying values of goodwill at Protection One and Protection One Europe had been impaired and impairment charges were recorded as discussed below.

Another impairment test of Protection One's goodwill and customer accounts was completed as of July 1, 2002 (the date selected for Protection One's annual impairment test), with the independent appraisal firm providing the valuation of the estimated fair value of Protection One's reporting units, and no impairment was indicated Protection One's stock price declined after regulatory orders were issued (see Note 3), including the KCC's December 23, 2002, order. As a result, Protection One retained the independent appraisal firm to perform an additional valuation of Protection One's reporting units so it could perform an impairment test as of December 31, 2002, which resulted in the additional impairment charge discussed below.

SFAS No. 144 established a new approach to determining whether our customer account asset is impaired. The approach no longer permits us to evaluate our customer account asset for impairment based on the net undiscounted cash flow stream obtained over the remaining life of goodwill associated with the customer accounts being evaluated. Rather, the cash flow stream used under SFAS No. 144 is limited to future estimated undiscounted cash flows from assets in the asset group, which include customer accounts, the primary asset of the reporting unit, plus an estimated amount for the sale of the remaining assets within the asset group (including goodwill). If the undiscounted cash flow stream from the asset group is less than the combined book value of the asset group, then we are required to mark the customer account asset down to fair value, by recording an impairment, to the extent fair value is less than our book value. To the extent net book value is less than fair value, no impairment would be recorded.

The new rule substantially reduces the net undiscounted cash flows for customer account impairment evaluation purposes as compared to the previous accounting rules. The undiscounted cash flow stream has been reduced from the 16 year remaining life of the goodwill to the nine year remaining life of customer accounts for impairment evaluation purposes. Using these new guidelines, we determined that there was an indication of impairment of the carrying value of the customer accounts and an impairment charge was recorded as discussed below.

R

The impairment charge for goodwill recorded in the first quarter of 2002 is reflected in our consolidated statement of income as a cumulative effect of a change in accounting principle. The impairment charge for customer accounts is reflected in our consolidated statement of income as an operating expense. These impairment charges reduce the recorded value of these assets to their estimated fair values at January 1, 2002.

Protection One completed an additional impairment test of goodwill as of December 31, 2002. We recorded an impairment charge of \$79.7 million, net of tax benefit and minority interests, in the fourth quarter of 2002 to reflect the impairment of all remaining goodwill of Protection One's North America segment, which is reflected in our consolidated statement of income as an operating expense.

We solucted and received indications of value for Protection One Europe from potential buyers. These indications of value are within a range we would be willing to accept They indicated the recorded goodwill of Protection One Europe had no value. Accordingly, we recorded a \$36 million impairment charge in the fourth quarter of 2002 to reflect the impairment of all remaining goodwill at Protection One Europe, which is reflected in our consolidated statement of income as an operating expense. We are willing to accept offers in the indicated range due to our ability to use the tax loss on this sale to offset the taxes that would otherwise be due from our sale of other investments. We will recognize a \$58 million tax benefit in the first quarter of 2003 when Protection One Europe is classified as a discontinued operation.

These charges for the year ended December 31, 2002, are detailed as follows:

		Impairment of Goodwill	Impairment of Customer Accounts	Total
			(In Thousands)	
Protection One	•	\$719,885 116,154	\$339,974 —	\$1,059,859 116,154
Total pre-tax impairment		\$836,039	\$339,974	1;176,013
Income tax benefit				(203,958) (107,172)
Net charge	· •			\$ 864,883

We no longer amortize goodwill to expense because of the adoption of SFAS No. 142 The following table shows our results for the year ended December 31, 2002, compared to our results for the year ended December 31, 2001, calculated using the new accounting standard for goodwill, adjusted for minority interest

Year Ended December 31,	2002	2001	2000	
	(in Thousar	nds, Except Per Shar	re Amounts)	
Reported earnings (loss) available for common stock	\$(793,400)	\$(21,771) 50,437	\$135,352 51,394	
Adjusted earnings available for common stock	\$(793,400)	\$ 28,666	\$186,746	
Basic earnings per share: Reported earnings (loss) available for common stock Add back. Goodwill amortization	\$~ (11 06)	\$ (0.31) 0.72	\$ 1.96 0.75	
Adjusted earnings available for common stock	\$ (11.06)	\$ 0.41	\$ 2.71	
Diluted earnings per share: Reported earnings (loss) available for common stock	\$ (11.06)	\$ (0.31) 0.72	\$ 1.95 0.73	
Adjusted earnings available for common stock	\$ (11.06)	\$ 0.41	\$ 2.68	

The investment at cost in customer accounts at December 31, 2002 was \$1 1 billion and at December 31, 2001 was approximately \$1.4 billion. Accumulated amortization of the investment in customer accounts at December 31, 2002 was \$678.9 million and at December 31, 2001 was \$614.5 million. We recorded approximately \$83.3 million of customer account amortization expense during the year ended December 31, 2002, \$148.0 million during the same period of 2001 and \$158.7 million during the year ended December 31, 2000. Customer account amortization expense is reduced primarily as a result of the impairment charge that reduced our customer account balance. The table below reflects the estimated aggregate customer account amortization expense for 2003 and each of the four succeeding fiscal years.

			2003	2004	2005	2006	2007
Februarie di aut					(In Thousands)		
Estimated arr	ionuza	uon					
expense		•	\$ 83,389	\$83,282	\$66,998	\$ 66,641	\$ 60,320

We are required to perform impairment tests for long-lived assets prospectively for our monitored services segment as long as it continues to incur recurring losses or for other matters that may negatively impact its businesses. Goodwill will be required to be tested upon certain triggenng events, which include recurring operating losses, adverse business conditions, adverse regulatory rulings, declines in market values and other matters that negatively impact value. Given the potentially negative implications from the KCC's December 23, 2002 order, and the subsequent decline in Protection One's stock price, Protection One tested its goodwill for impairment at December 31, 2002, which resulted in the additional impairment charge discussed above. If future impairment tests for either goodwill or customer accounts indicate fair value is less than book value, we will be required to recognize additional impairment charges on these assets in the future Any such impairment charges could be material.

24. CHANGE IN ESTIMATE OF CUSTOMER LIFE

During the first quarter of 2002, Protection One evaluated the estimated life and amortization rates for customer accounts, based on the results of a hing study performed by a third party appraisal firm in the first quarter of 2002. The report showed Protection One's North America customer pool can expect a declining revenue stream over the next 30 years with an estimated average remaining life of 9 years. Protection One's Multifamily pool can expect a declining revenue stream over the next 30 years with an estimated average remaining life of 10 years. Taking into account the results of the lifing study and the inherent expected declining revenue streams for its North America and Multifamily customer pools, in particular the first five years, Protection One adjusted the rate of amortization on customer accounts for its North America and Multifamily customer pools to better match the rate and period of amortization expense with the expected decline in revenues. In the first quarter of 2002, Protection One changed its amortization rate for its North America pool to a 10-year 135% declining balance method from a 10-year 130% declining balance method. For the Multifamily pool, Protection

One will continue to amortize on a straight-line basis utilizing a \square shorter nine year life. Protection One accounted for these amorti-Mzation changes prospectively beginning January 1, 2002, as a change \square in estimate. These changes in estimates increased amortization \square expense for the year ended December 31, 2002 by approximately \square \$0 8 million, net of \$0.5 million tax.

र्ष इ. LEASES

3

Operating Leases

The company leases office buildings, computer equipment, vehicles, railcars and other property and equipment with various terms and expiration dates from 1 to 16 years. Rental payments for operating leases and estimated rental commitments are as follows:

Year Ended December 31,	LaCygne 2 Lease ^(a)	Total Operating Leases
	(in Tho	isands)
Rental payments.		
2000	\$ 34,598	\$ 72,904
2001	34,598	74,564
2002	34,598	62,500
Future commitments:		
2003	\$ 39,420	\$ 61,484
2004	34,598	51,082
2005	38.013	51,970
2006	42,287	53,253
2007	78,268	87,669
Thereafter	344,049	387,147
Total future commitments	\$ 576,635	\$692,60

⁶⁰LaCygne 2 lease amounts are included in total operating leases

In 1987, KGE sold and leased back its 50% undivided interest in the LaCygne 2 generating unit. The LaCygne 2 lease has an initial term of 29 years, with various options to renew the lease or repurchase the 50% undivided interest. KGE remains responsible for its share of operation and maintenance costs and other related operating costs of LaCygne 2. The lease is an operating lease for financial reporting purposes We recognized a gain on the sale, which was deferred and is being amortized over the lease term.

Capital Leases

Assets recorded under capital leases are listed below:

December 31,		2002	2001
		(in Tho	usands)
Vehicles		\$41,930	\$ 44,098

Present va	alue of net minimum lease payments under capital leases	\$27,423

26. GAIN ON DEBT RETIREMENTS

Protection One's and our debt securities were repurchased in the open market and gains were recognized on the retirement of these debt securities. Prior to July 1, 2002, these were recognized as extraordinary gains.

