To whom it may concern,

I am writing to file an official complaint against Shiva Ayyadurai, who claims to be running for U.S. Senate in Massachusetts.

According to a handwritten document with a date stamp of "April 20, 2017", the "Shiva for Senate" campaign says that they filed FEC form 1 and 2 on March 22, 2017. I believe that if Shiva for Senate filed his candidacy at that time, then he would have been required to file an April 15th FEC Quarterly Report.

During the month of March 2017, he did have a website up and collecting donations. He printed and distributed the enclosed flyer.

Also, please note that the flyer doesn't have the appropriate disclaimer in a box, as per FEC rules.

Finally, I believe that the FEC requires the person's last name be part of the campaign name. He has not included his last name in the name of the committee.

Thank you for your attention to this matter.

From: SIVIA ANANDARAI

Cambridge, MA 02138

SECRETARY OF THE SENATE

April 17 2017
17 APR 20 AM 9:53

Dear Secretary of Senate,

Attached herewith is FEC Form 1 for my candidate committee previously on or about March 22, 2017, your office received our FEC 2 form. However, we noticed that ~~my~~ name 'Ayyadurai' was spelled wrong as 'Ayyadusai'. An 's' was used rather than a 'r'. Our team, first of all, was never notified of the FEC 2 form processing. Second, after finding the spelling mistake it took us nearly 3 weeks to find the right person to change it.

On April 7, 2017, we spoke to an office who was very apologetic & said they would fix it; however, it would take 4-5 days. We noticed last week it was fixed.

Now, due to processing error, we were asked to submit FEC Form 1, after the name correction was complete. The FEC 1 form is now being submitted, given the error has been fixed.

Yours sincerely,
Sivia Anandarai

★ U.S. SENATE

Be the Light!

U.S. SENATE

Let's be the light and
fight for the American Dream.

I am an All-American Indian. Born in India and made in America. The caste system of India deemed me a "lower caste." My parents, seeing the severe limits of the caste discrimination we faced in India, immigrated to America in 1970. I grew up in New Jersey and received my education from the dedicated teachers of the public school system.

★ ALL-AMERICAN INDIAN ★

As a kid, I had a paper route, played baseball, and had my own landscaping business. By the time I was in 9th grade, I had completed Calculus and was accepted to a special Computer Science Program at NYU. After graduating that program, I started working at Rutgers Medical School. I was one of two students selected to represent our high school at American Legion Jersey Boys State.

★ A REAL INNOVATOR ★

At Rutgers, at the age of 14, I did medical research and invented email --- the world's first true email system --- an electronic version of interoffice email that included inbox, outbox, memo, folders, attachments, and all the features we use today. I was accepted as an undergraduate at MIT, where I eventually got four degrees including my PhD in Biological Engineering. During that time I wasn't just a "nerd" studying away, but I also founded seven start-up companies --- including EchoMail, an artificial intelligence (AI) technology that I originally developed for the Clinton White House to automatically analyse, sort, route and respond to email. Today, my latest company CytoSolve is advancing a revolutionary approach to lower the costs of drugs as well as to validate herbs and nutritional supplements.

★ A REAL FIGHTER ★

Throughout my work as a scientist, inventor and entrepreneur, I've never forgotten the realities of life and struggle that I first encountered in India's caste system and what I later observed in America. When I received a Fulbright Scholarship after my PhD to study traditional health systems in India, and was later appointed to a senior position in the Indian government, I exposed widespread corruption in India's science establishment. I also used my scientific training to challenge the Monsanto Corporation and its lack of safety standard in genetically modified organisms (GMOs). Even as a teenager when I first came to MIT, I fought against inequities in student government and mistreatment of workers and disenfranchised students. During my MIT PhD graduation, I was the only student to protest the war in Iraq. More recently, I exposed the libelous "Fake News" of Gawker Media and was victorious in defeating them.

★ DEFEAT ELIZABETH WARREN - FAKE INDIAN, FAKE FIGHTER ★

I am a REAL INNOVATOR, A REAL FIGHTER, and an ALL-AMERICAN INDIAN. Elizabeth Warren is a FAKE FIGHTER and a FAKE INDIAN. She is a lawyer, a professor, and a career politician. I am an entrepreneur, an engineer, a scientist, and an inventor. She thinks, for you, she knows better, but I believe you know better. I'll be honored to serve as your Senator.

SHIVA4SENATE
FIGHT FOR THE AMERICAN DREAM

As a scientist and engineer, I know that Nature is the ultimate designer and the supreme engineer. The laws of Nature reveal that intelligence exists everywhere and is not centralized. But there are those like Elizabeth Warren who think they are God and all-knowing. She is quite certain that SHE KNOWS BETTER.

★ BE THE LIGHT ★

The truth is: YOU KNOW BETTER. People working real jobs, raising families, facing problems, and being innovative and creative, solve their problems every day with their natural intelligence and their hard-won experience --- that's what Elizabeth Warren doesn't understand. Nature demands we "BE THE LIGHT" and use OUR God-given spark of divinity to innovate & create. Based on this principle that intelligence is everywhere and innovation can occur anytime, anywhere, by anybody, here's what I stand for:

★ REAL JOBS. GOOD WAGES ★

Beyond just Silicon Valley or Kendall Square, let's create 21st century jobs that take advantage of the incredible advances in science, engineering, medicine, and the long-awaited return of manufacturing and fair trade practices. (Elizabeth Warren was paid \$300,000+ for teaching just ONE class at Harvard.)

★ LOW TAXES. FAIR TAXES ★

Money goes where there's a stable economy, low inflation and low taxes. Increasing taxes on those who innovate and take risks to deliver jobs will destroy our system. (According to Forbes.com, Elizabeth Warren wants a corporate income tax rate of 105%. Our current 35% corporate tax is the highest in the industrialized world.)

★ CARE AND HEALTH IN "HEALTHCARE" ★

Neither Obamacare nor RyanCare address REAL "care" or "health." We need CARE that provides choice, accountability and affordability. We need HEALTH that integrates state of the art innovations and discoveries from East & West, Ancient & Modern, Science & Tradition for everyone. (Elizabeth Warren receives government health care as a senator.)

Along with those three top priorities, I see other areas of urgent concern:

>> OUR VETERANS: We must fast track and deliver those services that our vets need and have been wrongfully denied. We treat illegal immigrants better than our own veterans.

>> IMMIGRATION: We need secure borders that safeguard our citizens and those that came here legally. Without borders and clear enforcement, we don't have a country.

>> GUNS: Most gun owners are law abiding citizens. We must protect their constitutional rights. Chicago has America's strictest firearm laws and has record-breaking gun crime.

>> INNER CITIES: Youth learn and prosper from adult role models and their mentoring. We need REAL mentors and need to eradicate those that destroy our youth.

>> CLIMATE CHANGE: Moving forward demands INNOVATION --- climate-safe innovation in clean coal, and funding for fusion and safe fission energy sources.

>> GOVERNMENT WASTE: Let's provide incentives and meaningful rewards for government workers to identify waste from within.

>> FOOD SAFETY: We need policies to ensure our food supply is safe and not ridden with pesticides or genetic modifications that have evaded safety assessments.

>> HIGH DRUG PRICES: We develop drugs using excessively complicated, outdated procedures. Technologies that create drugs faster & cheaper must be put into action now.

>> PREVENTION & WELLNESS: Healthcare costs will be 10% of GDP by 2020. Let's support research in prevention such as yoga, nutrition, complementary and alternative medicine.
