

risk and compliance management in conducting such activities.

Questions Regarding Current and Potential Use Cases

1. In addition to the broad categories of digital assets and related activities described above, are there any additional or alternative categories or subcategories that IDIs are engaged in or exploring?

2. What, if any, activities or use cases related to digital assets are IDIs currently engaging in or considering? Please explain, including the nature and scope of the activity. More specifically:

a. What, if any, types of specific products or services related to digital assets are IDIs currently offering or considering offering to consumers?

b. To what extent are IDIs engaging in or considering engaging in activities or providing services related to digital assets that are custodial in nature, and what are the scope of those activities? To what extent are such IDIs engaging in or considering secondary lending?

c. To what extent are IDIs engaging in or considering activities or providing services related to digital assets that have direct balance sheet impacts?

d. To what extent are IDIs engaging in or considering activities related to digital assets for other purposes, such as to facilitate internal operations?

3. In terms of the marketplace, where do IDIs see the greatest demand for digital asset-related services, and who are the largest drivers for such services?

Questions Regarding Risk and Compliance Management

4. To what extent are IDIs' existing risk and compliance management frameworks designed to identify, measure, monitor, and control risks associated with the various digital asset use cases? Do some use cases more easily align with existing risk and compliance management frameworks compared to others? Do, or would, some use cases result in IDIs developing entirely new or materially different risk and compliance management frameworks?

5. What unique or particular risks are challenging to measure, monitor, and control for the various digital asset use cases? What unique controls or processes are or could be implemented to address such risks?

6. What unique benefits to operations do IDIs consider as they analyze various digital asset use cases?

7. How are IDIs integrating, or how would IDIs integrate, operations related to digital assets with legacy banking systems?

8. Please identify any potential benefits, and any unique risks, of particular digital asset product offerings or services to IDI customers.

9. How are IDIs integrating these new technologies into their existing cybersecurity functions?

Questions Regarding Supervision and Activities

10. Are there any unique aspects of digital asset activities that the FDIC should take into account from a supervisory perspective?

11. Are there any areas in which the FDIC should clarify or expand existing supervisory guidance to address digital asset activities?

12. In what ways, if any, does custody of digital assets differ from custody of traditional assets?

13. FDIC's part 362 application procedures may apply to certain digital asset activities or investments.³ Is additional clarity needed? Would any changes to FDIC's regulations or the related application filing procedures be helpful in addressing uncertainty surrounding the permissibility of particular types of digital asset-related activity, in order to support IDIs considering or engaging in such activities?

Questions Regarding Deposit Insurance and Resolution

14. Are there any steps the FDIC should consider to ensure customers can distinguish between uninsured digital asset products on the one hand, and insured deposits on the other?

15. Are there distinctions or similarities between fiat-backed stablecoins and stored value products where the underlying funds are held at IDIs and for which pass-through deposit insurance may be available?

16. If the FDIC were to encounter any of the digital assets use cases in the resolution process or in a receivership capacity, what complexities might be encountered in valuing, marketing, transferring, operating, or resolving the digital asset activity? What actions should be considered to overcome the complexities?

Additional Considerations

17. Comments are invited to address any other digital asset-related information stakeholders seek to bring to the FDIC's attention. Comments are also welcome about the digital asset-related activities of uninsured banks and nonbanks.