Effective July 1, 2002, we adopted SFAS No. 145. This standard limits the income statement classification of gains and losses from extinguishment of debt as extraordinary to those transactions meeting the criteria of APB Opinion No. 30, "Reporting the Results of Operations — Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions." SFAS No 145 prohibits treating gains and losses associated with extinguishments resulting from a companys risk management strategy as extraordinary. Under SFAS No. 145, current gains and losses from the extinguishment of debt are reported as other income Gains or losses in prior periods that were previously classified as extraordinary that do not meet the APB Opinion No. 30 critena have been reclassified to other income The adoption of this standard did not impact our net income or financial condition

27. DISCONTINUED OPERATIONS

During the second quarter of 2002, Protection One entered into negotiations for the sale of its Canadian business, which was included in our monitored services segment. The sale was consummated on July 9, 2002. Protection One recorded an impairment loss of approximately \$1.3 million, net of \$0.7 million tax benefit, in the second quarter of 2002 as a result of the sale.

The net operating losses of these operations are included in the consolidated statements of income under discontinued operations. The net operating loss for the year ended December 31, 2002, of \$1 6 million, includes an impairment loss on customer accounts of approximately \$1.9 million. An impairment charge of \$2.3 million relating to the Canadian operations' goodwill is reflected in the consolidated statement of income for the year ended December 31, 2002, as a cumulative effect of accounting change from discontinued operations. Revenues from these operations were \$4.2 million for the year ended December 31, 2002, compared to \$8.2 million for the year ended December 31, 2001.

Protection One sold all assets and habilities of the Canadian operations. The major classes of assets and habilities of the Canadian operations at December 31, 2001 were as follows:

					December 31, 2001
Assets					(In Thousands)
					\$ 478

28. RELATED PARTY TRANSACTIONS

Below, we describe significant transactions between us and Westar Industries and some of our other subsidiaries and related parties. We have disclosed these significant transactions even if they have been eliminated in the preparation of our consolidated results and financial position

ONEOK Shared Services Agreement

We and ONEOK have shared services agreements in which we provide and bill one another for facilities, utility field work, information technology, customer support, meter reading and bill processing. Payments for these services are based on various hourly charges, negotiated fees and out-of-pocket expenses.

	2002	2001	2000
······································		(In Thousands)	
Charges to ONEOK	\$8,357	\$8,202	\$8,463
Charges from ONEOK	3,324	3,279	3,420
Net receivable from ONEOK,			
outstanding at December 31	1,457	1,424	1,205

ONEOK gave us notice of termination effective December 2003 of this shared services agreement. We expect termination of this agreement will increase our annual costs to provide these services by approximately \$11 million to \$13 million.

Protection One Shared Services Agreement

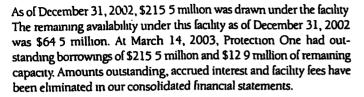

We provide administrative services to Protection One pursuant to services agreements, including accounting, tax, audit, human resources, legal, purchasing, facilities and technology services. Fees for these services are based upon various hourly charges, negotiated fees and out-of-pocket expenses. Protection One incurred charges of \$3.9 million in 2002, \$8.1 million in 2001 and \$7.3 million in 2000. These intercompany charges have been eliminated in consolidation.

Westar Energy and Protection One have entered into an amended service agreement that stipulates that if Westar Energy sells its interest in Protection One, Westar Energy and Protection One will negotiate, in good-faith, the terms and conditions for continuation of the services during an agreed-upon transition period. This agreement is subject to KCC approval, which has not yet been received.

Transactions Between Westar Industries and Subsidiaries

Protection One Credit Facility

Westar Industries is the lender under Protection One's senior credit facility. The senior credit facility was amended to increase the capacity from \$155 million to \$280 million during the year ended December 31, 2002. On August 26, 2002, the senior credit facility was further amended to extend the maturity date to January 5, 2004. On March 11, 2003, the KCC limited the amount of the credit facility to \$228.4 million, authorized us to fund the facility and extend the term of the facility to January 5, 2005 and required the facility to be paid in full and terminated upon the disposition of all or part of our investment in Protection One. We are in discussions with Protection One about the extension of the facility and we intend to renew the facility through January 5, 2005, should such renewal be necessary to provide Protection One with continued liquidity. For further information, see Note 34.

Purchases of Securities

Westar Industries, Protection One and we have purchased our and Protection One's debt securities and preferred stock in the open market These repurchases have been accounted for as retirements on a consolidated basis The table below summarizes these transactions for the years ended December 31, 2002, 2001 and 2000.

(a) Represents the fair value of a call option associated with our putable/callable notes (see Note 14)

⁶⁰ In 2001, \$37.9 million of these bonds were purchased by Westar Industries and \$276 million of these were transferred to Protection One in exchange for cash

^(c) In 2000, \$170 0 million of these bonds were purchased by Westar Industries and \$103 9 million of these were transferred to Protection One in exchange for cash and the settlement of certain intercompany payables and receivables

See Note 26 for information about a change in accounting treatment that requires that gains and losses arising from the purchases and sales of these securities be recorded as other income rather than as an extraordinary item. See Note 34 for information regarding purchases of securities that have occurred during 2003.

Tax Sharing Agreement

We have a tax sharing agreement with Protection One. This pro rata tax sharing agreement allows Protection One to be reimbursed for current tax benefits utilized in our consolidated tax return. We and Protection One are eligible to file on a consolidated basis for tax purposes so long as we maintain an 80% ownership interest in Protection One. We reimbursed Protection One \$13.5 million for tax year 2001 and \$7.4 million for tax year 2000. On March 11, 2003, the KCC issued an order that allows us to make a cash payment to Protection One of approximately \$20 million for tax year 2002.

Financial Advisory Services

Protection One entered into an agreement pursuant to which it paid a quarterly fee to Westar Industries for financial advisory services equal to 0.125% of its consolidated total assets at the end of each quarter. This agreement was approved by the independent members of Protection One's board of directors. Protection One incurred approximately \$3 6 million of such fees during the year ended December 31, 2002 These amounts have been eliminated in our consolidated financial statements. This agreement was terminated effective September 30, 2002.

Loans to Officers

During 2001 and 2002, we extended loans to our officers for the purpose of purchasing shares of our common stock. The officers are personally liable for the repayment of the loans, which are unsecured and bear interest, payable quarterly, at a variable rate equal to our short-term borrowing rate. The loans mature on December 4, 2004. The aggregate balance outstanding at December 31, 2002 was approximately \$1.8 million, which is classified as a reduction to shareholders' equity in the accompanying consolidated balance sheets. For the year ended December 31, 2002, we recorded approximately \$97,000 in interest income on these loans. No additional loans will be made as a result of federal legislation that became effective July 30, 2002.

Transactions Between Westar Energy and KGE

We perform KGE's cash management function, including cash receipts and disbursements An intercompany account is used to record net receipts and disbursements between us and KGE. KGE's net amount payable from affiliates approximated \$24.1 million at December 31, 2002, and the net amount receivable from affiliates approximated \$17.3 million at December 31, 2001. These intercompany charges have been eliminated in consolidation.

We provide all employees utilized by KGE. We allocate certain operating expenses to KGE. These expenses are allocated, depending on the nature of the expense, based on allocation studies, net investment, number of customers, and/or other appropriate factors. We believe such allocation procedures are reasonable.

ន្ទី

풬

Transactions with Protection One

During the fourth quarter of 2001, KGE entered into an option agreement to sell an office building located in downtown Wichita, Kansas, to Protection One for approximately \$0.5 million. The sales price was determined by management based on three independent appraisers' findings. This transaction was completed during June 2002. We recognized a loss of \$2.6 million on this transaction, and we expected to realize annual operating cost savings of approximately \$0.9 million. The cost 'savings will be treated as a regulatory hability in accordance with a March 26, 2002, KCC order. For the year ended December 31, 2002, we recorded \$0.5 million in cost savings as a regulatory liability.

Protection One Europe

On February 29, 2000, Westar Industnes purchased the European operations of Protection One, and certain investments held by a subsidiary of Protection One, for an aggregate purchase price of \$244 million. Westar Industries paid approximately \$183 million in cash and transferred Protection One debt securities with a market value of approximately \$61 million to Protection One. Cash proceeds from the transaction were used to reduce the outstanding balance owed to Westar Industries on Protection One's revolving credit facility. No gain or loss was recorded on this intercompany transaction, and the net book value of the assets was unaffected.

29.WORK FORCE REDUCTIONS

In late 2001, we reduced our utility work force by approximately 200 employees through involuntary separations and recorded a severance-related net charge of approximately \$14.3 million. In 2001, Protection One also reduced its work force by approximately 500 employees in connection with facility consolidations and recorded a severance-related net charge of approximately \$3.1 million.

During 2002, we further reduced our utility work force by approximately 400 employees through a voluntary separation program We recorded a net charge of approximately \$21.7 million in 2002 related to this program. We have replaced and may continue to replace some of these employees.

30. ICE STORM

In late January 2002, a severe ice storm swept through our utility service area causing extensive damage and loss of power to numerous customers. Through December 31, 2002, we incurred \$19.3 million for restoration costs, a portion of which was capitalized. We have deferred and recorded as a regulatory asset on our December 31, 2002 consolidated balance sheet restoration costs of approximately \$15.0 million. We have received an accounting authority order from the KCC that allows us to accumulate and defer for potential future recovery all operating and carrying costs related to storm restoration.

31. POTENTIAL SALE OF UTILITY ASSETS

On October 14, 2002, we announced an agreement with Midwest Energy, Inc. (Midwest Energy) for the sale to Midwest Energy of a portion of our transmission and distribution assets and rights to provide service to customers in an area of central Kansas. The sale will affect about 10,000 customers, or about 1.5% of our total customers, over 895 square miles. The area, which includes 42 towns, is on the west edge of our service territory and is largely surrounded by Midwest Energy's existing territory. The proposed sale is contingent upon approval by the KCC and FERC. KCC hearings have been scheduled to begin on May 20, 2003. We can give no assurance as to when or if this transaction will occur.

32. SEGMENTS OF BUSINESS

Our business is segmented based on differences in products and services, production processes and management responsibility. We have identified three reportable segments: Electric Utility, Monitored Services and Other.

- Electric Utility consists of our integrated electric utility operations, including the generation, transmission and distribution of power to our retail customers in Kansas and to wholesale customers, and our power marketing activities.
- Monitored Services, including the net effect of minority interests, is composed of our security alarm monitoring businesses in the United States and Europe.
- Other includes our approximate 45% ownership interest in ONEOK at December 31, 2002, and other investments in the aggregate not material to our business or results of operations.

We manage our business segments' performance based on their earnings (losses) before interest and taxes (EBIT) because EBIT is the primary measurement used by our management to evaluate segment performance. Our business managers have direct control over the items that affect the EBIT of their segments and we therefore believe EBIT is an appropriate measure of segment performance. EBIT does not represent cash flow from operations as defined by GAAP, should not be construed as an alternative to operating income and is indicative neither of operating performance nor cash flows available to fund our cash needs. Items excluded from EBIT are significant components in understanding and assessing our financial performance. Interest expense, income taxes, discontinued operations, cumulative effects of accounting changes and preferred dividends are items that are excluded from the calculation of EBIT. Our computation of EBIT may not be comparable to other similarly titled

33. QUARTERLY RESULTS (UNAUDITED)

The amounts in the table are unaudited but, in the opinion of management, contain all adjustments (consisting only of normal recurring adjustments) necessary for a fair presentation of the results of such periods. Our electric business is seasonal in nature and, in our opinion, compansons between the quarters of a year do not give a true indication of overall trends and changes in operations.

34. SUBSEQUENT EVENTS

Proposed Dispositions

The Debt Reduction Plan contemplates the sale of our interests in Protection One Europe with a targeted closing of mid-2003 and the sale of our interest in Protection One with a targeted closing by late 2003 or early 2004. Consistent with the Debt Reduction Plan, on January 13, 2003, we announced that our board of directors authonzed management to explore alternatives for disposing of our investments in Protection One and Protection One Europe, and we have retained financial advisors to assist with the possible sales. A special committee comprised of independent directors of Protection One's board of directors has been formed, and the committee has also retained a financial advisor. As a result of these decisions, these operations were classified as discontinued operations during the first quarter of 2003 pursuant to the provisions of SFAS No. 144

As discontinued operations, we will be required to determine the fair value of our investment, which will be the net amount we expect to realize from the sale of the investment. The investment must be reported at the lesser of our recorded basis or the estimated fair value. If the fair value is less than our recorded basis, we will be required to record an expense equal to the amount by which our basis exceeds the estimated fair value, which could be material We solicited and received indications of value for Protection One Europe from potential buyers. These indications of value are within a range we would be willing to accept. They indicated the recorded goodwill for Protection One Europe had no value. Accordingly, we recorded a \$36 million impairment charge in the fourth quarter of 2002 to reflect the impairment of all remaining goodwill at Protection One Europe. We are willing to accept offers in the indicated range due to our ability to use the tax loss on this sale to offset the taxes that would otherwise be due from our sale of other investments. We will recognize a \$58 million tax benefit in the first quarter of 2003 when Protection One Europe is classified as a discontinued operation.

Payments to Protection One

On March 21, 2003, we paid approximately \$1.0 million to Protection One as reimbursement for information technology services provided to us, and related costs incurred, by a subsidiary of Protection One On March 21, 2003, we also paid approximately \$3.6 million to Protection One as reimbursement for aviation services provided by a subsidiary of Protection One and for the repurchase of the stock of the subsidiary These payments were authorized by the KCC in an order issued March 11, 2003, which is described in Note 3

1

J

Purchase of Stock from Protection One

On February 14, 2003, we purchased 850,000 shares of our common stock and approximately 34,000 shares of our preferred stock from Protection One for approximately \$11 6 million. This transaction was approved by the KCC. The shares of common stock are being held as treasury stock and the shares of preferred stock have been retired. This transaction had no effect on the consolidated financial statements

Purchases of Debt Securities

From January 1, 2003 through March 14, 2003 we purchased \$35 3 million face value of our putable/callable notes and \$43 0 million face value of our 6.875% senior unsecured notes in the open market

Termination of Plane Lease

During March 2003, we terminated the lease of an airplane and incurred an expense of \$5 9 million related to this termination

35. POTENTIAL LIABILITIES TO DAVID C.WITTIG AND DOUGLAS T. LAKE

5

David C. Wittig, our former chairman of the board, president and chief executive officer, resigned from all of his positions with us and our affiliates on November 22, 2002. Douglas T. Lake, our executive vice president and chief strategic officer, was placed on administrative leave from all of his positions with us and our affiliates on December 6, 2002. In connection with these actions, we reserved all nghts and claims we may have against Mr. Wittig and Mr. Lake ansing under their employment agreements, any other agreements with us, or any plan, program or policy in which they participated. In their respective resignation and leave letters, Mr. Wittig and Mr. Lake stated that they reserved all rights and claims they may have against us.

During their active employment with us, we accrued liabilities totaling approximately \$27.4 million for compensation not yet paid to Mr. Wittig and Mr. Lake under vanous plans. The compensation includes restricted share unit awards, deferred vested shares, deferred restricted share unit awards, deferred vested stock for compensation, executive salary continuation plan benefits and, in the case of Mr. Wittig, benefits ansing from a split dollar life insurance agreement. Additionally, as required by GAAP, we have made provisions in our financial statements for an additional amount of approximately \$22.9 million should it later be determined that we are obligated to pay Mr Wittig and Mr. Lake any amounts under their employment agreements. We do not concede, however, that any amounts are owed to Mr. Wittig or Mr. Lake, and we believe that we may have potential claims and defenses against Mr. Wittig and Mr. Lake. The compensation could include a pro rata portion of their unpaid bonuses for the year in which termination occurred, unused vacation, accumulated sick leave, severance, restricted share unit awards and related dividend equivalents, and increased executive salary continuation plan benefits. We believe the amount reserved adequately provides for potential obligations to Mr. Wittig and Mr. Lake.

In additional expense each year in which payments are made to Mr. Wittig and Mr. Lake pursuant to the executive salary continuation plan. Assuming an expected payout period of 35 years, the aggregate nominal amount of these expenses would be approximately \$17.9 million for Mr. Wittig and \$9.0 million for Mr. Lake. Also, if stock performance requirements for some restricted share unit awards were to be satisfied, we would be required to record additional compensation expense of approximately \$4.4 million to Mr. Wittig and Mr. Lake.

As of March 31, 2003, neither Mr. Wittig nor Mr. Lake has asserted any nghts or claims against us for any of the amounts described above. We are unable to predict whether they will assert any rights or claims in the future. If they did so, we will vigorously defend against such claims and potentially assert counterclaims; however, the ultimate resolution of these matters is outside our control.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Effective May 30, 2002, the Audit and Finance Committee of our board of directors decided not to engage Arthur Andersen LLP (Andersen) as our public accountants and engaged Deloitte & Touche LLP (Deloitte & Touche) to serve as our principal accountants for fiscal year 2002 This matter was previously reported by us on our Form 8-K dated May 30, 2002 filed with the SEC.

Corporate Political Activity

In the course of our investigation, we learned facts showing that certain of the Company's executives, including Messrs. Wittig, Koupal and Lawrence, engaged in organized efforts to provide political contributions to candidates for state and federal office who were perceived to support issues of interest to the Company. While individuals may freely engage in such political activity, corporations are prohibited by federal law from contributing directly or indirectly to the campaigns of candidates for federal office. The activities of these corporate executives, therefore, present the question of whether, while engaged in these political activities, they were acting in their corporate capacity and on behalf of the Company or in their individual capacity.

The political contributions by Company executives and related activities described in this section of our report were not a primary focus of our investigation. As a result, the analysis contained in this section of the report is based upon limited and possibly incomplete information. Nevertheless, based upon the record developed to date, we have learned sufficient facts to understand certain apparently recurring political contribution-related activities by senior executives that we believe warrant further scrutiny by the Company.

A. The Underlying Political Activity.

¢η

C) N

T T

200

During the course of interviews and document review, we learned that Mr. Wittig, with advice and assistance from Messrs. Koupal and Lawrence, the Company's vice president for public affairs. (1) advocated the election of particular candidates in local.

state, and federal elections; (ii) "budgeted" for individual officer contributions without any input from those officers; (iii) requested specific contributions from individual officers; and (iv) collected the contributions to be forwarded to specific candidates.

Documents obtained during our investigation reveal that members of management repeatedly asked other corporate executives to support candidates for elective office and solicited contributions for those candidates. *See, e.g.*, [Exhibit 236 (May 20, 2002 e-mail from Mr. Lawrence to Mr. Lake explaining why Mr. Lake should contribute funds to Congressman DeLay's campaign); Exhibit 237 (May 17, 2002 memorandum from Mr. Lawrence regarding campaign contributions); Exhibit 238 (September 20, 2000 memorandum from Mr. Koupal to Mr. Lake suggesting political contributions to specific federal and state candidates); Exhibit 239 (spreadsheet showing proposed 2000 campaign contributions).] According to our interviews with Company executives, members of management had a practice of soliciting individual officers for recommended political contributions earmarked for particular candidates. According to these interviews and a small sampling of documents, the process worked as follows:

- Mr. Wittig, with advice from other officers, would decide on which candidates the Company would support. Mr. Wittig would adjust the list periodically.
- Mr. Wittig, again with the advice of others principally Mr. Koupal and Mr. Lawrence – would develop a list of suggested contribution amounts from Company officials.
- On the basis of this list, a member of management would request via company e-mail, memoranda, or verbally, the contribution amounts specified for each of the officers. Until his departure in October 2001, Mr. Koupal had primary

responsibility for soliciting contributions in this manner.¹⁵⁰ After Mr. Koupal left, the responsibility for soliciting contributions was assumed by Mr. Lawrence.

Until his departure, Mr. Koupal had responsibility for gathering the checks from the listed officers and forwarding them to the candidates. After Mr. Koupal's departure, this task also fell to Mr. Lawrence. Mr. Lawrence said that he collected the contributions and usually placed them in a single envelope to hand to the candidate or a staff member.

These types of activities go back at least to September 2000. A chart from that time lists six executive council officers on one axis and eight candidates on the other, and provides suggested contributions from each officer for each candidate. [Exhibit 239.] By May 2002, the list of officers from whom contributions were solicited appears to have been expanded, encompassing a total of 13. [Exhibit 237.] Around November 2001, Mr. Wittig had developed a donation schedule for the officers that provided for a budgeted contribution per \$1000 of contribution needs. The budgeted contributions ranged from \$300 per thousand for Mr. Wittig and \$200 per thousand for Mr. Lake to \$30 per thousand for Mr. Lawrence and six other officers. [Exhibits 237 and 240.]

5

~~| ~~| \$T

S C

ហេ

Ŷ.

Checks from Mr. Lake provide evidence that at least some of the Company's officers adhered to these proposed contribution amounts. A series of Mr. Lake's checks dated September 26, 2000 are to the same candidates and in precisely the amount requested of him in Mr. Koupal's September 20, 2000 memorandum soliciting the contributions. *Compare* Exhibit 241 *with* Exhibits 238 and 239. Similarly, a series of Mr. Lake's checks dated May 22, 2002 are to the same candidates and in precisely the

¹⁵⁰ Mr. Koupal claimed in his interview that he did not report the results of his solicitation efforts to Mr. Wittig

same amount requested of him in Mr. Lawrence's May 20, 2002 e-mail. Compare Exhibit 242 with Exhibit 236.

Several employees indicated in interviews that they could refuse to make contributions to a particular candidate. In that event, however, they said they would be given a different candidate to whom they could contribute. None of the officers we spoke to reported having been told that his or her job would be in jeopardy or that there would be any other form of retribution if he or she did not contribute. But at least some officers felt pressured to contribute, and were of the view that Mr. Wittig had let it be known that he wanted officers to contribute when Mr. Koupal came to ask. Even so, at least one declined to contribute at all,¹⁵¹ and others refused to contribute to specific candidates.

B. Assessment of this Activity.

070

ST ST

២ ហ

Under the Federal Election Campaign Act ("FECA"), a corporation is prohibited from making any "contribution or expenditure in connection with a federal election." 2 U.S.C. § 441b(a); *see also* 11 C.F.R. § 114.2(b). For these purposes, contributions include both "direct and indirect payment[s] ..., or gift[s] of money, or any services, or anything of value." 11 C.F.R. § 114.1(a)(1).

Consistent with this broad prohibition, a corporation may not "facilitate" the making of a contribution by a member of its "restricted class" – *i.e.*, the corporation's executive or administrative personnel and their families. 11 C.F.R. § 114.2(f)(4)(ii). A corporation "facilitates" the making of a contribution when it provides materials for the

⁵¹ We note, however, that this refusal occurred in the fall of 2002.

purpose of transmitting or delivering the contributions, *i.e.* stamps, addressed envelopes, or any other similar item that would assist in the delivering of contributions. 11 C.F.R. § 114.2(f)(2)(ii). A corporate employee nevertheless may use the facilities of the corporation to engage in "individual volunteer activity" in connection with a federal election, so long as the employee either (i) uses those facilities only on an occasional, isolated or incidental basis and reimburses the company for the overhead or operating costs of such occasional use; or (ii) makes more than occasional use of the company's facilities, but reimburses the corporation within a commercially reasonable time for the normal rental charge of the facilities. 11 C.F.R. § 114.9(a)(1). If such reimbursement does not occur, a prohibited corporate contribution could result. See Federal Election Commission, Advisory Opinion ("AO") 1999-17. Use of corporate facilities is per se occasional, isolated or incidental when it does not exceed one hour per week or four hours per month. 11 C.F.R. § 114.9(a)(1)(iii). A corporation also improperly facilitates contributions if it uses coercion, including threats of detrimental job action or financial reprisal, to persuade an individual to make a contribution to a candidate. 11 C.F.R. §114.2(f)(2)(iv).

5 5

្រ ហេ

ş

A corporation also may not act as a "conduit" for the making of political contributions. 11 C.F.R. § 110.6(b)(2)(ii); AO 1997-22 (Nov. 13, 1997). A corporation acts as a "conduit" if it receives and forwards an earmarked contribution to a candidate or the candidate's authorized committee. 11 C.F.R. 110.6(b)(2). An individual, in contrast. may permissibly act as a "conduit." provided that he or she files a report providing details of such activities to the Federal Election Commission 11 C.F.R § 110.6(c)

Despite these broad prohibitions on corporate political contributions, a corporation may make "communications on any subject, including communications containing express advocacy, to their restricted class or any part of that class." 11 C.F.R. § 114.3(a)(1). These communications can even suggest that the members of the restricted class make a personal contribution to a particular candidate.

Based upon our limited investigation of this issue, many aspects of the efforts undertaken by executives of the Company to solicit and encourage political contributions appear entirely proper under FECA and the relevant Federal Election Commission regulations. The contribution solicitations themselves appear to be permitted under the regulations and also appear to be directed appropriately towards a subset of the restricted class consisting of the Company's most senior executives. Nevertheless, several aspects of the actions of Messrs. Wittig, Koupal and Lawrence raise troubling questions concerning possible facilitation of contributions by the Company and suggest that the Company – or at least some of its senior officials – may have acted as a conduit.

First, the limited information we learned strongly suggests that part of Mr. Koupal's, and later Mr. Lawrence's, job was to advocate for certain candidates and to suggest that specific executive officers of the Company make predetermined contributions to candidates chosen by the Company's chief executive. Mr. Koupal appeared to use corporate stationery for this purpose [Exhibit 238.] and Mr. Lawrence appeared to use the Company's e-mail system for such activity [Exhibit 236.]. Their activities appeared to be organized and coordinated with the wishes of the Company's chief executive Messrs Koupal and Lawrence also do not appear to have been engaged

in "individual voluntary activity," but to have been performing their job functions. As a result, the activities of Messrs. Koupal and Lawrence appear to have been designed to facilitate the making of contributions and should be considered suspect. Nevertheless, based upon the information available to us – establishing two episodes of such political activity from 2000 to 2002 – we remain uncertain whether such activity was more than the "occasional, isolated and incidental" activity that may be permitted by the regulations.

Second, at least one employee complained to us in interviews that employees felt coerced and intimidated into making requested contributions by Mr. Wittig. The limited record we developed, however, does not reflect any explicit threats or overt coercive behavior. And employees said they felt they could decline to contribute to particular candidates and one declined to contribute at all.

Third, in soliciting contributions, Mr. Koupal asked contributors to "return these checks and we'll deliver them tomorrow." Similarly, in his solicitation, Mr. Lawrence asked contributors to "forward your personal check as soon as possible to my attention." Several employees said that checks were in fact collected by both of these individuals to be forwarded to candidates. We believe there is a strong possibility that Mr. Koupal and Mr. Lawrence may have become "conduits" for the contribution checks they collected and passed on to candidates. Moreover, since they appear to have been acting in their capacities as employees, such behavior likely was prohibited by Federal Election Commission regulations. *See* 11 C.F.R. § 106.2(ii) ("[a]ny person who is prohibited from making contributions . . . shall be prohibited from acting as a conduit"). Even if Mi Koupal and Mi Lawrence were acting strictly in their individual capacities. we have

¢D

seen nothing to suggest that they submitted a conduit report, as required by the regulations.

During the course of our interview, Mr. Koupal told us that he thought the Company's political contribution practices had been reviewed by counsel, although he had no firsthand knowledge. Mr. Terrill said that although election counsel reviewed the Company's Political Action Committee, he did not recall counsel reviewing the Company's practice of soliciting political contributions. We have not seen any records that reflect consultation with counsel on contribution-related issues prior to the commencement of our investigation.

The Federal Election Commission is authorized to enforce FECA by pursuing either civil or criminal penalties for violations. In general, the Commission is authorized to seek a civil penalty not to exceed the higher of \$5,000 or the amount of any improper contribution. 2 U.S.C. § 437g(a)(5)(A). If the violation is knowing or willful, the Commission may seek a civil penalty not to exceed the higher of \$10,000 or double the amount of the improper contribution. 2 U.S.C. § 437g(a)(5)(B). The Commission also may seek a criminal referral for a knowing and willful violation involving the making, receiving or reporting of more than \$2,000 in contributions during a calendar year. In such a case, the Commission may seek to impose a prison sentence of up to one year or may seek a fine of up to \$25,000, three times the amount of the contribution, or both. 2 U.S.C. § 437g(d)(1)(A).

In light of the incompleteness of the record resulting from our limited review of the facts, we recommend that the Company retain counsel who specialize in election law

~J

ater and the second state of the second state of the second state of the second second second second second sec

matters to conduct a more thorough review of the propriety of these past activities, to advise the Company on proper steps to take in light of the conclusions reached as a result of that review, and to assist the Company in establishing any needed policies or practices that would help the Company to avoid possible future problems with respect to political contributions.

Memo: Suggested Campaign Contributions

Attached are three sheets of information regarding campaign contributions. The estimated needs (first page) summarizes the total budget for our Washington efforts regarding the Federal Energy Bill and its impact on our financial restructuring plan. It also reflects the individual budget based on the suggested participation provided in an earlier memo. If you have questions about this legislation and what our needs are please feel free to contact me.

The second page is a budget allocation according to current needs as recommended by our Washington Lobbyist.

The final page is specific contributions suggested on the basis of the budget to specific campaigns. If you have any question about these allocations, please call. X 8411. On the current needs, time is of the essence. Please forward your personal check as soon as possible to my attention (TGO 2)

FEC MAIL ROOM

tern Resources

Thursday, March 29, 2001

Federal Election Commission 999 E Street, N.W. Washington, DC 20483

Please accept this notification to you that the Western Resources Employee Political Action Committee was terminated December 31, 2000. All funds were dispersed and thus, a zero balance remains, as indicated on our year end filing report.

If you have any quetions or need additional information, please let me know. I can be reached at (785)575-8057.

Sincerely,

James Stollar

Tamie S. Hollar Treasurer

Memo: Suggested Campaign Contributions

Attached are three sheets of information regarding campaign contributions. The estimated needs (first page) summarizes the total indget for our Washington efforts regarding the Federal Energy Bill and its impact on our financial restructuring plan. It also reflects the individual budget based on the suggested participation provided in an earlier memo. If you have questions about this legislation and what our needs are please feel free to contact me.

The second page is a budget allocation according to current needs as recommended by our Washington Lobbyist.

The final page is specific contributions suggested on the basis of the budget to specific campaigns. If you have any question about these allocations, please call. X 8411. On the current needs, time is of the casence. Please forward your personal check as soon as possible to my attention (TGO 2)

ORIGINAL

I, Mary K. Lewis (Kathy), being duly sworn depose and say:

I am currently employed by Westar Energy, Inc. I was previously known by the 1. name of Kathy Volpert. I now go by Kathy Lewis.

My position at Westar was as the Administrative Clerk, Public/Government 2. Affairs. I performed these duties from May 1998 until the present.

3. In this position, I was asked from time to time to help collect political contribution checks from Westar executives for members of Congress or for members of the Kansas legislature.

In 2002, I assisted the then Vice President for Governmental Affairs, Doug 4. Lawrence in collecting campaign contribution checks from a number of the top executives of the company. After I collected these checks, I would send them by Federal Express to our Washington lobbyist Richard Bornemann. I did this on approximately three occasions to the best of my recollection. The total charge for these three shipments would have been about \$40.00. These shipments were billed to a Westar corporate account.

I spent a total of about 2 hours in 2002 in connection with the collection and 5. processing of these checks.

6. I did have contact

with

Doug Lawrence about how much money I was collecting or the source of the contributions.

Mary K. (Kathy) Lewis

Subscribed and sworn to before me this 20th day of November. 2003

M. Barkle

My Commission expires 4-11 2005

MY APPI EXPIRES

I

INSTRUCTIONS FOR FEC FORM 1

FEDERAL ELECTION COMMISSION Instructions for Statement of Organization (FEC FORM 1)

When to File

New political committees must file this form to register the committee once they exceed the applicable threshold, as described below:

- •Principal campaign committees must file this form no later than 10 days after the candidate designates the committee on the Statement of Candidacy (FEC FORM 2). Other authorized committees file this form with the principal campaign committee, which in turn must file this form with the appropriate filing offices.
- •Committees sponsored by corporations, labor organizations or trade associations (i.e., separate segregated funds) must file this form no later than 10 days after their establishment.
- •Local political party committees must file this form no later than 10 days after exceeding one of the following thresholds during a calendar year: (1) receiving contributions in connection with a federal election aggregating in excess of \$5,000; (2) making exempt payments under 11 CFR 100.80, 100.87, 100.89, 100.140, 100.147 or 100.149 aggregating in excess of \$5,000; or (3) making contributions or expenditures in connection with a federal election aggregating in excess of \$1,000.
- •All other political committees must file this form no later than 10 days after receiving contributions or making expenditures in connection with a federal election aggregating in excess of \$1,000 during a calendar year.

Note: Political committees (except for committees required to file with the Secretary of the Senate) must file reports in an electronic form under 11 CFR 104.18 if they have either received contributions or made expenditures in excess of \$50.000 during a calendar year. or if they have reason to expect that they will exceed either of those thresholds during the calendar year. If your committee has reached this level of activity, you must file this form in an electronic format

A political committee is considered to have reason to expect it will exceed the electronic filing threshold for the next two calendar years after the calendar year in which it exceeds \$50,000 in contributions or expenditures. Exception: This does not apply to an authorized committee with \$50,000 or less in net debts outstanding on January 1 of the year following the general election that anticipates terminating prior to January 1 of the next election year, as long as the candidate has not qualified under 2 U.S.C. §432 as a candidate in the next election and does not intend to become a federal candidate in the next election

A new committee with no previous contributions or expenditures is considered to have reason to expect it will exceed the electronic filing threshold if it exceeds \$12,500 in contributions or expenditures during the first calendar quarter of the calendar year, or \$25,000 in contributions or expenditures in the first half of the calendar year.

Contact the FEC for more information on filing electronically.

Line-by-Line Instructions

LINE 1. Print or type full name and mailing address of the committee. The name of a principal campaign committee or other authorized committee must include the name of the candidate who authorized the committee. A political committee which is not an authorized committee can not include the name of any candidate in its name, except that a delegate committee must include the word "delegate(s)" in its name and may also include the name of the Presidential candidate which it supports. A political committee established solely to draft an individual or to encourage an individual to become a candidate may include the name of the individual in the name of the committee provided the committee's name clearly indicates that

it is a draft committee. The name of a separate segregated fund must include the full name of its connected organization. Any abbreviation or acronym used by the fund must also be reported. List the Internet address (URL) of the committee's official Web site, if such a Web site exists. If the committee is required to file electronically, or is a principal campaign committee of a candidate for the Senate or House of Representatives, also list an electronic mail address. Finally, if the committee is a principal campaign committee or an authorized committee, list the committee's fax number.

LINE 2. State the date the group or organization became a political committee. If this filing is an amendment, note the date of the change in information.

LINE 3. Only committees that have previously filed a Statement of Organization should fill in this block with the number that was originally assigned to the committee. All new committees will be assigned identification numbers when the completed statement has been received.

LINE 4. All political committees registering for the first time check the box labeled "NEW." Committees that have previously filed FEC FORM 1 and are now submitting changes or corrections check the box labeled "AMENDED." If "AMENDED" is checked, complete Lines 1 through 4. With respect to Lines 5-9 include only the change(s) in information previously submitted. Committees are reminded that any change or correction in the information previously filed in the Statement of Organization shall be reported no later than 10 days following the date of the change or correction Committees that are required to file electronically are also required to file amendments to the Statement of Organization in an electronic format

٤n

LINE 5. Check and fill out ONE of the six sections as follows:

(a) All principal campaign committees check (a) and fill in the corresponding information for the candidate under (b).

(b) All other authorized committees check (b) and fill in the corresponding information for the candidate. In the boxes for candidate/party affiliation, list the abbreviation of the party (e.g., for Democratic party, list "DEM," for Republican party, list "REP," for Reform party, list "REF," for Green party, list "GRE" or for Independent, list "IND.") Consult the Commission's Web site at www.fec.gov if unsure of the proper abbreviation to use.

(c) A committee supporting/opposing a single federal candidate which is not authorized by a candidate checks (c), and includes the candidate's name on the line provided. Delegate and draft committees must check (c), and provide the name of the candidate supported.

(d) All national, State and subordinate committees of a political party check (d) and fill in whether the party is the national party (use code NAT), state party (use code STA) or subordinate committee (use code SUB). In the boxes for candidate/party affiliation, list the abbreviation of the party (e.g., for Democratic party, list "DEM," for Republican party, list "REP," for Reform party, list "REF," for Green party, list "GRE" or for Independent, list "IND.") Consult the Commission's Web site at www.fec.gov if unsure of the proper abbreviation to use.

(e) All separate segregated funds check (e). A separate segregated fund is a political committee established, financed, maintained or controlled by a corporation, labor organization, membership organization, cooperative or trade association

(f) A committee supporting/opposing more than one tederal candidate and which is not a separate segregated fund or a political party committee checks box (f) All joint fundraising representatives check (f) A committee established to act as a joint fundraising representative is a political committee se

lected or established by joint fundraising participants as the committee responsible for keeping joint fundraising records, allocating proceeds and expenses among participants and reporting the overall financial activity of the fundraiser.

LINE 6. Political committees must list all affiliated committees and connected organizations (defined below) as follows. Do not leave this line blank. If there are no affiliated committees as described below, enter "None" on this line.

- •Principal campaign committees list all other committees authorized by the same candidate. Under "Relationship," enter "affiliated."
- •Political committees authorized by the same candidate (other than the principal campaign committee) list the principal campaign committee authorized by the same candidate. Under "Relationship," enter "affiliated."
- Political committees which have been established, financed, maintained or controlled by the highest level parent organization (i.e., the corporation, labor organization, membership organization, cooperative or trade association) list:
- •The name of the parent organization. Under "Relationship," enter "connected" AND
- •The name of any other political committee(s) established, financed, maintained or controlled by the same parent organization or by a subsidiary, branch or State, local, or other subordinate unit of the same parent organization. Under "Relationship," enter "affiliated."

Political committees which have been established, financed, maintained or controlled by a subsidiary, branch or State, local, or other subordinate unit of an organization list:

- •The name of the subsidiary, branch or State, local, or other subordinate unit and the name of the parent organization of which it is a part Under "Relationship" enter "connected" AND
- •The name of the highest level political committee sponsored by the parent organization Under "Relationship" enter "affiliated

- •State party committees list any subordinate committees (i.e., any county, district or local committee) under the control or direction of the State committee. Under "Relationship," enter "affiliated." (See 11 CFR 110.3(b).)
- •Subordinate State party committees list the State party committee. Under "Relationship," enter "affiliated." (See 11 CFR 110.3(b).)
- Joint fundraising representatives list all the political committees participating in the joint fundraising effort. Under "Relationship," enter "joint fundraising participant."
- •Joint fundraising participants list the committee established to act as the joint fundraising representative. Under "Relationship," enter "joint fundraising representative."

Separate segregated funds must check the most appropriate box for the type of "connected organization." Note: The term "connected organization" means any organization which is not a political committee but which directly or indirectly establishes, administers or financially supports a political committee. A connected organization may be a corporation (including a corporation without capital stock), a labor organization, a membership organization, a cooperative or a trade association. The definition of "affiliated committee" is contained at 11 CFR 100.5(g).

LINE 7. Enter the name, address and committee position or the title of custodian of the committee's books and records on Line 7. The telephone number is optional, but is helpful in expeditiously resolving potential filing problems. If the treasurer is the custodian of records, the term "treasurer" is sufficient for Line 7.

LINE 8. Enter the name and address of the committee's treasurer on Line 8. The name and address of any designated agent (e.g., assistant treasurer) must also be included on Line 8. Every political committee must have a treasurer and may designate an assistant treasurer who shall assume the duties and responsibilties of the treasurer in the event the treasurer is unavailable. The Commission

Q

INSTRUCTIONS FOR FEC FORM 1

recommends that each political committee designate an assistant treasurer because no contribution or expenditure may be accepted or made by or on behalf of a political committee at a time when there is a vacancy in the office of the treasurer. No expenditure may be made for or on behalf of a political committee without the authorization of its treasurer or another agent authorized orally or in writing by the treasurer.

LINE 9. The committee must provide the name and mailing address of any bank, repository, or depository where the committee holds funds. Each political committee must have a checking account or transaction account at one of its depositories. All receipts of a political committee must be deposited into a designated campaign depository. All disbursements must be made by check or similar drafts drawn on an account at a designated campaign depository, except for expenditures of \$100 or less made from a petty cash fund.

Submit any additional information required for any Line on separate continuation sheets appropriately labeled and attached to the Statement of Organization. Indicate in the appropriate section when information is continued on separate page(s).

Treasurer's Responsibilities

The treasurer of the political committee must preserve a copy of the Statement of Organization and each amendment for a period of not less than 3 years after the date of filing. The treasurer of the political committee is personally responsible for the timely and complete filing of this Statement and for the accuracy of any information contained in it.

Where to File

The original Statement of Organization (FEC FORM 1) and all amendments must be filed with the appropriate office as follows

•The principal campaign committee of a candidate for the House of Representatives and political committees which support or oppose only candidates for the House file with the Federal Election Commission 999 E Street, N W Washington DC 20463

•The principal campaign committee of a candidate for the Senate and political committees which support or oppose only candidates for the Senate file with the Secretary of the Senate, Office of Public Records, 232 Hart Senate Office Building, Washington, DC 20510-7116. Mail addressed to the Secretary of the Senate should read: "Office of Public Records, P.O. Box 5109, Alexandria, VA 22301-0109."

- •An authorized committee which is not the principal campaign committee of a candidate files with the principal campaign committee which must forward a copy to the appropriate office listed herein.
- •All other committees, including the principal campaign committee of a candidate for the office of President or Vice President, file with the Federal Election Commission, 999 E Street, N.W., Washington, DC 20463.

Principal campaign committees of House and Senate candidates must file a copy of this form with the state in which the office is sought, with the exception of committees of candidates in states that have qualified for the Commission's state filing waiver program. Principal campaign committees of Presidential candidates must file a copy of this form in each state in which they have made expenditures, with the exception of those states that have qualified for the Commission's state filing waiver program. A list of qualified states is available from the Federal Election Commission.

Unauthorized political committees must continue to file copies of this form with the states in which they have their headquarters, with the exception of committees that are located in states that have qualified for the state waiver program.

The Treasurer must sign the Statement of Organization.

CODE OF BUSINESS CONDUCT AND ETHICS

 (\dot{q})

WESTAR ENERGY, INC.

Code of Business Conduct and Ethics Adopted July 16, 2003

1. Introduction

This Code of Business Conduct and Ethics ("Code") flows out of our core values of safety, integrity, and accountability. This Code has been adopted by our board of directors and summarizes the standards that must guide our actions. While covering a wide range of business practices and procedures, these standards cannot and do not cover every issue that may arise, or every situation where ethical decisions must be made, but rather set forth key guiding principles that represent Company policies and establish conditions for employment at the Company.

We must strive to foster a culture of honesty and accountability. Our commitment to the highest level of ethical conduct should be reflected in all of the Company's business activities including, but not limited to, relationships with employees, customers, suppliers, competitors, the government and the public, including our investors. All of our employees, officers and directors must conduct themselves according to the language and spirit of this Code and seek to avoid even the appearance of improper behavior. Even well-intentioned actions that violate the law or this Code may result in negative consequences for the Company and for the individuals involved.

Our Company's goal is to be a model of corporate governance. We are committed to achieving a superior reputation for integrity, professionalism and fairness. We should all recognize that our actions are the foundation of our reputation, and adhering to this Code and applicable law is imperative.

2. Compliance with Laws, Rules and Regulations

We are strongly committed to conducting our business affairs with honesty and integrity and in full compliance with all applicable laws, rules and regulations. No employee, officer or director of the Company shall commit an illegal or unethical act, or instruct others to do so, for any reason.

If you believe that any practice raises questions as to compliance with this Code or applicable law, rule or regulation, or if you otherwise have questions regarding any law, rule or regulation, please contact the corporate compliance officer directly or call the Company's integrity hotline. The Company will hold information and training sessions to promote compliance with the laws, rules and regulations that affect our business.

1

ż

I

3. Trading on Inside Information

Using non-public information to trade in securities, or providing a family member, friend or any other person with a "tip", is illegal. All non-public information should be considered inside information and should never be used for personal gain or the personal gain of others. You are required to familiarize yourself and comply with the Company's policy against insider trading, copies of which are distributed to all employees, officers and directors and are available from the corporate compliance officer. You should contact the corporate compliance officer with any questions about your ability to buy or sell securities.

4. Protection of Confidential Proprietary Information

Confidential proprietary information generated and gathered in our business is a valuable Company asset. Protecting this information plays a vital role in our continued growth and ability to compete, and all proprietary information should be maintained in strict confidence, except when disclosure is authorized by the Company or required by law.

Proprietary information includes all non-public information that might be useful to competitors or others that could be harmful to the Company or its customers if disclosed. Intellectual property such as trade secrets, patents, trademarks and copyrights, as well as business research and new product plans, objectives and strategies, records, databases, salary and benefits data, employee medical information, customer, employee and suppliers lists and any unpublished financial or pricing information must also be protected.

Unauthorized use or distribution of proprietary information violates Company policy and could be illegal. Such use or distribution could result in negative consequences for both the Company and the individuals involved, including potential legal and disciplinary actions. We respect the property rights of other companies and their proprietary information and require our employees, officers and directors to observe such rights.

Your obligation to protect the Company's proprietary and confidential information continues even after you leave the Company. You must return all proprietary and confidential information in your possession upon leaving the Company.

5. Conflicts of Interest

Our employees, officers and directors have an obligation to act in the best interest of the Company. All employees, officers and directors should endeavor to avoid situations that present a potential or actual conflict between their interest and the interest of the Company. A "conflict of interest" occurs when a person's private interest interferes in any way, or even appears to interfere, with the interest of the Company, including its subsidiaries and affiliates. A conflict of interest can arise when an employee, officer or director takes an action or has an interest that may make it difficult for him or her to perform his or her work objectively and effectively. Conflicts of interest may also arise when an employee, officer or director (or someone with a close relationship to him or her) receives improper personal benefits as a result of the employee's, officer's or director's position in the Company.

Although it would not be possible to describe every situation in which a conflict of interest may arise, the following are examples of situations that may constitute a conflict of interest:

- Working, in any capacity, for a competitor, customer or supplier while employed by the Company.
- Accepting gifts of more than modest value or receiving personal discounts or other benefits as a result of your position in the Company from a competitor, customer or supplier.
- Competing with the Company for the purchase or sale of property, services or other interests.
- Having an interest in a transaction involving the Company, a customer or supplier (other than as an employee, officer or director of the Company and not including routine investments in publicly traded companies).
- Receiving a loan or guarantee of an obligation as a result of your position with the Company.
- Directing business to a supplier owned or managed by, or which employs, a relative or friend.

Situations involving a conflict of interest may not always be obvious or easy to resolve. You should report actions that may involve a conflict of interest to the corporate compliance officer.

In order to avoid conflicts of interests, each officer and director must disclose to the corporate compliance officer any material transaction or relationship that reasonably could be expected to give rise to such a conflict, and the corporate compliance officer shall notify the nominating and corporate governance committee of the board of directors of any such disclosure. Conflicts of interests involving the corporate compliance officer shall be disclosed to the nominating and corporate governance committee

6. Protection and Proper Use of Company Assets

Protecting Company assets against loss, theft or other misuse is the responsibility of every employee, officer and director. Loss, theft and misuse of Company assets directly impact our profitability. Any suspected loss, misuse or theft should be reported to your supervisor and the corporate compliance officer.

The sole purpose of the Company's equipment, vehicles and supplies is the conduct of our business. They may only be used for Company business consistent with Company guidelines.

7. Corporate Opportunities

Employees, officers and directors are prohibited from taking for themselves business opportunities that arise through the use of corporate property, information or position. No employee, officer or director may use corporate property, information or position for personal gain, and no employee, officer or director may compete with the Company. Competing with the Company may involve engaging in the same line of business as the Company, or any situation where the employee, officer or director takes away from the Company opportunities for sales or purchases of products, services or interests.

8. Fair Dealing

Each employee, officer and director of the Company should endeavor to deal fairly with customers, suppliers, competitors, the public and one another at all times and in accordance with ethical business practices. No one should take unfair advantage of anyone through manipulation, concealment, abuse of privileged information, misrepresentation of material facts or any other unfair dealing practice. No payment in any form (kickbacks) shall be made directly or indirectly to an employee, officer, or director, for the purpose of obtaining or retaining business or obtaining any other favorable action. The Company and the employee, officer or director involved may be subject to disciplinary action as well as potential civil or criminal liability for violation of this policy.

Occasional business gifts to and entertainment of non-government employees in connection with business discussions or the development of business relationships are generally deemed appropriate in the conduct of Company business, subject to the Company's employee expense travel & entertainment policy. However, these gifts should be given infrequently and their value should be modest. Gifts or entertainment in any form that would likely result in a feeling or expectation of personal obligation should not be extended or accepted.

Practices that are acceptable in commercial business environments may be against the law or the policies governing federal, state or local government employees. Therefore, no gifts or business entertainment of any kind may be given to any government employee without the prior approval of the corporate compliance officer.

Except in certain limited circumstances, the Foreign Corrupt Practices Act ("FCPA") prohibits giving anything of value directly or indirectly to any "foreign official" for the purpose of obtaining or retaining business. When in doubt as to whether a contemplated payment or gift may violate the FCPA, contact the corporate compliance officer before taking any action.

9. Quality of Public Disclosures

The Company has a responsibility to communicate effectively with shareholders so that they are provided with full and accurate information, in all material respects, about the Company's financial condition and results of operations. Our reports and documents filed with or submitted to the Securities and Exchange Commission and our other public communications shall include full, fair, accurate, timely and understandable disclosure. The Company has established a disclosure committee consisting of senior management to assist in monitoring such disclosures.

10. Compliance with This Code and Reporting of Any Illegal or Unethical Behavior

All employees, directors and officers are expected to comply with all of the provisions of this Code. The Code will be strictly enforced throughout the Company and violations will be dealt with immediately, including subjecting persons to corrective and/or disciplinary action such as dismissal or removal from office. Violations of the Code that involve illegal behavior will be reported to the appropriate authorities.

Situations that may involve a violation of ethics, laws or this Code may not always be clear and may require difficult judgment. Employees should report any concerns or questions about violations of laws, rules, regulations or this Code to department management and the corporate compliance officer. Reporting of such violations may also be done anonymously through the Company's integrity hotline. An anonymous report should provide enough information about the incident or situation to allow the Company to investigate properly. If concerns or complaints require confidentiality, including keeping an identity anonymous, the Company will endeavor to protect this confidentiality, subject to applicable law, regulation or legal proceedings. All accounting, internal accounting controls or auditing matters, will be reported to the audit committee of the board of directors. Interested parties may also communicate directly with the Company's non-management directors through contact information located in the company's annual proxy statement.

Any concerns about violations of laws, rules, regulations or this Code by any officer or director should be reported promptly to the corporate compliance officer. and the corporate compliance officer shall notify the nominating and corporate governance committee of any violation. Any such concerns involving the corporate

5

compliance officer should be reported to the general counsel. The general counsel will notify the nominating and corporate governance committee. The Company encourages all employees, officers and directors to report any suspected violations promptly and intends to thoroughly investigate any good faith reports of violations. The Company will not tolerate any kind of retaliation for reports or complaints regarding misconduct that were made in good faith. Open communication of issues and concerns by all employees without fear of retribution or retaliation is vital to the successful implementation of this Code. You are required to cooperate in internal investigations of misconduct and unethical behavior.

The Company recognizes the need for this Code to be applied equally to everyone it covers. The corporate compliance officer of the Company will have primary authority and responsibility for the enforcement of this Code, subject to the supervision of the nominating and corporate governance committee, or, in the case of accounting, internal accounting controls or auditing matters, the audit committee, of the board of directors, and the Company will devote the necessary resources to enable the corporate compliance officer to establish such procedures as may be reasonably necessary to create a culture of accountability and facilitate compliance with the Code. Questions concerning this Code should be directed to the corporate compliance officer.

11. Waivers and Amendments

Any waivers of the provisions in this Code for officers or directors may only be granted by the board of directors and will be promptly disclosed to the Company's investors. Any waivers of this Code for other employees may only be granted by the corporate compliance officer in consultation with the CEO. Amendments to this Code must be approved by the board of directors, and amendments of the provisions in this Code applicable to the CEO and CFO will also be promptly disclosed to the Company's investors.

12. Equal Opportunity, Non-Discrimination and Fair Employment

The Company's policies for recruitment, advancement and retention of employees forbid discrimination on the basis of any criteria prohibited by law, including but not limited to race, sex and age. Our policies are designed to ensure that employees are treated, and treat each other, fairly and with respect and dignity. In keeping with this objective, conduct involving discrimination or harassment of others will not be tolerated. All employees are required to comply with the Company's policy on equal opportunity, non-discrimination and fair employment, copies of which were distributed and are available from the human resources department.

13. Compliance with Antitrust Laws

The antitrust laws prohibit agreements among competitors on such matters as prices, terms of sale to customers and allocating markets or customers. Antitrust

laws can be very complex, and violations may subject the Company and its employees to criminal sanctions, including fines, incarceration and civil liability. If you have any questions, consult the legal department.

14. Political Contributions and Activities

Any political contributions made by or on behalf of the Company and any solicitations for political contributions of any kind must be lawful and in compliance with Company policies. This policy applies solely to the use of Company assets and is not intended to discourage or prevent individual employees, officers or directors from making political contributions or engaging in political activities on their own behalf. No one shall be reimbursed directly or indirectly by the Company for personal political contributions.

15. Environment, Health and Safety

The Company is committed to conducting its business in compliance with all applicable environmental and workplace health and safety laws and regulations. The Company strives to provide a safe and healthy work environment for our employees and to avoid adverse impact and injury to the environment and communities in which we conduct our business. Achieving this goal is the responsibility of all officers, directors and employees.

POLITICAL CAMPAIGN CONTRIBUTION POLICY

RESOLVED, that the Political Campaign Contribution Policy in the form presented to the Board at the meeting is hereby approved; and further

RESOLVED, that the officers of the Company are hereby authorized to take such actions as they may deem necessary or appropriate to carry out the foregoing resolution.

Corporate Profile

Corporate Governance

Westar Energy is committed to fair and ethical business practices and to strict compliance with laws governing our business activities. To help ensure our business is conducted with honesty and integrity, and to provide employees direction and allow employees a safe outlet to voice concerns, we have instituted the Westar Energy Integrity Hotline and the Code of Business Conduct and Ethics

The Integrity Hotline

The Integrity Hotline is a confidential outlet for employees, vendors and others to express concerns regarding possible problems. The toll-free hotline number is 1-877-248-1184. The hotline fields calls concerning

- Questionable accounting or auditing matters
- Dishonest or improper conduct
- Other possible infractions or violations of law

The Westar Energy Code of Business Conduct and Ethics clearly outlines business practices focusing on honest business practices with customers, shareholders, employees and vendors

POLITICAL CAMPAIGN CONTRIBUTION POLICY

RESOLVED, that the Political Campaign Contribution Policy in the form presented to the Board at the meeting is hereby approved; and further

RESOLVED, that the officers of the Company are hereby authorized to take such actions as they may deem necessary or appropriate to carry out the foregoing resolution.

5044421038

ŝ

77 127 **Political Fundraising**

Board Resolution: 1. Management is directed to retain outside counsel to assist the Company in adopting a formal policy with respect to political fundraising. Management shall report to the Board in 90 days on the implementation of such policy. 2. Management is directed to periodically consult with counsel to review the policy to ensure that it continues to accurately reflect developments in the law.

Westar Energy holds a right and responsibility to participate in the political process. The Company will protect and advance its interests in lawful, ethical, and proper ways.

Officers may occasionally be encouraged by peer officers to contribute to political candidates; the decision to contribute is strictly voluntary and refusal to contribute shall not affect an officer's terms of employment. Under no circumstances will corporate facilities or administrative personnel be used in connection with any such efforts.

Westar Energy shall not make corporate contributions to candidates for federal or state office, even where state law may permit such contributions.

Westar Energy employees are in the process of re-establishing state and federal political action committees (PACs).

- An executive committee selected by fellow employees shall govern the PACs. Members of the executive committee will serve on a voluntary basis.
- Westar officers may not serve on the PACs' executive committee.
- The executive committee shall make all decisions regarding PAC contributions to candidates. The executive committee shall coordinate and conduct political fundraising solicitations for the PACs.
- The executive committee shall govern the PACs, establish PAC by-laws and recruit members from among salaried employees. Outside counsel will provide advice to assure the PACs are in strict compliance with laws and regulations.
- Westar's lobbyist (manager of government affairs) shall serve as a non-voting advisor to the executive committee.
- Employee participation and contributions shall be strictly voluntary. Terms of employment shall not be influenced by one's decision whether or not to participate in the employee PACs. When PAC solicitations or information is disseminated, employees shall be notified that participation and contributions are strictly voluntary.

- To the extent allowed by law, Westar Energy may provide the establishment and administration support for the PACs (egs, allow use of company materials and resources to publish PAC newsletters, use of facilities for PAC executive committee meetings, sponsoring of PAC membership drives and activities such as meetings, dinners, refreshments, etc). Expert counsel is advising as to the limits of corporate support for PAC operating costs.
- In the short term, Westar Energy may make an initial "seed-money" contribution to the employee state PAC to encourage employee participation and effect a transition from state corporate contributions to state PAC contributions. Corporate contributions to the federal PAC are not allowed by law.

Westar Energy shall periodically consult expert counsel in campaign election law to review changes in state and federal election law and to advise the company and the employee PACs on compliance. The Company has recently retained Tim Jenkins of O'Connor & Hannan as expert counsel to investigate special committee issues relating to political contributions and to advise regarding political contributions in the future. ARTICLES OF ASSOCIATION OF WESTAR ENERGY EMPLOYEES POLITICAL ACTION COMMITTEE

ARTICLE I

Organization

Section A. The name of this Association shall be Westar Energy Employees Political Action Committee and may be known as "Westar Energy PAC."

Section B. The Association shall be voluntary, nonprofit, nonpartisan, and unincorporated and shall not be affiliated with any specific candidate for public office, specific political group, or other person or persons except as may be provided herein.

Section C. Westar Energy, a Kansas corporation with its principal office at 818 S. Kansas Avenue, Topeka, Kansas, 66612, shall be deemed to be the only connected organization of the PAC. Establishment and solicitation expenses for Westar Energy may be paid by Westar Energy as provided for in applicable federal and state laws.

Section D. The Association shall be domiciled within Shawnee County, Kansas.

ARTICLE II

<u>Purposes</u>

The purposes of this Association are:

- 1. to promote good citizenship through the personal and financial participation of its members in the election of public officials, and;
- 2. to protect and preserve a sound investor-owned utility industry by supporting federal and state candidates, regardless of party affiliation, who have been supportive of the investor-owned utility industry and/or are positioned to impact upon our industry.

ARTICLE III

Powers

Section A. In order to effectuate the foregoing purposes, but not in limitation thereof, the Association is empowered to:

- 1. solicit voluntary individual personal contributions to the Association for distribution by it to further the candidacies of selected candidates for elective public office;
- 2. expend monies and make contributions to further the candidacies of selected candidates for elective public office; and
- 3. do all things necessary and desirable consistent with applicable laws, rules, and regulations.

Section B. The Association is not authorized to borrow funds or incur debts other than accounts payable in the ordinary course of business.

ARTICLE IV

Participation

Participation is voluntary and shall be open to eligible Westar Energy employees who meet the minimum requirements as established under applicable federal and state law and such additional requirements as may be established by the Association's Board of Directors.

ARTICLE V

Contributions To The Association

Section A. Contributions to the Association will be collected for the purpose of contributing to federal candidates for seats in the United States House of Representatives and Senate and for the Presidency and to candidates for state elective offices as approved by the Board of Directors.

Section B. No contribution shall be accepted which is earmarked for any political committee or candidate.

2

Section C. No contribution will be accepted from individuals who are not citizens or permanent legal residents of the United States.

Section D. Contributions to the Association shall be wholly voluntary and no direct or indirect pressure or coercion shall be exerted on any person to induce or compel a contribution.

Section E. Contributions which exceed the limits set by applicable law will not be accepted. The Treasurer or Assistant Treasurer shall return to the appropriate donor any contribution which exceeds the legal limit or which is otherwise prohibited by law.

Section F. Association funds shall not be commingled with those of any individual or other organization.

ARTICLE VI

Contributions By The Association

Section A. The Association may make contributions to candidates for seats in the United States House of Representatives and Senate and for the Presidency and to candidates for state elective offices as approved by the Board of Directors.

Section B. The Board of Directors of the Association, shall, in its discretion, determine how funds shall be distributed. Notwithstanding this discretionary authority, the Board of Directors shall, on a bipartisan basis, consider whether the proposed recipient is a candidate that shares positions consistent with the purposes of the Committee as stated in Article II.

Section C. Contributions shall be on checks or bank drafts bearing the name of the Association and shall be executed by the Treasurer or Assistant Treasurer.

ARTICLE VII

Officers and Board of Directors

Section A. The Officers of the Association shall be the Chairperson. the Secretary, and the Treasurer.

Section B. The initial Officers shall be: Chairperson: Secretary: Treasurer:

Section C. The Chairperson and the Secretary shall serve a term of two years or until a successor assumes the position.

Section D. The Board of Directors shall be comprised of the officers and six other individuals appointed by the officers to serve as directors-at-large. The directors-at-large shall serve a term of two years or until a successor assumes the position, except that three of the initial directors-at-large shall serve an initial term of three years or until a successor assumes the position.

Section E. The Board of Directors shall meet periodically to consider issues relating to the management of the Association, including, but not limited to:

- 1. determining how funds shall be distributed;
- 2. determining which employees will be solicited; and
- 3. determining which lawful solicitation methods shall be utilized.

ARTICLE VIII

Treasurer and Assistant Treasurer

Section A. The Board of Directors shall appoint an Assistant Treasurer from the directors-at-large. The Treasurer or Assistant Treasurer will keep the financial and other records of the Association, shall comply with all applicable legal requirements, and shall perform such other duties as may be assigned by the Board of Directors. The specific duties of the Treasurer shall include, but are not necessarily limited to the following:

- 1. advising the Board of Directors of the total amount of funds held by the Association and such other information as may be appropriate under the circumstances;
- 2. maintaining all required records regarding contributions and expenditures and filing all necessary reports with appropriate federal, state and local authorities:
- 3. establishing and maintaining one or more bank accounts for the deposit of all contributions received:

- 4. keeping a detailed account of all contributions, the name and mailing address of every person making a contribution in excess of \$50.00 and all expenditures made by or on behalf of the Association; and
- 5. disbursing funds as directed by the Board of Directors.

Section B. If the Treasurer is unable to perform such duties, the Assistant Treasurer shall assume the duties of the Treasurer. The Treasurer may also delegate to the Assistant Treasurer, on a discretionary basis, the duties of the Treasurer.

Section C. The Treasurer and Assistant Treasurer are the only personnel empowered to disburse the Association's funds.

Section D. Notwithstanding any other provision contained herein, contributors to the Association shall be kept confidential by the Treasurer and Assistant Treasurer unless their identity is required to be disclosed under applicable laws and regulations.

Section E. The Treasurer shall maintain the following records for the ready availability of all current contributors to the Association:

- 1. the Articles of Association of the PAC;
- 2. all other records required by applicable laws and regulations to be filed and made available to the public.

Current contributors include those who have made or pledged a contribution during the calendar year in which the request for document disclosure is made.

Section F. The Treasurer and Assistant Treasurer shall serve indefinite terms. They can be replaced by a majority vote of the Board of Directors.

ARTICLE IX

Separate Funds

The Association may establish separate funds for the primary purpose of receiving contributions and other monies and making contributions and other disbursements for candidates for state elective office in Kansas and for federal candidates. The separate funds will be administered in accordance with applicable laws and regulations. If permitted by law, transfers between funds of the Association may be authorized by a majority of the Board of Directors.

ARTICLE X

Amendments

These bylaws may be amended, repealed or altered, in whole or in part, by a majority vote of the Board of Directors.

ARTICLE XI

Dissolution

Section A. The Association may be dissolved by a unanimous vote of the Board of Directors.

Section B. In the case of dissolution, the Treasurer shall return undistributed funds to the contributors readily identifiable, and any funds, which are not identifiable, may, prior to dissolution of the Association, be disbursed by the Association to candidates for election to federal and state office in accordance with these Bylaws.
